SPECIAL NOTICE

For the greater Convenience of our Customers in the
United States of America and the Dominion of Canada

We beg to announce that it has become necessary to open branch offices and warehouses
 at Boston, Mass., Seattle, Wash., Toronto, Ont., and Montreal, Que. Our
 business in America is now conducted under the name of

"Carter's Tested Seeds, Inc."

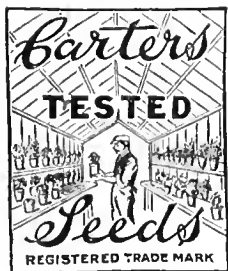

This was done in order to meet the requirements of our ever-increasing business in America and to facilitate same,
 and we would request our patrons there who have been buying from our London headquarters to place their orders with
 our Boston or Toronto Branches. This will insure the quickest service possible, as a complete and representative stock
 is carried in these cities. We keep a large stock and can supply a great number of varieties not mentioned in this catalogue.
 Send your order in early.

AN INVITATION

Visitors to England are cordially invited to inspect our Model Establishment and Grounds
 at Raynes Park (twenty minutes' train ride from Waterloo Station); we feel sure our unique
 methods will interest them. American visitors will no doubt remember seeing our buildings,
 which face the L. & S. W. Railway main line, on their journey from Southampton to London.

The R. H. S. awarded their Gold Medal to the above exhibit of vegetables grown from Carters Tested Seeds and exhibited by the Hon. Vicary Gibbs (Mr. E. Beckett Gardner) Holland House Show, 1913.

EXPLANATORY NOTES ON THE MEANING OF OUR WELL-KNOWN TRADE MARK

CARTERS TESTED SEEDS

NEARLY a hundred years ago the founder of our firm, James Carter, we believe, was the first to guarantee the germination of garden seeds. The practice, with the advantage of more scientific and up-to-date methods, is still followed. The Carter laboratories at Raynes Park, wherein the scientific skill of our botanists and analyst, aided by the finest apparatus in the world (always open to inspection) should assure for this title (**Carters Tested Seeds**) the very best recommendation. We were awarded the large silver medal for our own invented apparatus for seed testing at the recent Royal International Horticultural Exhibition in London. All our seeds, after passing through our laboratory tests, are grown in our grounds to full maturity at the same time as our customers grow them, so that we may prove the quality and trueness of each variety. By examining our trials from time to time we know exactly how the produce of our seeds should appear in the gardens of our customers all over the world, making allowances for the various climates, and by the aid of our comparative tests (we test all British and Continental seeds of repute) we assure ourselves that our customers are growing "the best and only the best" "tested seeds."

With Compliments of

Asparagus

Price, .10 per pkt.; .40 per oz.; 1.25 per ¼ lb.

ASPARAGUS

Cultivation of Asparagus. — Sow the seeds thinly in drills about 1 foot apart and 1 inch deep; any good, loamy, not too weedy soil is good for growing the plants and the seed can be sown as early as the ground can be cultivated in the spring. When the plants have made a showing thin out to 2 or 3 inches apart. For the permanent bed deep, warm, rich, loamy soil is required. Use stable manures and fertilizers freely. Make trenches 6 to 8 feet apart and 8 to 10 inches deep. Set the one or two year old roots about 2 feet apart in the trench and cover lightly at first, gradually filling in with soil and old compost. Every fall a liberal dressing of coarse manure should be spread over the rows after the tops have been cut, and this should be forked or spaded in in the spring. Keep well cultivated. The second year, after the roots have been transplanted, the bed may be cut once or twice, but great care should be taken not to cut too closely, as the roots require the benefit of some foliage. One ounce of seed will produce about two hundred plants; 4 to 5 lbs. to the acre.

Carters Mammoth Emperor. — Superior in size.

Price, .10 per pkt.; .40 per oz.; 1.50 per ¼ lb.

	Per pkt.	Per oz.	Per lb.
Batavian10	.20	2.00
Conover's Colossal. — Large10	.20	2.00
Reading Giant15	.30	3.00

ARTICHOKE

Cultivation of Artichoke. — The scales and bottom of the flower-head are eaten either boiled or raw as a salad. The young suckers are sometimes tied together and blanched, and served in manner the same as asparagus. Sow the seeds early in April or May and when large enough transplant into rows 4 feet apart with 2 feet between each plant. They will yield well the second year if they are well protected from the cold throughout the winter by earthing up and mulching. The artichoke may be also treated as an annual, sowing the seeds under glass and keeping the seedlings growing vigorously until May, when they should be set out in a rich soil. By this treatment they will produce fine heads the first season. One ounce of seed will sow 35 feet of drill.

Crown Artichoke, Earliest Drumhead. — The finest strain in cultivation

Price, .25 per pkt.;
.75 per oz.

Green Globe.

Globe Artichoke Heads

CARDOON

This vegetable is grown for its edible midrib, and must be blanched in the same manner as Celery. The seed should be sown in the spring where the plants are to remain in drills 3 feet apart, covering the seed about 1 inch. When the plants make a showing thin out to 1 foot apart.

Price, .10 per pkt.

CORN SALAD OR LAMBS' LETTUCE

This is a hardy annual, and in great demand as a salad plant. In France it is preferred, and relished in winter and spring instead of Lettuce, but is not nearly so highly appreciated in America as it deserves. When Endive is scarce Corn Salad is of great service, and for early use should be sown in frames or in boxes and placed in slight heat. For summer use sow on the border or in lines in a sunny spot, amongst the ordinary low-growing vegetables.

Price, .10 per pkt.; .20 per oz.; .75 per ¼ lb.

BEETS

Carters Crimson Ball Beet—A Superior Early and Main Crop Variety

Carters Crimson Ball (*see Photograph*). — Round Beets are of the greatest value on account of earliness. The roots can be lifted during the height of the summer season when salads are in demand, and the fresh taste imparted by the highly coloured slices are preferable to those from stored roots. In *Carters Crimson Ball* all defects have been remedied.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.; 2.50 per lb.

Carters Perfection Beet

We have again reselected our *Perfection* Beet, which is now a perfect and refined root. The best long Beet in cultivation; medium size, rich crimson colour, and splendid flavour; foliage shining and dark. This is a magnificent show variety.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.; 2.50 per lb.

BEETS — *Continued*

Carters Dainty (*see Photograph*). — This is a small-growing variety of more than ordinary merit, and was included in the Champion and First Prize Exhibit of Vegetables (open to the world), Shrewsbury, 1912. It has long, slender roots of a splendid deep crimson colour and of the finest flavour. The name *Dainty* conveys the extremely refined quality of this variety.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.; 2.50 per lb.

CARTERS SELECTED STOCK; Crosby's Egyptian. —

This well-known beet is recognized by beet growers in general as the standard of the early varieties. The roots run very uniform in size and shape, the flesh being a rich red in colour and very sweet.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.; 3.00 per lb.

Swiss Chard. — An improved type of a delicious vegetable, in reality a Beet in which cultivation has developed the leaves instead of the root. It is sown at the same season as Beetroot in April, in rows about 18 inches apart, and the plants thinned out to 12 inches apart.

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.; 1.50 per lb.

	Pkt.	Oz.	$\frac{1}{4}$ lb.	1 lb.
Carters Blood Red. — A very fine variety, with well-shaped roots of splendid deep colour and of good flavour10	.25	.75	2.50
Carters Improved Dark Red. — Excellent quality10	.25	.75	2.50
Edmand's Early Blood. — A fine, dark Beet for main and late crops10	.20	.50	1.75
Egyptian Turnip-Rooted. — Good stock; useful for shallow soils10	.20	.60	2.00
Spinach (edible-leaved). — Leaves thrown up in profusion, and largely used as a substitute for Spinach10	.20	.60	2.00
Cheltenham Green Top. — Green leaves, with fine bright red roots10	.20	.60	2.00
Carters Long Red. — Rich in colour and flavour10	.15	.40	1.50
Carters Round. — A good early Beet10	.15	.40	1.50

Gentlemen: — Please allow me to inform you that at the Annual Fair which is held here every year I was fortunate enough to win 14 prizes in the vegetable classes, 12 first and 2 seconds, all from your seed. We had some of the finest beets and onions ever raised in this section, and will certainly continue to use your seeds. Yours truly, E. J. GARDENER, South Weymouth.

Carters Dainty

The Cultivation of Beets. — The seed should be sown from as soon as the ground can be worked in spring until July 1st, in soil that has been well trenched and manured. Let the rows be about 18 inches apart, thin them to allow about 9 inches between the plants, and keep the soil well cultivated during the summer. One ounce of seed will sow 50 feet of drill, 5 to 6 pounds per acre.

For full details on Carters Special Box of Vegetable Seed and Flower Collections *see page 78.*

MANGEL WURZEL BEETS

Harvesting Mangels at our Trial Grounds

Carters Improved Mammoth Long Red. — The largest and most productive of all the long red sorts. It is smooth skinned and fine grained, and very regular in size. During the very dry summer of 1911 this variety did particularly well on all soils when shallower-rooted varieties mostly failed. Price, .10 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Carters Red Emperor. — A heavy cropping intermediate variety, with high feeding value, density of flesh, digestible solids, and keeping qualities. Its rich, solid flesh renders Carters Red Emperor a valuable mangel for fat stock raisers who require the maximum bulk of feed with the maximum of digestive food solids.

Price, .10 per oz.; .30 per $\frac{1}{4}$ lb.; .80 per lb.

Carters Red Windsor. — This is a new variety which was first introduced by us in 1910. It has exceeded the expectations we first formed as to its advantages. Carters Red Windsor is the result of more than ten years' careful breeding and selection, and the root embodies all the qualities of the Red Globe, with the size and producing powers of the Yellow Globe. On light, medium soils this variety produces heavy crops suitable for keeping and feeding.

Price, .10 per oz.; .30 per $\frac{1}{4}$ lb.; .80 per lb.

MANGEL WURZEL BEETS — *Continued*

Carters Dreadnought Mangel

Carters Dreadnought. — This is a fine type of the intermediate oval-shaped Yellow Mangel, possessing a small top and fine shoulder. It withstands the drought, and from its peculiar habit this variety may be set closer in rows than other sorts of Mangel.

Price, .10 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Carters Yellow Windsor. — A big improvement on any of the yellow-fleshed globe mangels. It grows such a clean root, free from fangs, and with a small top, that the crop is easily pulled. This Mangel is capable of producing from 90 to 120 tons per acre. We recommend it as the best all-round variety where only one sort is grown.

Price, .10 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Long Yellow. — Similar to Long Red, except in colour.

Price, .10 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Golden Tankard. — A bright-yellow fleshed intermediate sort.

Price, .10 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

SUGAR BEETS

Carters Improved White Sugar Beet. — A superior variety of the Continental Sugar Beet.

Price, .10 per oz.; .20 per $\frac{1}{4}$ lb.; .60 per lb.

Klein Wanzleben. — For the production of sugar or for cattle feeding this variety stands unsurpassed.

Price, .10 per oz.; .20 per $\frac{1}{4}$ lb.; .60 per lb.

ENGLISH BEANS

Carters New Colossal Windsor Bean

Carters New Colossal Windsor Bean. — This immense Bean is, both in pod and seed, by far the largest Broad Bean ever raised. It was selected at our trial grounds, being the result of a cross made in 1905 between the old-fashioned *Harlington Windsor* and *Carters Leviathan*, and is a certain prize-winner of great size.

Price, .10 per pkt.; .35 per pt.; .65 per qt.

“‘**Carters New Colossal Windsor Bean**’ is an immense bean, quite the largest that we have ever grown, and not only large, but a very heavy cropper, with fine strong sturdy stalks.” — Mr. W. A. COOK.

“Your ‘**New Colossal Windsor Bean**’ is easily the finest Bean on the market, pods unusually long and the crop prodigious. Those who have a preference for the Windsors will hail this newcomer with much satisfaction.” — Mr. W. STRUGNELL.

Broad Windsor. — A superior variety for general use, large and productive, bushy habit and well podded from top to bottom.

Price, .10 per pkt.; .20 per pt.; .35 per qt.

Cultivation of English Broad Beans. — Plant in the spring as early as the ground can be worked, in rows 3 feet apart. Plant the seed 5 inches in depth and allow about 4 inches between each seed. As the young plants grow top each one, thereby preventing too much running to vine.

BEANS—DWARF OR BUSH

Cultivation of Bush Beans. — Seed can be planted from the beginning of May until August, but not until the soil becomes sufficiently warm, as they are particularly sensitive to cold. Plant in drills 18 inches apart, covering the seed about 2 inches. Keep the soil well cultivated, using care to do so only at times when it is quite dry, as earth scattered on moist foliage creates rust.

French Beans for forcing may be sown in pots under glass from December to April or in the open ground from May 15th on through to August 1st. These plants should be thinned to about 1 foot apart. One quart of Bush Beans will plant 100 feet of drill.

BEANS — DWARF OR BUSH

Carters Perpetual Dwarf French Bean (AWARD OF MERIT, R. H. S.)

This remarkable bean is strongly recommended as being in every way a great acquisition; it is of very compact growth, the foliage is an attractive dark green, and the pods are of medium size; the most important feature is the prolonged period this variety continues to bear, and its remarkable quality for withstanding hot and dry seasons. Price, .65 per pt.; .25 per pkt.

"*Carters Perpetual Dwarf* and *Carters Sunrise* were simply marvels of cropping quantities and staying powers. I cannot conceive anything better than these being possible." — Mr. F. W. Church, Gardener to E. S. Hanbury, Esq.

Carters Stringless Dwarf French Bean, Holborn Wonder. — The great success which has attended our introduction of the first stringless Green-podded Bean has encouraged us to pursue our efforts in selecting stringless Beans for general use. Our *Holborn Wonder* will be found to be free from threads, is quite distinct and very prolific, and we confidently recommend it.

Price, .85 per qt.; .50 per pt.; .25 per pkt.

BEANS, DWARF OR BUSH (Green Podded)

Carters Magpie (the new long-standing variety) (see Photograph).— This remarkable

NOVELTY ably fine Dwarf Bean, which has attracted such favourable attention in our trials at Raynes Park for the past three seasons, was raised in France by an expert grower, who considered it the finest Bean of its class, producing heavy crops when other varieties are damaged or fail. It is also an **excellent forcer**. We most strongly recommend this introduction. Price, .60 per ½ pt.; .25 per pkt. Stock limited.

Carters Stringless Dwarf French Bean, Canadian Glory.— An *Extra Early* Dwarf Green-podded French Bean, possessing the invaluable quality of bearing pods absolutely without strings or threads. It is equally valuable eaten as a *Flageolet* or *Haricot*.

Price, .85 per qt.; .50 per pt.; .25 per pkt.

Carters Canadian Wonder.— We were one of the first to make the merits of this fine dwarf Bean known and its popularity today is probably unequalled. Our stock is the finest obtainable, and produces an abundance of very long, fleshy pods, making it a great favourite.

Price, .50 per qt.; .30 per pt.; .10 per pkt.

Carters Longsword, Reselected.— This variety improved and reselected, and as now offered is one of the largest podded French Beans on the market; pods, produced in great profusion, are of remarkable length and substance. Exhibitors should grow this variety where space is not limited; it is a certain prize-winner.

Price, .75 per qt.; .40 per pt.; .10 per pkt.

Carters Dwarf Horticultural.— A distinct improvement on the old Horticultural Bean and wonderfully productive.

Price, .35 per qt.; .25 per pt.; .10 per pkt.

Stringless Green Pod.— Absolutely stringless and very early. Very crisp and tender.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Bountiful.— A six weeks' bean with a flat pod. Very prolific. Stringless and extra early.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

Black Valentine.— A standard sort, pods long, round, and straight; a good market variety.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Ne Plus Ultra.— Good for general use and a general favourite.

Price, .40 per qt.; .25 per pt.; .10 per pkt.

Early Mohawk.— Very early and hardy. Flat podded variety of excellent quality.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

The New Long-Standing Variety, Carters Magpie

BEANS, DWARF OR BUSH (Green Podded)—Continued

Carters Sunrise

Carters Sunrise Dwarf French Bean — (see Photograph). For forcing or outdoors. **NOVELTY** A distinct and valuable first early, the result of a cross between *Ne Plus Ultra* and *Carters Perpetual*. *Carters Sunrise* is a most valuable addition, possessing the good forcing qualities of the *Ne Plus Ultra*, but a much better cropper, producing larger and superior pods; very early.

Price, .60 per $\frac{1}{2}$ pt.; .25 per pkt.
Stock very limited.

Goddard or Boston Favourite. — A snap Bean when young and a good shell bean later.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

Red Kidney. — The old-fashioned baking bean; excellent also as a shell bean.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

Prolific Tree Pea Bean. — A small, white baking variety known as the white Pea bean. Very productive.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

Low's Champion. — A large, flat, stringless bean, used as a snap or a shell bean. This bean is otherwise known as the Dwarf Red Cranberry.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Refugee or 1,000 to 1. — A late planting variety, with large, handsome, tender pods; the best for pickling.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

Improved Yellow Eye. — Extremely productive and is profitable as a field bean and extensively used as a baking bean.

Price, .30 per qt.; .20 per pt.; .10 per pkt.

WAX-PODDED OR BUTTER VARIETIES

Improved Prolific Black Wax. — A perfectly stringless, round, thick podded bean of excellent flavour.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Davis Kidney Wax. — A very hardy, well-shaped, tender, white-seeded bean. A great favourite.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Hodson Wax. — One of the best all round garden varieties, tender and stringless.

Price, .40 per qt.; .25 per pt.; .10 per pkt.

Improved Rust-Proof Golden Wax. — A remarkably productive bean, practically free from rust. This variety is perhaps the most popular sort in cultivation. The crop of long, golden-yellow, fleshy-podded beans is very gratifying to any raiser. We have great confidence in recommending this bean.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Wardwell's Kidney Wax. — This is an early, long, flat-podded variety of excellent quality. It is stringless and brittle, and will produce a very heavy crop.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Stringless White Wax. — A great improvement over the old White Wax Beans, as it is perfectly stringless and does not rust easily; the pods are a clear waxy white, of medium size.

Price, .40 per qt.; .25 per pt.; .10 per pkt.

BEANS, DWARF OR BUSH LIMA

Cultivation of Bush Lima Beans. — Select soil that is warm, rich, and well supplied with vegetable matter or humus. Plant as early as soil can be worked in the spring. Prepare the rows 2 feet apart and allow each plant a space of 6 inches in the row. As these beans are very slothful in growth a top-dressing of well-rotted manure or some good fertilizer or compost around the plants will aid greatly in hastening maturity, besides increasing the yield.

Dreer's Bush Lima. — A dwarf form of Dreer's Pole Lima Bean, and it possesses every good feature of that well-known variety. They grow close together in the pods, producing four to five sweet, succulent beans to the pod.

Price, .50 per qt.; .30 per pt.; .10 per pkt.

Fordhook Bush Lima. — A perfect bush Lima bean, of a strong, upright growth, protecting the pods from contact with the soil, thus preventing rust and rot. Considered superior to any other variety.

Price, .50 per qt.; .30 per pt.; .10 per pkt.

Burpee's Bush Lima. — A dwarf form of the Large White Lima. Very early and of good quality.

Price, .40 per qt.; .25 per pt.; .10 per pkt.

Henderson's Bush Lima. — Exceedingly productive. Valuable also for the fact that it matures two or three weeks earlier than any of the other varieties of Lima bean.

Price, .40 per qt.; .25 per pt.; .10 per pkt.

POLE LIMA BEANS

FOR DIRECTIONS OF CULTIVATION FOLLOW THOSE OF POLE BEANS

Dreer's Improved. — An early variety of excellent qualities and great productiveness.

Price .50 per qt.; .30 per pt.; .10 per pkt.

Large White. — It is considered one of the most tender and delicious beans grown.

Price .40 per qt.; .25 per pt.; .10 per pkt.

King of the Garden. — A vigorous grower, bearing large pods varying in length from 5 to 6 inches.

Price .40 per qt.; .25 per pt.; .10 per pkt.

Sieva or Small Lima. — A very productive and hardy bean, the earliest of the pole Limas.

Price .35 per qt.; .20 per pt.; .10 per pkt.

POLE BEANS

Cultivation of Pole Beans. — Pole beans, especially Lima beans, show better results from a warm and very rich, loamy soil. The seed should be planted when the soil has become thoroughly warmed through in the spring. Should the ground be cold or soggy, the seed will rot. Poles from 5 to 8 feet in length should be set in rows 4 feet apart and 3½ to 4 feet between the poles. Plant four to six beans around each pole, and as the plants make a showing thin out to three plants to the pole. Cultivate freely, and if possible top-dress around each hill with a quantity of well-rotted manure compost or some good fertilizer. When hoeing, work this dressing well into the soil. Sprouted Lima beans transplant easily. Climbing varieties of French beans may be sown under glass whenever desired, in pots large enough to allow staking. Be cautious in sowing the French varieties out of doors until quite sure that the warm season is well established. One quart of pole beans will plant two hundred hills. One quart of pole Lima beans will plant but one hundred hills.

WAX-PODDED VARIETIES

Carters Golden Cluster. — This is a wonderful improvement on the ordinary Golden Cluster bean, and it produces a surprisingly wonderful growth of long, yellow, fleshy pods, which hang in clusters. The vine continues to bear for a long time. It is an early variety.

Price .60 per qt.; .35 per pt.; .15 per pkt.

Golden Cluster American Variety. — This variety produces an abundance of clear, golden pods of long duration, always tender. Price .50 per qt.; .30 per pt.; .10 per pkt.

Mont d'Or or Golden Butter. — This is perhaps the earliest Wax Pole Bean grown, and the result shows a vigorous growth of plump, meaty pods, 6 to 8 inches in length.

Price .40 per qt.; .25 per pt.; .10 per pkt.

Indian Chief or Black Wax Pole Beans. — A long, white, stringless bean. Very popular.

Price .40 per qt.; .25 per pt.; .10 per pkt.

Carters July Climbing French Bean Photographed in our Trial Grounds, Raynes Park

POLE BEANS (Green Podded)

Carters July Climbing French Bean (with Stringless Pods). —

When we brought this variety to our customer's notice we recommended it strongly. We have no reason to alter the opinion expressed then. It bears pods so freely that we have counted as many as forty on a stalk. It holds well to the sticks and is the earliest bean we know. The Royal Horticultural Society says: "*Carter's July Climbing French Bean*. Flower white, height 3 feet, foliage dark green; pods long, thin, straight, averaging 6 inches in length, usually in pairs; good crop; pods stringless."

Price .65 per qt.; .35 per pt.; .10 per pkt.

Carters Reselected Climbing French Beans. — A highly selected stock, being more prolific and of very robust habit.

Price, .65 per qt.; .35 per pt.; .10 per pkt.

Carters Jubilee Runner. — This extraordinary Bean still remains one of the best. *Carters Jubilee Runner* produces an enormous crop of immense pods, which are thick and unusually fleshy, the flavour being all that is desired. One hundred and nineteen First Prizes reported by customers.

"I had a pint of *Jubilee Runner* Beans from you last year, and I must say I never had Runners yield like them. They hung in bunches like grapes, and lasted so long."—Mr. W. K. SAUNDERS.

Price, .50 per qt.; .30 per pt.; .15 per pkt.

Kentucky Wonder or Old Homestead. — A long, green-podded sort. The vines make a very vigorous growth and produce quantities of large pods which grow in great clusters and are of fine quality.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Dutch Case Knife. — Very productive, and produce a fine bean to be used either green or dry.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Horticultural or Speckled Cranberry. — The best pole shell bean grown, although it can also be used as a snap bean. It has a pale-green pod, but becomes streaked with red when mature.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Scarlet Runner. — This bean is mostly used as an ornamental climber, but is edible and can be used as a green or a shell bean.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

Lazy Wife. — An excellent flavoured, white-seeded bean. It is a late sort and is one of the largest pole beans raised.

Price, .35 per qt.; .20 per pt.; .10 per pkt.

BORECOLE OR KALE

Carters
Exhibit of
Kales, etc. (from
Trials at Raynes Park),
Royal Horticultural Society's Hall,
Nov. 19, 1912, awarded silver Banksian
Medal. Carters Russian Kale, top left-hand corner

Carters Russian Kale (*Chou de Russie*)

Award of Merit and First-Class Certificate after trial at Wisley

The only novel variety of Kale in the trial considered worthy of the award. No other Kale in the whole trial of fifty-four stocks received the First-Class Certificate.

This distinct and extremely hardy variety stood the exceptionally severe winter better than any other variety grown; the leaves are very curious, in form somewhat resembling a deer's antler, of singularly thick substance, and of a peculiarly green colour.

Price, .25 per pkt.

The Right Hon. Viscount Middleton's Head Gardener says: "Foliage of a dark-green nature, short and sturdy, producing large quantities of sprouts, when cooked are delicious. It stands the winter better than most of the better known kales, and should be grown everywhere." — Mr. QUAINTON.

Carters Welsh Kale

A hardy variety of very handsome appearance; of medium height, the leaves are long and densely curled, but are more narrow than our *Half Tall Scotch* variety. The flavour is particularly good.

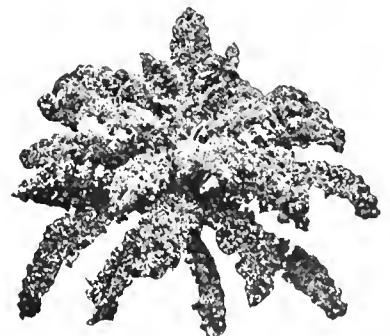

Price, .25 per pkt.

Carters Half Tall Scotch Kale

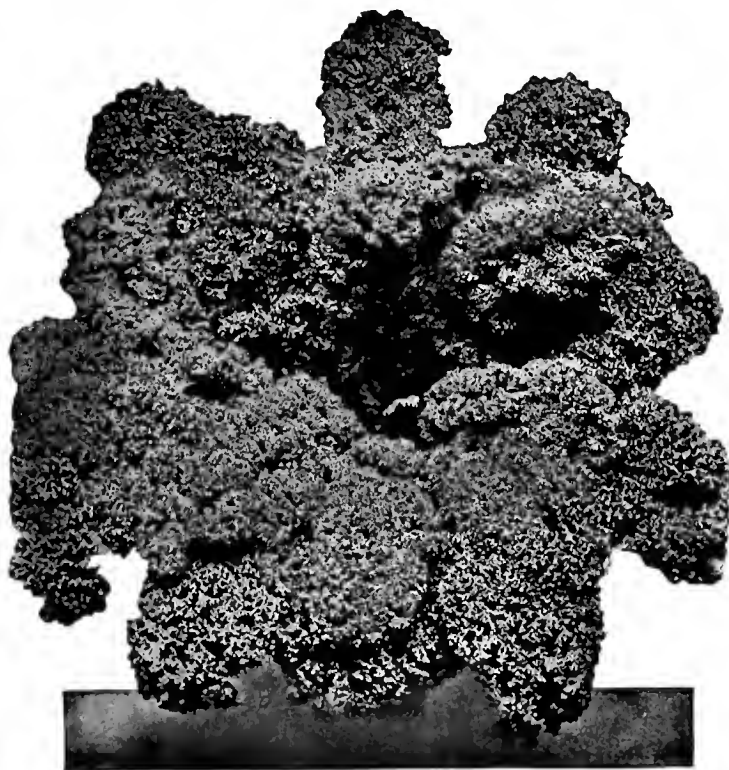

A fitting companion to our well-known *Dwarf Extra Curled* type. The leaves are very dense and moss curled. Stand the coldest weather, and the greater the frost the more delicate the leaves.

Price, .10 per pkt.; .25 per oz.; .75 per 1¼ lb.; 2.50 per lb.

Dwarf Green Curled.—For general use. Price, .10 per pkt.; .20 per oz.

Carters Welsh Kale

Carters Dwarf Extra Curled Kale

Carters Dwarf Extra Curled Kale (*see Photograph*).—Award of Merit, R.H.S. A reselected and crested form of Early Kale. Will resist the most intense frost, and makes a delicious winter dish.

Price, .10 per pkt.; .35 per oz.; 1.00 per $\frac{1}{4}$ lb.; 3.00 per lb.

Carters Mammoth Tall Scotch Kale.—A very robust variety, suitable for large establishments where quantities of winter greenstuffs are needed.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.; 2.50 per lb.

Carters Purple Plume Kale.—Leaves of a rich purple, very tall and handsome; a useful vegetable as a winter dish or for garnishing.

Price, .10 per pkt.; .35 per oz.; 1.00 per $\frac{1}{4}$ lb.; 3.00 per lb.

Asparagus Kale.—The long thin shoots produced on the plant in early spring make a delicious dish.

Price, .10 per pkt.; .50 per oz.; 1.50 per $\frac{1}{4}$ lb.; 3.50 per lb.

Carters Curled.—Dwarf; superbly curled
Price, .10 per pkt.; .20 per oz.

Carters Tall Green Curled.—Densely curled.

Price, .10 per pkt.; .20 per oz.

Carters Drumhead Kale (*see Photograph*).—A valuable winter vegetable, with a solid cabbage-like head. Quite delicious when cooked. We received an Award of Merit from the Royal Horticultural Society for this Kale.

"Quite distinct from any other Kale here. The leaves are broad and it is now hearting like a *Drumhead* Cabbage." — Mr. J. WHYTECK, Head Gardener to His Grace the Duke of Buccleuch.

Price, .10 per pkt.; .35 per oz.; 1.00 per $\frac{1}{4}$ lb.; 3.00 per lb.

The Cultivation of Kale.—Sow the seed early in the spring, covering the seeds thinly and evenly. Transplant in June and cultivate the same as cabbage, leaving a space of 2 feet between the plants. For an early spring crop plant seed in September and protect with straw during winter. One ounce of seed will produce five thousand plants.

BROCCOLI

Veitch's Self Protecting.—Early variety, with good hearting quality.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

White Cape.—Similar to Purple Cape, but of a creamy-white colour.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

The Cultivation of Broccoli.—This vegetable resembles cauliflower, and is much hardier. The seed should be planted in hotbeds during March and April for an early crop. Transplant during May or June in rows 3 to 4 feet apart and the plants about 2 feet apart in the row. For a late crop sow in June in hills or beds, covering seed to the depth of $\frac{1}{2}$ inch. A good, deep, well-manured soil is required for success. One ounce of seed will produce about two thousand plants.

Carters Drumhead Kale

BRUSSELS SPROUTS

Carters Perfection Brussels Sprouts (*see Photograph*). — Perfection in every way. A standard variety for general use, producing large and firm sprouts in great abundance. As a late Sprout it is much appreciated. It is a taller-growing variety than our Exhibition strain.

Price, .10 per pkt.; .40 per oz.;
1.50 per $\frac{1}{4}$ lb.

Carters Holborn Exhibition Brussels Sprouts. — A very fine strain, the result of many years' careful selection. Its points for size, colour, and productiveness are good all round. It is a special favourite with our best growers. It is of medium height, with large, solid sprouts.

Price, .10 per pkt.; .50 per oz.;
1.75 per $\frac{1}{4}$ lb.

"I am very pleased to say that your *Holborn Exhibition* Brussels Sprouts I got from you last year were the best I have ever had. They were large sprouts from top to the bottom." — Mr. G. CARR.

THE ROYAL HORTICULTURAL SOCIETY'S report reads: — "*Carters New Exhibition*. Plants 2 feet high, sturdy, producing a mass of medium-sized hard sprouts from base to crown."

Aigburth. — Medium height; Sprouts of good size and colour.

Price, .10 per pkt.; .25 per oz.;
.90 per $\frac{1}{4}$ lb.

Carters Fresh Imported. — Small, close, compact Sprouts.

Price, .10 per pkt.; .20 per oz.;
.75 per $\frac{1}{4}$ lb.

The Cultivation of Brussels Sprouts. — Sow the seed early in May, in seed beds, and the plants afterwards can be transplanted into rows about 2 feet apart and cultivated like Cabbage. The crop will be ready for use in the late autumn after the early frosts. One ounce of seed will produce fifteen hundred plants.

TO WHOM IT MAY CONCERN

It may please you to know that we are continually in touch with gardeners, estate superintendents, greenkeepers, and golf professionals of excellent character and ability, who through our office prefer to make a change in their situation. Any services which we can render you in this connection are at your disposal and without charge to any concerned.

CARTERS TESTED SEEDS, Inc.

Carters Perfection Brussels Sprouts

CARTERS SELECTED CABBAGES

Carters Early Heartwell

Carters Early Heartwell (*see Photograph*). — An early maturing Cabbage of refined quality and delicate flavour; without doubt one of the best varieties in cultivation. Included in our Large Gold Medal Exhibit, Shrewsbury, 1912.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Carters Springtide. — A dwarf variety, maturing very early in the summer. The hearts are of perfect form and flavour.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Carters Pioneer

Carters Summer (*see Photograph*). — One of the largest headed varieties; very white heart, flavour mild, a second early sort.

Price, .10 per pkt.; .30 per oz.; 1.00 per $\frac{1}{4}$ lb.

Carters Pioneer (*see Photograph*). — A valuable main crop Cabbage, rather larger than our *Springtide*, maturing a few weeks later and forming a valuable succession to that variety. An excellent type.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Copenhagen Market. — This sort is the earliest and largest of any ball or round head type grown. The heads weigh 10 to 12 lbs. and are very solid and of excellent quality. We heartily recommend this type to those contemplating the growth of an early cabbage.

Price, .15 per pkt.; 1.00 per oz.; 3.50 per $\frac{1}{4}$ lb.

Carters Model. — As a succession to *Carters Heartwell* this is a useful variety. Its heads are firm and compact, and come close to the ground.

Price, .10 per pkt.; .30 per oz.; 1.00 per $\frac{1}{4}$ lb.

Early Jersey Wakefield. — An early conical-shaped cabbage of fine quality; very popular	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
	.10	.35	1.20

Carters Early York. — Of dwarf, compact habit, small heads, and quick growth	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
	.10	.30	1.00

Carters Summer

CABBAGE — *Continued*

Carters Mammoth Beefheart Cabbage (*see Photograph*).—

The finest medium Late Cabbage grown. It is some years since we introduced this variety, but each season it becomes more popular, and we confidently recommend it as being not only the largest, but one with the least tendency to bolt.

Price, **.10** per pkt.; **.40** per oz.;
1.50 per $\frac{1}{4}$ lb.

Warren's Stone-Mason. — A popular variety in this vicinity. The heads are very large and round and slightly flattened, very solid and crisp, with a fine flavour. As a keeper it cannot be surpassed.

Price, **.10** per pkt.; **.50** per oz.;
1.75 per $\frac{1}{4}$ lb.

Carters Mammoth Beefheart

Danish Ball Head. — An extra hard heading variety originated in Denmark. It is a medium-late sort, but is sown mostly for winter use, because of its fine keeping qualities.

Price, **.10** per pkt.; **.40** per oz.; **1.50** per $\frac{1}{4}$ lb.

Carters Red Pickling

Carters Red Pickling (*see Photograph*).—This is the most perfect type of Red Cabbage; the heads being very hard, compact, of a rich, deep crimson, the colour also of the outer leaves being much darker than any other variety we know; we feel confident it will speedily displace the older sorts.

Price, **.10** per pkt.; **.40** per oz.;
1.50 per $\frac{1}{4}$ lb.

The Cultivation of Cabbage. — For plants of the early varieties sow the seed in January or February, under glass, and prick out into flats or frames about 2 inches apart each way. Transplant to the open ground as soon in the spring as the land can be properly prepared. The plants should be placed from 18 to 24 inches apart in rows which should be at least 2 feet apart. They should be kept well cultivated and during drought should be thoroughly irrigated if this is possible. The plants do best in a rich, warm, fibrous soil. The seed of the late Cabbage should be sown in drills in the open ground during April and May and transplanted in June or July, leaving more room between the plants than was allowed for the early sorts. One ounce of Cabbage seed will produce about three thousand heads. Four ounces will plant an acre.

CABBAGE—Continued

Carters White Prizetaker. — A good variety with short leaves and white heart; strongly recommended for either medium or late use; flavour exceptionally mild and melting.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Christmas Drumhead. — A small, solid-headed variety, largely grown by market gardeners.

Price, .10 per pkt.; .30 per oz.; 1.00 per $\frac{1}{4}$ lb.

Cartercone

SAVOY CABBAGE

Chou de Milan, Colewort, Couve Tronchuda

Cartercone (*see Photograph*).—This small, perfectly shaped Savoy was very favourably commented upon when included in our exhibit of Brassicas at the Royal Horticultural Society's Hall last autumn, and the Vegetable Committee recommended it for further trial at Wisley. The heart is a perfect cone in shape, whilst its absolute freedom from coarseness ensures its success for table use.

Price, .25 per pkt.; .40 per oz.

Carters Giant Green Savoy (*see Photograph*). — An improved type with crimped foliage; the leaves are large, but retain their tender properties longer than any other variety.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Carters Early Dwarf Ulm. — A fine reselected stock of this popular Savoy. Extremely early, good flavoured, and very hardy.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Matchless. — Still popular on account of good hearting properties and flavour10	.25	.90
Large Imperial Oxheart. — Very hard headed and close variety10	.15	.50
Carters Drumhead. —Good stock; large hearting variety10	.20	.75
Chou de Milan "Imperial." —Italian Cabbage10	.15	.50
Dwarf Green Curled. —Very compact and hardy; one of the best for general use10	.25	.90

Colewort and Couve Tronchuda

Carters Hardy Green. —Valuable for autumn sowing10	.25	.90
Couve, Tronchuda, Portugal, or Sea Kale Cabbage. —The thick, fleshy midribs of the largest leaves are sometimes used and prepared in the same manner as Sea Kale10	.20	.75

Carters Giant Green

CARROTS

Carters Summer Favourite (*see Photograph*). —

Awarded Royal Horticultural Society's Silver Medal, and included in the Large Gold Medal Exhibit, Shrewsbury, 1912. A splendid half-long, producing handsome, well-grown, bright cochineal-scarlet Carrots very early in the season. The quality is superb, and as an exhibition variety will be found invaluable for showing in the summer months.

Price, .10 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Golden Ball. — A most distinct and very early variety, specially adapted for forcing and frame work. The roots are almost as round as a turnip, flavour excellent and melting. Awarded First Prize as the best early Carrot, R.H.S.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

Carters Early Scarlet Horn. — A highly selected stock, of bright-scarlet colour, one of the most useful in this section.

Price, .10 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Early Market. — Fine early variety of good colour, quick in growth, valuable alike for market gardeners or private use.

Price, .10 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Improved Early Horn. — A perfect type of stump-rooted Carrot, of excellent flavour.

Price .10 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Summer Favourite Carrot

Carters Long Forcing. — A handsome long Carrot, with the same depth of colour and firmness of texture in its earliest stages as other Carrots possess in their later growths.

Price, .10 per pkt.; .40 per oz.; 1.50 per $\frac{1}{4}$ lb.

OTHER EARLY VARIETIES

Nantes, stump-rooted. — A medium-sized midseason variety of excellent quality.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.

A great many varieties of both vegetable and flower seeds not listed in this catalogue are carried in stock and can be supplied on request.

CARROTS—*Continued*

Carters Red Elephant (*see Photograph*).—A veritable giant both in length and rotundity. Specimens have been exhibited at our establishment measuring two feet in length. It has been brought to this high standard of perfection by one of the best professional gardeners, from whom we originally acquired the whole stock. A remarkable variety, and already become prominent in first-class gardens and on the exhibition table.

Included in the Champion and First Prize Exhibit of Vegetables (open to the World), and the Large Gold Medal Exhibit, Shrewsbury, 1912

Price, **.10** per pkt.; **.35** per oz.; **1.25** per $\frac{1}{4}$ lb.

Carters Scarlet Perfection.—Awarded a Special Certificate of Merit at the Vegetable Conference of the Royal Horticultural Society, included in the Champion Exhibit of Vegetables (open to the world), Shrewsbury, 1912. A distinct and greatly improved form of Garden Carrot. It is midway in length between the *Long Surrey* and the well-known *Intermediate*. The flesh is solid, crisp, and fine flavoured; colour scarlet. Invaluable alike for table, exhibition, and market purposes.

Price, **.10** per pkt.; **.35** per oz.; **1.25** per $\frac{1}{4}$ lb.

"I have pulled up *Scarlet Perfection* Carrot in thinning out the bed over a pound in weight, straight as a dart and tender as butter."—E. J. CRAWSHAW.

Carters Blood Red.—This Carrot is quite distinct, and has many good and new qualities. It has a depth of colour not hitherto seen in Carrots, the texture of its flesh, while solid and crisp, is most tender. It has handsome long roots.

Price, **.15** per pkt.; **.50** per oz.; **1.75** per $\frac{1}{4}$ lb.

Carters Reselected Danvers Half Long.—This superior strain of seed is the result of years of careful study and by rigorous selection under the well-known "Carter" method. All roots intended to be grown on for seed production are specially cultivated on our farms, and suitable roots are selected by our expert. By continual reselection we are this spring able to offer to our customers the heaviest cropping, best sized and shaped strain of the Danvers Half Long Carrot ever placed before the public.

Price, **.10** per pkt.; **.25** per oz.; **.75** per $\frac{1}{4}$ lb.; **2.50** per lb.

Per pkt. Per oz. Per $\frac{1}{4}$ lb.

Carters Selected Intermediate.—The best type of *Intermediate* .10 .30 1.00

Carters Long Scarlet.—Splendid long stock of good colour .10 .20 .70

Carters Orange Giant.—Yellow carrot of large size10 .20 .70

Cultivation of Carrots.—This vegetable does its best in a warm, deep, rather light, and fairly fertile soil that is well supplied with humus. Sow the seed from April to July in drills 1 foot apart, covering the seed half an inch in depth. As the young plants appear thin out to from 3 to 5 inches apart, according to the size of the expected variety. Keep the soil well cultivated, as weeds are a sure death to young carrot plants. Keep irrigated during droughts if it be possible. One ounce of seed will plant 100 feet of drill, 3 to 4 lbs. to the acre.

Carrot, Carters Red Elephant

CAULIFLOWER

Carters Forerunner (*see Photograph*)

The quickest Cauliflower ever grown.
Ten days earlier than others.

Large, white head, solid, and good size. A very early, carefully selected strain, a most reliable cropper and with reasonable care will produce beyond the expected. The first heads will be ready by the middle of June. The leaves protect the head from the summer sun. The Royal Horticultural Society, reporting its trials at Wisley, says: "Carters *Early Forerunner*. A very early variety of dwarf, compact habit; sturdy, with rather small, solid, handsome, pure white heads." Included in the First Prize and Champion Exhibit of Vegetables, Shrewsbury, 1912, and also a feature of the Large Gold Medal Exhibit at the same critical meeting.

Price, .25 per pkt.; 4.00 per oz.
12.00 per $\frac{1}{4}$ lb.

WHAT EXPERTS SAY ABOUT IT

"Carters *Forerunner* Cauliflower was sown on February 1st with *Snowball* and another well-known early variety. Planted in the open well-known varieties were near ready."

the third week in April, we commenced to cut compact heads on June 7th. I am much impressed with it, and can congratulate you on it as distinct and valuable." — EDWIN BECKETT, Head Gardener to the Hon. Vierey Gibbs.

Carters Extra Early Autumn Giant. — This magnificent Cauliflower is more dwarf, considerably earlier, and in every respect better than the old *Autumn Giant*. It produces enormous snow-white heads, and is admitted to be the largest and the earliest of the giant forms that are of such value during September and October. We have records of 267 First Prizes having been won by customers.

Price, .25 per pkt.; 2.00 per oz.; 7.00 per $\frac{1}{4}$ lb.

"Carters *Forerunner* Cauliflower is a marvel. I cut fine heads on June 6th, almost like *Autumn Giant*." — Mr. W. HUMPHREY, The Gardens, Loampits.

Carters Early Emperor. — A superb strain for the early summer. A giant Cauliflower for outdoor work, coming in midway between Carters *Forerunner* and Carters *Autumn Giant*. The Royal Horticultural Society's report reads: "Carters *Early Emperor*. Plants dwarf, sturdy, with semi-protecting foliage; heads medium to large in size, firm, and of excellent shape."

Price, .25 per pkt.; 3.50 per oz.; 10.00 per $\frac{1}{4}$ lb.

Carters Defiance Forcing (*see small Photograph*). — This superb variety is, without doubt, one of the finest forcing varieties ever introduced; produces fine solid heads.

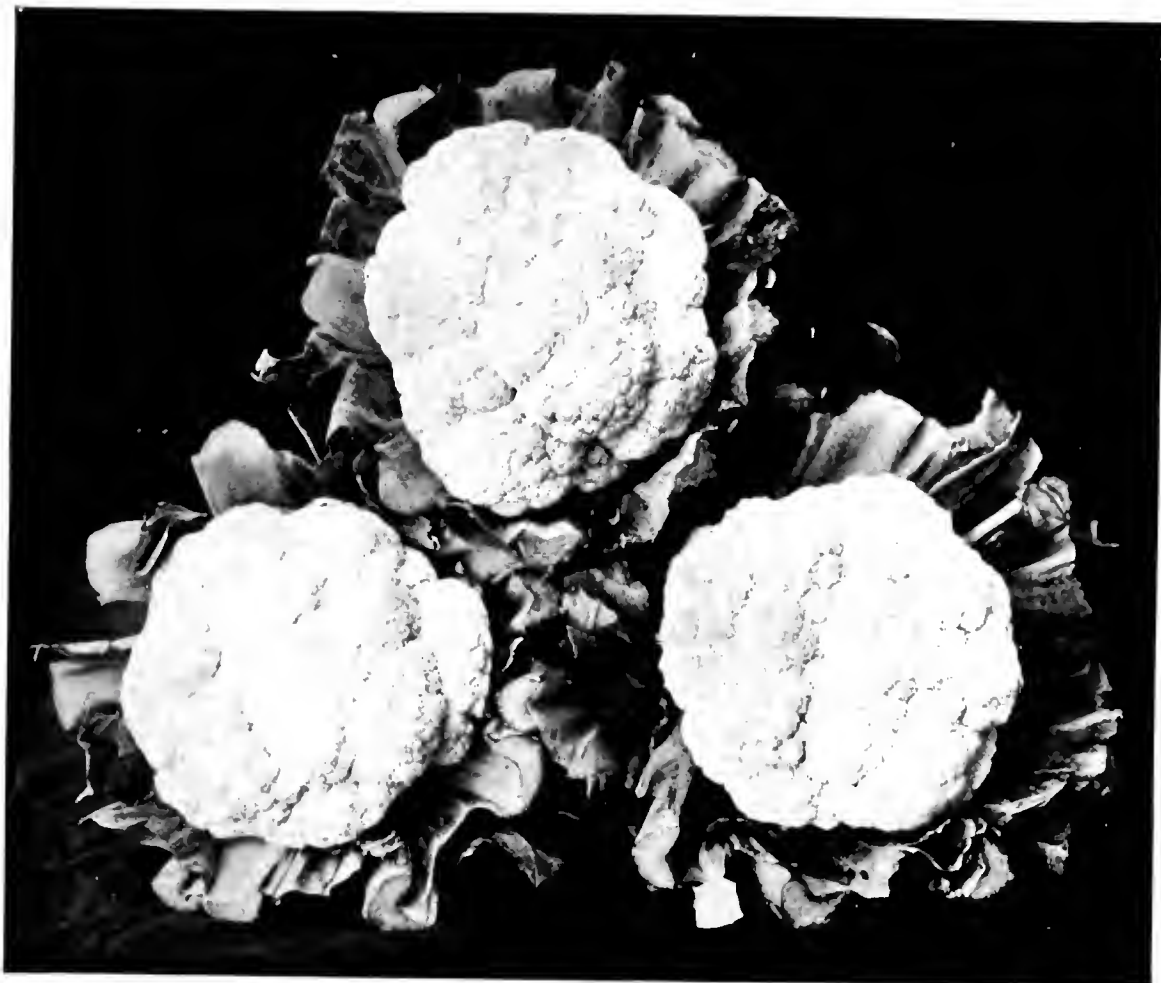

Price, .25 per pkt.; 4.00 per oz.; 12.00 per $\frac{1}{4}$ lb.

Carters Forerunner Cauliflower

Carters Defiance Forcing Cauliflower

Carters Mont Blanc Cauliflower

Carters Mont Blanc (*see Photograph*). — Magnificent snow-white heads, well protected by the leaves; one of the best for soils of heavy or retentive nature.

Price, .25 per pkt.; 2.00 per oz.; 7.00 per $\frac{1}{4}$ lb.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Dwarf Mammoth. — One of the best for early work, producing the largest heads25	1.00	3.00
Early White London. — Useful for general cultivation25	1.00	3.00
First Crop. — Very early, firm white heads25	3.00	10.00
Snowball. — Superb early variety25	3.00	10.00
Autumn Giant. — Well known. One of the most popular Cauliflowers in cultivation, succeeding immediately our <i>Extra Early Autumn Giant</i> ; heads enormous size and fine texture25	1.00	3.00
King of Cauliflowers. — A very fine autumn variety, producing large heads25	1.00	3.00

The Cultivation of Cauliflower. — For the earliest cauliflower sow the seed in hotbeds or greenhouse during February or March and transplant to flats or cold-frames 2 or 3 inches apart each way. Set in the open ground as early in the spring as the ground can be properly worked. Plants should be $2\frac{1}{2}$ feet apart each way. The soil should be warm, very rich, and fibrous, with an abundance of humus and moisture. A copious supply of water during the dry spells, especially during the heading period, will help. For late cauliflower start plants in the open ground and treat as late cabbage. When the heads have formed they should be blanched by drawing the leaves together and tying. One ounce of cauliflower seed will produce three thousand plants.

CELERY

Carters Solid Ivory Celery (*see Photograph*). — Carters *Solid Ivory* Celery is of extreme dwarf compact habit and beautiful white colour. If the heads are tied with raffia it will assist, not only in keeping the celery perfect, but also to exclude superabundant moisture.

We have records of no less than 323 First Prizes awarded this variety during the past few seasons.

Price, .25 per pkt.; 1.00 per oz.; 3.00 per $\frac{1}{4}$ lb.

OTHER WHITE VARIETIES

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Incomparable Dwarf White. — A useful variety; of stiff, compact habit15	.75	2.50

Boston Market. — The finest flavoured variety in cultivation. Blanching pure white, crisp, and solid. A splendid keeper15	.75	2.50
--	-----	-----	------

Carters White Celery. — This is a select stock, producing large heads of good flavour15	.75	2.50
--	-----	-----	------

Golden Self Blanching. — The best early variety, largely grown for early market. Stalks solid and crisp, with a nutty flavour15	.60	2.00
--	-----	-----	------

Henderson's White Plume. — Inner leaves being naturally white little blanching is required10	.50	1.50
---	-----	-----	------

Wright's Grove Giant White. — Large growing variety; of fine juicy flavour10	.50	1.50
---	-----	-----	------

Carters Incomparable Crimson Celery. — A dwarf-growing variety of clean and refined appearance, very crisp, and delicious flavour.

Price, .25 per pkt.; .75 per oz.; 2.50 per $\frac{1}{4}$ lb.

Carters Giant Pink. — A superb variety, specially recommended for exhibition. Heads of this variety formed part of the Champion Exhibit of Vegetables (open to the world), Shrewsbury, 1912. It was greatly admired.

Price, .20 per pkt.; .50 per oz.; 1.50 per $\frac{1}{4}$ lb.

OTHER RED VARIETIES

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Manchester Giant Red. — Large growing; solid and of good colour15	.50	1.50

Wright's Grove Pink. — Medium-sized heads; very crisp; of delicate flavour15	.35	1.25
---	-----	-----	------

Large-Rooted Celeriac or Turnip-Rooted Celery10	.25	.90
--	-----	-----	-----

Solid Ivory Celery

Celery Seed for Flavouring Soups. — Price, .10 per oz.; .50 per lb.

For earliest crop sow in February under glass or on a mild hotbed. Prick out on bottom heat when ready and transfer to trenches in May or June. For main crop sow in March or April, and in June or July when plants are large enough transplant to trenches, preparing the same by bottoming with good rich loam. Water liberally during July and August; earth up gradually during August and September. Lift late in November and for winter storage place upright on damp soil in a cellar or root house. Pack closely. One ounce of seed will produce three thousand plants.

Cress

Mustard

Cress and Mustard Tests grown in
Carters Laboratory

CRESS

	Per pkt.	Per oz.	Per ¼ lb.
Carters "Parsley Curled." — This selection of Curled Garden Cress is comparable with nothing less than a finely Curled Parsley — hence its name; a distinct advance on the Triple Curled	.10	.15	.40
Plain or Common. — For early salads	.10	.15	.40
Curled or Pepper Grass. — Ordinary stock	.10	.15	.40
American or Upland Cress. — A perennial sort with a taste similar to watercress	.10	.20	.75
Watercress	.10	.50	1.50

MUSTARD

	Per oz.	Per ¼ lb.	Per lb.
Carters Finest White. — Very popular for salads	.10	.20	.75
Brown. — Very pungent; the seed largely used for grinding	.10	.20	.75
Chinese. — Black-seeded; fine pungent flavour	.10	.20	.75

Cultivation of Cress and Mustard. — Two of the most popular salad plants in cultivation. Easily grown during the winter on the greenhouse bench, in frames, pots, or boxes. Sow the seed very thickly in rows 3 to 6 inches apart, under glass for summer use; the rows should be 1 foot apart in the open ground. Make successive sowings. Watercress will succeed only in very damp soils on the borders of ponds or streams, or where the roots are partially submerged; seed should be planted a quarter of an inch deep and kept well weeded until the plants make a strong growth. These plants propagate rapidly by root extension and self breeding. One ounce of cress will sow 100 feet of drill, one ounce of mustard 40 feet of drill.

CHICORY

Chicory is a leading ingredient in French salads, and the plant is so easily cultivated that it should be more popular here. The seed is sown in late spring, in a sheltered position on a nice soil, very similar to carrots. Thin out to about 8 inches apart, and grow on until the late autumn, when the growth will die down, leaving a root somewhat like a parsnip. These should be taken into a

shed or cellar and kept in a heap of soil away from frost and light, to be later transferred to a hothouse or forcing pit, when needed to produce their blanched heads during winter.

Large Rooted.

Price, .10 per pkt.;
.25 per oz.; .80 per ¼ lb.

Witloof. — The finest winter salad sort.

Price, .10 per pkt.;
.25 per oz.; .80 per ¼ lb.

CUCUMBER

Forcing or Frame

Carters Model (*see Photograph*) is one of the handsomest Cucumbers grown, embodying the fine form and general characteristics of *Tender and True* with the prolific habit and strong constitution of the *Telegraph*. Perfect in outline, with scarcely any neck, and of fine flavour, popular both for exhibition and table purposes.

Price, .50 per pkt.

Carters Ideal — Raised by that champion cultivator, Mr. E. Beckett, Head Gardener to the Hon. Vicary Gibbs. It is quite an aristocratic variety, both in color, shape, and flavour. Gained a cultural commendation after growth at Wisley.

Price, .50 per pkt.

	Per pkt.
Matchless25

Blue Gown25

Carters Improved Telegraph (*see Photograph on page 28*). — Our highly selected stock is the finest obtainable of this popular variety. Unquestionably one of the best winter cucumbers and a great cropper.

Price, .50 per pkt.

English Forcing or Frame Varieties for winter use must be started under glass early in September, in pots or pans, keeping the seed pans shaded from strong light until the seedlings appear. When established, transplant to the permanent position in hotbeds or greenhouse, in a well-prepared soil, and supply freely with lukewarm water and light, liquid manures.

Carters Model Cucumber

CUCUMBER — *Continued*

Carters Improved Telegraph

Improved Early White Spine. — An excellent variety, which produces an early crop of crisp, tender, well-flavoured cucumbers. They are a light green in colour, with white spines of medium size. A great favourite.
 Price, **.10** per pkt.; **.20** per oz.; **1.25** per lb.

Arlington White Spine. — A strain of White Spine that has been improved through careful selection with a view of use for starting in hothouses and frames.
 Price, **.10** per pkt.; **.25** per oz.; **1.50** per lb.

Japanese Climbing. — Can be grown on a trellis for decoration; very prolific.
 Price, **.10** per pkt.; **.30** per oz.; **3.00** per lb.

Improved Long Green. — This is a late sort, of great length, and the fruit is very crisp and tender.
 Price, **.10** per pkt.; **.20** per oz.; **1.25** per lb.

Carters Outdoor Cucumber. — The longest hardy Cucumber. Fruit of a good shape and colour, and of fine flavour.
 Price, **.25** per pkt.; **.50** per oz.; **1.50** per $\frac{1}{4}$ lb.

Davis Perfect. — Excellent variety of good habit. Colour dark green; 10 to 12 inches long.
 Price, **.10** per pkt.; **.25** per oz.; **.75** per $\frac{1}{4}$ lb.

Carters Miniature Cluster. — The best for pickling or salad. Price, **.15** per pkt.; **.30** per oz.

Carters Prickly Ridge. — A hardy variety of easy culture. Price, **.15** per pkt.; **.30** per oz.

Everbearing. — Of medium size, good shape, early and productive. Price, **.10** per pkt.; **.25** per oz.

Gherkin. — Very extensively used for pickling. Price, **.15** per pkt.; **.30** per oz.

Cultivation of Cucumber. — For early use sow April 1st in hotbeds, upon inverted grass sods, so that they can be readily transplanted to the open ground in rich soil when all danger of frost is past. For outdoor cultivation sow the seed when the weather becomes settled and warm, in hills from 4 to 6 feet apart each way. Thin out to four of the strongest plants to a hill after danger from insects is over. These plants exist best in a warm, moist, rich, loamy soil. Continue planting at intervals for a succession. Cucumbers should be gathered when large enough for use, whether required or not, because if left to ripen they spoil their productiveness. For pickles plant in June and July. One ounce of seed will plant fifty hills, two pounds to the acre.

SWEET CORN

Burpee's Golden Bantam. — An extremely early variety of a rich golden colour and delicious flavour of excellent quality. No garden is complete without this sort.

Price, .10 per pkt.; .25 per pt.; .40 per qt.; 2.50 per pk.

Peep o' Day. — This corn is at least ten days earlier than any other sort, bearing ears of fine quality, averaging 6 inches in length. Stalks are small and can be grown close together.

Price, .10 per pkt.; .20 per pt.; .35 per qt.; 2.00 per pk.

Quincy Market. — An early variety of superior quality. The ear is very large and full. It is a twelve-rowed variety.

Price, .10 per pkt.; .20 per pt.; .35 per qt.; 2.00 per pk.

Early Crosby. — This variety continues to satisfy year after year, and is quite unrivalled when ripened ears are compared.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Early Red Cory. — One of the best extra early varieties. The ears are of good size and are eight rowed. The cob red. Very popular.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Early White Cory. — Similar to the Red Cory, but with white kernels.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Mammoth White Cory. — Quite as early as the other Cory corns, with ears twice the size. Is sugary and in great demand.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Black Mexican. — The sweetest corn in cultivation. When ripe this corn is almost black, but is almost white when ready for the table. Ripens medium early.

Price, .10 per pkt.; .20 per pt.; .35 per qt.; 2.00 per pk.

Potter's Excelsior. — Considered the best main crop corn grown. The ears are medium in size, and well filled with white, juicy kernels. A twelve-rowed sort, and very productive.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Country Gentleman. — Of all late varieties this is the richest flavoured, has a deep grain and small cob. The kernels are large, tender, and milky, and lie in irregular rows on the cob.

Price, .10 per pkt.; .20 per pt.; .35 per qt.; 2.00 per pk.

Stowell's Evergreen. — A very handsome, tender, and sugary sort, the standard late variety, with very large ears of twelve to sixteen rows which remain fit for use longer than any other corn known.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Late Mammoth Sugar. — Produces very thick mammoth ears, with rows of large, broad kernels of excellent texture. It follows Stowell's Evergreen into maturity.

Price, .10 per pkt.; .15 per pt.; .25 per qt.; 1.50 per pk.

Burpee's Golden Bantam
Sweet Corn

Cultivation Directions. — Plant in a rich, warm soil, in rows 3 feet apart for early sorts and 4 feet apart for the late sorts. Place hills 2 to 3 feet apart in the rows. The seed is liable to rot if planted in wet or cold ground. Yet, if we have an early warm period in spring it often pays to take some risks, as the plants, when once up, will often escape injury from belated frosts. May 15th is early enough to plant for seasonable crops. For succession plant every two weeks to July 15th. One quart of seed will plant two hundred hills, eight to ten quarts to an acre.

FIELD CORN

Angle of Midnight. — An eight-rowed yellow flint of excellent type. Ears long, kernels long and deep glossy yellow. Price, **1.00** per pk.; **3.50** per bu.

Brewer's Yellow Dent. — A valuable new dent variety; has excellent general qualities, is a splendid ensilage sort, and well suited to southern New England. Price, **.75** per pk.; **2.50** per bu.

Early Yellow Canada. — An early eight-rowed flint variety, with deep kernel and small cob. Rarely failing to produce a good crop. Price, **.85** per pk.; **3.00** per bu.

Early Mastodon. — The earliest large-eared dent variety known, will ripen in 95 to 100 days; a heavy yielder of extra quality, very hardy, of medium height, and a strong grower. Price, **.75** per pk.; **2.50** per bu.

Improved Leaming. — An early heavy long-eared sort maturing in 100 to 120 days, habit medium tall foliage, heavy, a splendid ensilage variety, and much relished by stock. Cob small and red; kernels deep and bright yellow. Price, **.75** per pk.; **2.50** per bu.

Eureka Ensilage. — A tall-growing variety and extensively grown for ensilage and fodder. Price, **.75** per pk.; **2.50** per bu.

Early Sanford. — A New England standard variety, medium-size ears, about ten inches long, eight-rowed, with large, broad kernels of a white flint colour. A splendid fodder and ensilage variety. Price, **.75** per pk.; **2.50** per bu.

Longfellow. — A yellow flint eight-rowed variety, kernels large and broad, small cob; a very heavy yielder and especially adapted to New England. Price, **1.00** per pk.; **3.50** per bu.

Pride of the North. — Very early dent, maturing in 90 to 100 days and can be absolutely relied upon. It can be grown with great success in the north. Ears of good size, kernels long, colour deep yellow, twelve to sixteen rowed. Price, **.75** per pk.; **2.50** per bu.

Sweet Fodder. — Very succulent and nutritious as green fodder, and very useful for soiling or ensilage. Price, **.75** per pk.; **2.50** per bu.

White Southern. — A standard ensilage and fodder corn, and in much demand in Southern New England. Price, **.60** per pk.; **1.75** per bu.

Cultural Directions. — For field varieties, when planted in hills 2 feet apart, use ten to twelve quarts to the acre; for fodder and ensilage when planted in hills use one and one-half bushels per acre. When planting corn for soiling purposes plant at the rate of three to four bushels broadcast.

KOHL RABI,

Carters Earliest White,
Carters Earliest Purple.

Price, **.10** per pkt.;
.35 per oz.; **3.50** per lb.

Description. — A useful vegetable, not nearly so much cultivated in this country in gardens as it would be were its merits known.

Use. — As a substitute for Turnips, especially in hot, dry seasons. The bulb grows entirely out of the ground.

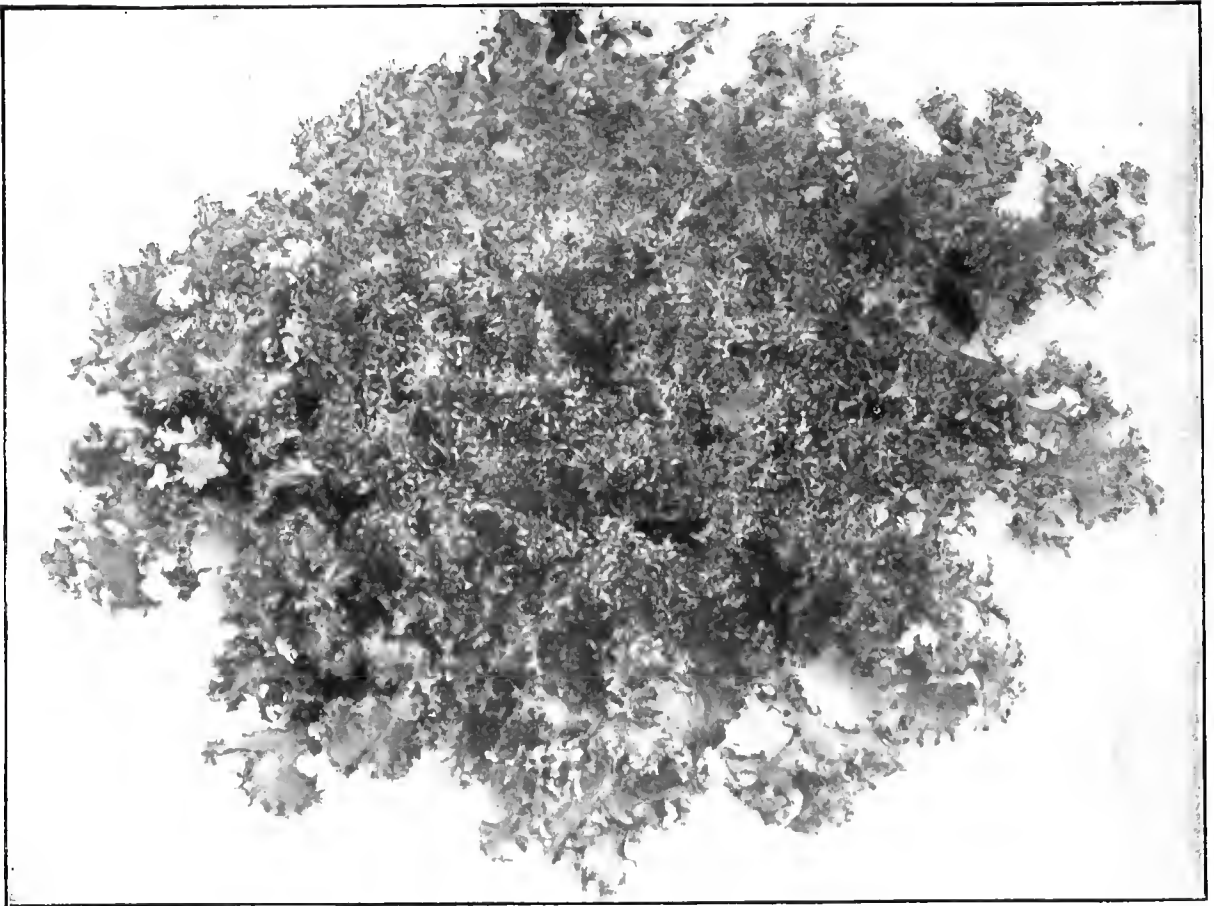

Carters Earliest Purple Kohl Rabi

or KNOL KHOL

Varieties. — There are two varieties in general cultivation, the white and the purple.

Cultivation. — Prepare a breadth of good, well-manured soil. Drill the seeds in rows about 15 inches apart in May or June, and thin out to about 9 inches apart. They are ready for use when they attain the size of a small Turnip. One ounce of Kohl Rabi Seed will sow 150 feet of drill.

ENDIVE

Carters Model Endive

	Per pkt.	Per oz.	Per ¼ lb.
Carters Model (<i>see Photograph</i>). — The most beautiful and perfect form of Curled Endive yet introduced. It is exceedingly ornamental, of a distinct colour, and bleaches admirably10	.40	1.50
Carters White Endive. — Superbly curled and lacinated, easily blanched, very tender10	.25	.90
Carters Green Curled. — Dwarf and beautifully curled10	.30	1.00
Carters Round-leaved Batavian. — Very compact and hardy, forms good heart10	.25	.90
Green Batavian or Escarolle. — Tender, broad leaves, crisp, of good flavour10	.20	.70

DANDELION

Dandelion, Improved Large. — Leaves broad and fleshy, very tender10	.50
Dandelion, French. — Leaves finely cut, mild and tender10	.50

EGG PLANT

Egg Plant, Black Beauty. — Fruit jet black, good form and solid10	.50
Egg Plant, N. Y. Improved. — A splendid market variety; fruit large10	.50
Egg Plant, White Egg. — The small white variety, of good flavour10	.50

LIST OF HERBS AS FOLLOWS:

Balm.	Chervil.	Marjoram, Sweet.	Rosemary.	Sorrel, Broad Leaved.
Basil, Sweet.	Clary.	Marjoram, Pot.	Sage.	Sorrel, Common.
Basil, Bush.	Fennel.	Purslain, Green.	Savory, Summer.	Thyme.
Borage.	Lavender.	Rampion.	Savory, Winter.	Wormwood.

Price, .10 per pkt.

The Cultivation of Endive. — For an early supply sow the seed in shallow drills about April 15th. When up thin out to about 10 inches apart. When nearly full grown the plants should be bleached by gathering the leaves together and tying with yarn or raffia, being careful to do so only when the plants are very dry; otherwise it will cause rot. One ounce of seed will sow 150 feet of drill.

Carters Selected Musselburgh Leek

LEEK

Carters Selected Musselburgh (*see Photograph*). — A splendid selection of this well-known and popular variety; grows to large size, and is recommended for exhibition.

Price, .15 per pkt.; .40 per oz.

Carters Holborn Model. — The best both for exhibition and table. The stems are remarkably solid, not quite so long as *Carters Selected Musselburgh*, of the clearest white colour, whilst the flavour is exceedingly delicate.

Price, .25 per pkt.; .65 per oz.

Carters Holborn Model Leek was a conspicuous feature in the First Prize and Champion Exhibit of Vegetables (open to the world), Shrewsbury, 1912.

Two hundred and ninety-two First Prizes reported to us by customers.

The Lyon Leek. — A very popular, large variety; widely grown in the north, where it takes many of the leading prizes each year

Per	Per
pkt.	oz.
.15	.40

Carters London, or Broad Flag. — Quick growing; for early use.

.10	.25
-----	-----

Henry's Prize. — Late variety; of large size; very hardy.

.15	.40
-----	-----

"I am pleased to tell you, last year I took eleven firsts, nine seconds, and two third prizes from your seeds, with numerous congratulations." — Mr. G. ALLAWAY.

The Cultivation of Leek. — Sow early in April, and transplant early in July into trenches of well-manured soil, say 1 foot in depth, and 20 inches between the plants. In warm weather liberal dressings of liquid manure will be of service, and the plants should be afterwards carefully earthed up to blanch the stems. For exhibition, sow in January in boxes under glass, and transplant as early as the ground can be worked into rich soil. One ounce of seed will sow 100 feet of drill.

LETTUCE

**This Lettuce is Self-Folding
and Requires No Tying**

Carters Giant White Cos.

— This remarkably fine lettuce becomes more popular every season, and is without doubt the best and finest-flavoured Cos Lettuce in cultivation. Owing to the self-folding habit, no tying is required. The heads are very solid and crisp eating. It does not run to seed as quickly as other Cos varieties.

Price, **.15** per pkt.;
.65 per oz.

Carters Jumbo Cos. — A distinct summer Lettuce of enormous size. During the hottest period of the year we have seen this Lettuce standing as firm as a rock, and many of the heads when fit to eat weighed from 4 to 5 lbs. each.

The Royal Horticultural Society, reporting its trials at Wisley, says: "Foliage deep green; hearts immense, solid. Excellent flavour. Stood the drought well. Ready July 1st. The largest Lettuce in the collection (thirty-nine varieties)."

Price, **.15** per pkt.;
.65 per oz.

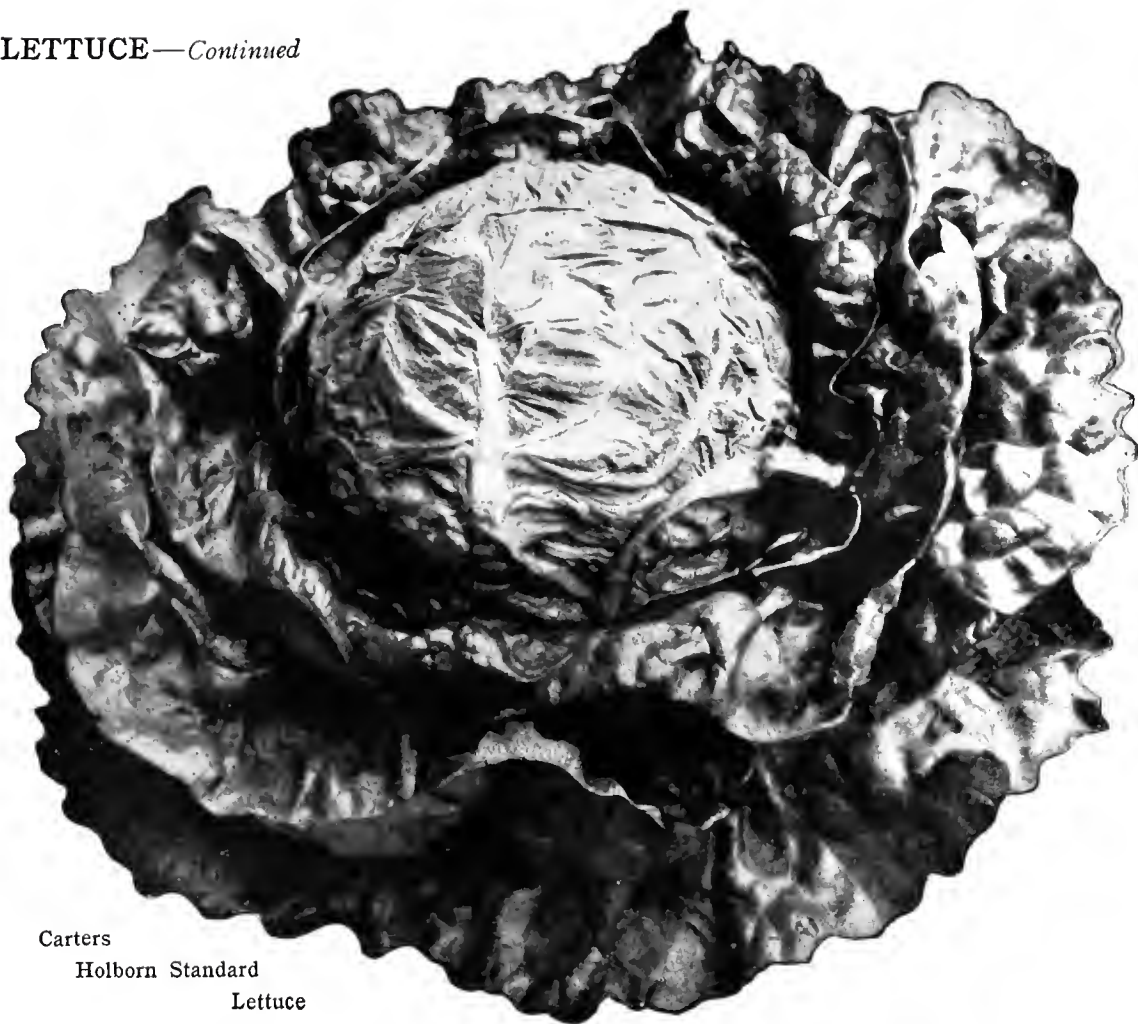

Carters Giant White Cos or Romaine Lettuce

	Per pkt.	Per oz.
Carters Giant Bath Cos. — Most useful for early consumption10	.55
Black-seeded Bath Cos. — Fine hardy variety10	.40
Paris Green Cos. — Darker in growth than <i>Paris White</i>10	.25
Paris White Cos. — Fine useful summer variety, good solid white hearts10	.25
Superb White Cos. — Fine large-hearting variety, blanches well, very crisp10	.50

Every one should enjoy the pleasure of a salad several days a week during the summer season. It is a wholesome addition to more substantial diet, rendering it grateful to the palate, and it is a pity that it is not more commonly used on the tables in the average household. Lettuce is one of the easiest grown and most appetizing of salad plants and we strongly recommend its use. For complete list of salad plants see page 62.

For complete list of herbs see page 31.

Carters
Holborn Standard
Lettuce

Carters Holborn Standard (*see Photograph*). — A Lettuce of extraordinary size and duration. It forms well-developed heads early and is one of the very last to start for seed. Its leaves are crumpled and crisp, is very tender and of excellent flavour, will provide an abundance of salad during the hottest summers. The Royal Horticultural Society, reporting its trials at Wisley, says: — “Carters *Holborn Standard*; hearts large, solid, crisp, good flavour.”

Price, .25 per pkt.; .65 per oz.

Carters Perpetual. — This is a large, handsome heading Lettuce, equally suitable for forcing or open ground. Its great attraction is its resistance to drought. It produces fine heads of a lively green colour and retains its crisp and tender flavour to the last, its deeply crumpled leaves giving it great substance. The Royal Horticultural Society, reporting, says: — “Carters *Perpetual*. — Foliage beautifully curled; a fine stock.”

Price, .15 per pkt.; .60 per oz.

Carters Harbinger Forcing. — Valuable on account of its extreme earliness. Is not a hearting variety, but being of quick growth is much in request for early salads.

Price, .15 per pkt.; .60 per oz.

Carters Green-Fringed. — Of a very delicate and peculiar shade of green, inner parts of the leaves being white; the edges are prettily fringed.

Price, .15 per pkt.; .50 per oz.

LETTUCE—*Continued*

Carters Round-Leaved Cabbage Lettuce

Carters Round-Leaved (*see Photograph*). — A hardy, flat-shaped variety that can be sown at almost any season; the heads are very compact and firm, solid and white; slow to run to seed. In our own trials we have repeatedly seen this variety standing firm when others have bolted.

Price, .15 per pkt.; .65 per oz.

Carters Longstander. — A distinct and valuable variety of great size. From its peculiar habit of growth it is less liable to decay and damage than any other variety. The colour of the leaf is pale green, and it is of the most delicious flavour and tenderness.

Price, .10 per pkt.; .40 per oz.

Carters All the Year Round. — This is a superb stock, the heads being very solid, white, and crisp, and slow to run to seed.

Price, .15 per pkt.; .40 per oz.

Continuity. — Distinct brown-tinged variety.

Price, .15 per pkt.; .50 per oz.

Early Paris Market. — Quick growing; for frame work is one of the best; distinct tinted edge.

Price, .15 per pkt.; .50 per oz.

Improved Drumhead. — Grows to large size; colour light green.

Price, .15 per pkt.; .40 per oz.

Tom Thumb. — Reselected; fine stock of an old favourite; hearts compact, solid, and crisp.

Price, .15 per pkt.; .40 per oz.

Mixed Heading. — Comprising all the best varieties.

Price, .10 per pkt.; .20 per oz.

Big Boston. — Very large, tender heads, splendid for both indoor or outdoor culture.

Price, .10 per pkt.; .20 per oz.; .60 per $\frac{1}{4}$ lb.

Black Seeded Tennisball. — A standard sort of excellent form, being tender, crisp, and compact.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.

White Seeded Tennisball. — Very early; a good forcer; tender and crisp, free from bitterness.

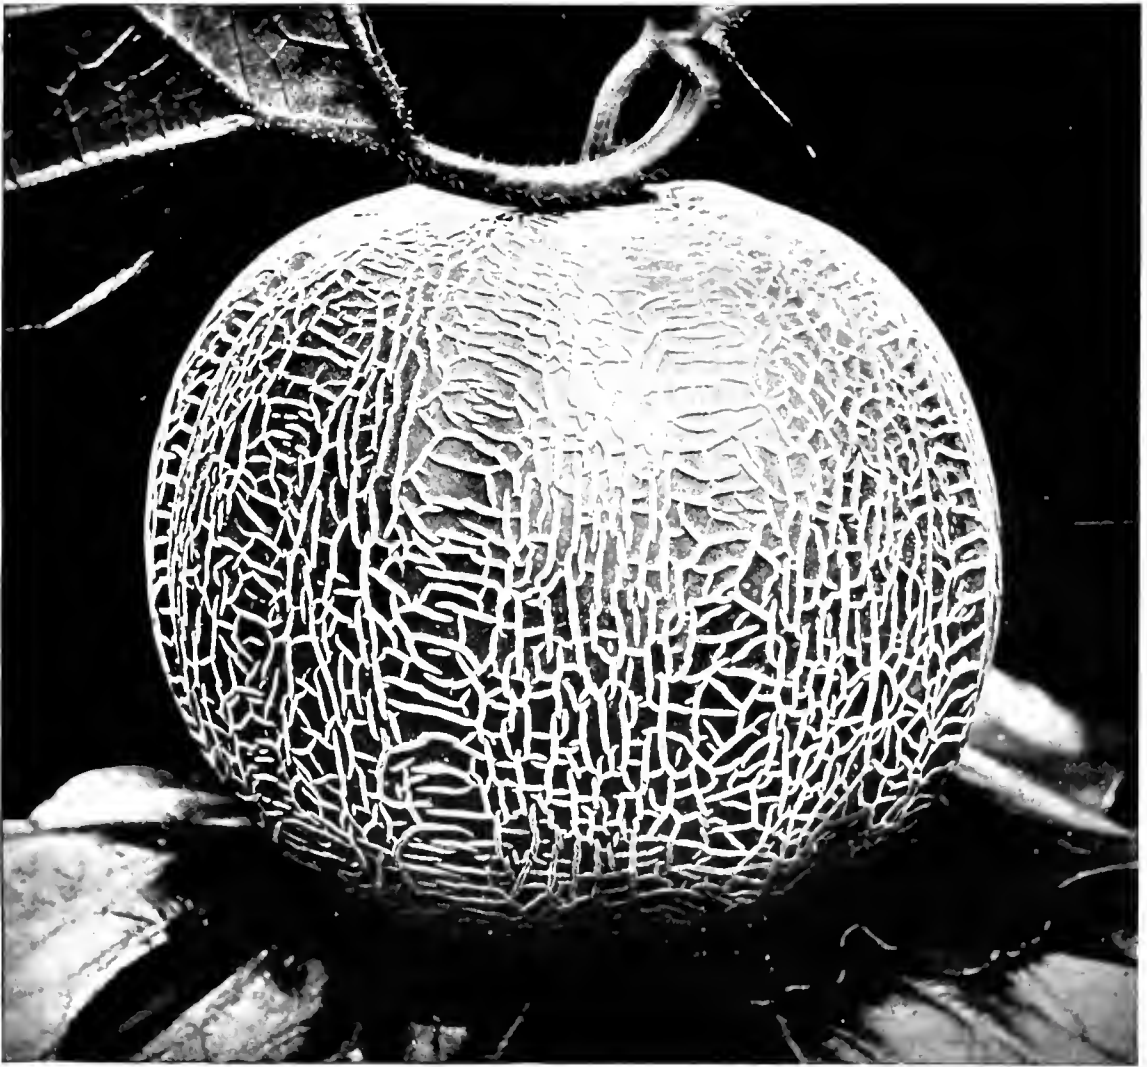

Price, .10 per pkt.; .20 per oz.; .60 per $\frac{1}{4}$ lb.

May King. — Heads of globular shape, firm and close; colour light green, ribs delicate, and waved centre is of a light yellow and very tender.

Price, .10 per pkt.; .30 per oz.; .85 per $\frac{1}{4}$ lb.

Cultivation of Lettuce. — Sow the seed in hotbeds during February or early March. As the seedlings appear prick them into flats or cold frames, leaving several inches between the plants for growth. As soon as a nice, rich warm spot can be worked in the open, transplant the sturdiest plants in rows 1 foot apart and leaving 8 to 12 inches between the plants in the rows. For a succession of growths sow the seed very lightly in open ground and thin the plants to 6 inches or more apart. Do this as often as one bed is rid of its result. Some varieties will do very well during the winter in a cool forcing house. One ounce of seed will produce three thousand plants.

MUSK MELON—FORCING VARIETIES

Barnett Hill Favourite Melon

Carters Barnett Hill Favourite. — The many gratifying reports received from our customers have amply proved our confidence in introducing this grand new Melon, and the demand is equally confirmatory of its merits. It is superbly netted, orange yellow in colour, with white flesh and a splendid flavour; it is free setting and a perfect exhibition variety.

Price, .75 per pkt.

Carters Blenheim Orange. — The finest-flavoured and most popular scarlet-flesh Melon in cultivation, remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a perpetual bearer, ripening in a short space of time. The fruit is superbly netted, the flesh deep and solid, and a special and distinctive feature is the evenly defined and thin rind.

Price, .50 per pkt.

Carters British Queen. — This grand cream-flesh melon is a cross between Hero of Lockinge and Royal Ascot. It was awarded the First-Class Certificate of the R. H. S. and pronounced to be the best flavoured white-flesh melon ever submitted. Price, .50 per pkt.

NEW

MUSK MELON — *Continued*

Forcing Varieties

NOVELTY **Earl's Favourite Melon** (*see Photograph*). — This fine melon has been pronounced by experts as the finest green-fleshed variety grown. It is a strong grower, a free setter, and the fruit is large and beautifully netted, whilst the flavour is conceded by judges of this luscious fruit to be the best possible. Price, .75 per pkt.

NOVELTY **Carters Delicatesse.** — This superb new melon was sent out by us in 1912. From all quarters we have received most favourable reports remarking on the excellent constitution of the plant and the delicious flavour of its freely produced and handsomely netted fruits. Price, .75 per pkt.

Per pkt.

Hero of Lockinge. — Pale flesh30
Ingestre Hybrid. — White flesh . . .25
Little Heath. — Hardy, scarlet flesh .25
Syon House Perfection. — Green flesh .25

GARDEN VARIETIES

Improved Rockyford or Colorado. — An oblong, second early sort, very popular. The melons average about five inches in length, are of a delicious flavour, with a light-green flesh.
 Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Emerald Gem. — An extra early sort. In shape it is round, with a salmon-coloured flesh and an exceptionally fine flavour. The exterior is a dark green.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.

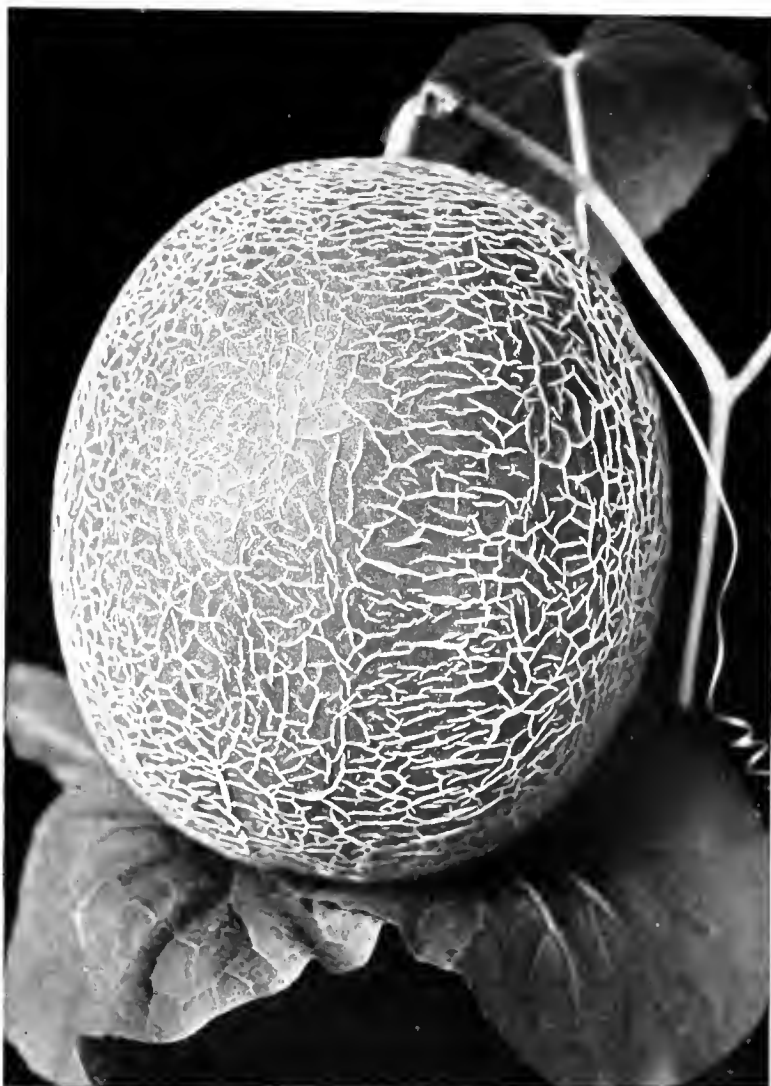

Miller's Cream or Osage. — Fruit round and large, with a green, netted skin. Salmon flesh. Very tasty.
 Price, .10 per pkt.; .25 per oz.; .90 per $\frac{1}{4}$ lb.

Extra Early Hackensack. — Flesh green, very sweet, large size.
 Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Early Green Nutmeg. — A large, early sort. Very popular.
 Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Montreal Nutmeg. — The largest nutmeg sort grown. A fine melon for either exhibition or home use.
 Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Cultivation of Musk Melon. — Melons succeed the best in a light, rich, sandy soil. Seed should be planted about the first week in May. Plant in hills about 5 or 6 feet apart each way for Musk Melon, and 8 to 10 feet apart each way for Water Melon. Each hill should have at least a peck of well-rotted manure mixed thoroughly with the soil previous to the planting. Plant 10 seeds to the hill, and when the plants have made a good showing thin out to 3 or 4 of the best plants to the hill. One ounce of seed will plant fifty hills; two to three pounds of seed in hills to the acre.

Earl's Favourite Melon

WATERMELON

Cole's Early. — A medium-sized very early sort, with a large heart and deep-red flesh of fine texture. Does well in northern gardens.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.

Mountain Sweet. — A large, oblong sort, with a dark-green coloured skin and very solid red flesh. This is an early sort and very popular.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.

Ice Cream. — This is a round melon, with mottled gray skin and a flesh-pink flesh. Very crisp.

Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Cuban Queen. — One of the largest round varieties, with a bright-red flesh. Very melting and sweet.

Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Citron. — Excellent for preserving.

Price, .10 per pkt.; .20 per oz.; .70 per $\frac{1}{4}$ lb.

Cultivation of Watermelon. — See Musk Melon. One ounce of seed will plant forty-five hills.

CARTERS MUSHROOM SPAWN

(SPECIAL "MILLTRACK" BRAND)

Cultural Hints

To grow Mushrooms successfully, the following requirements are essential: Procure fresh stable manure (straw litter manure, not peat litter), shake out well, leaving as little straw as possible; the better the manure the better the bed will bear. After shaking out, stack your short manure closely, as for the preparation of a hotbed, and there let it remain for a week to have a good heating, then turn it over and place what has been outside the heap into the center; repeat this turning at intervals of three days (four turnings should be sufficient), and if dry, use water enough to moisten it

gradually at each turning; this will get the material into right condition for the beds, as moisture is one of the most important points to study and the right texture of the material depends almost entirely upon this proper state of moisture. If you get your material right in this respect, whatever shape you make your beds, whether flat beds or ridges, you will not be likely to experience any trouble afterwards. The ideal temperature is 55° to 60°, but Mushrooms do come at a much lower temperature; a higher temperature than 60° should be avoided if possible.

After the beds are ready the bricks are each broken into about ten pieces of about equal size. These pieces should be inserted about 2 inches below the surface and about 10 inches apart, the bed should then be gently stamped or compressed. In about 15 days the spawn should have run entirely through the bed. The whole surface should be then covered with about 2 inches of loam and over this place a few inches of straw. Under these conditions the mushrooms should appear in about six weeks and continue to come for a month. One brick of spawn will lay in nine square feet of bed.

Price, 1 Brick, .25; 12 Bricks, 2.50; 100 Bricks, 15.00

"Having used your Mushroom Spawn the last two years I cannot speak too highly of it. On several occasions I have picked under the month from the time of spawning — and of first-rate quality." — F. WEST, Head Gardener to The Right Hon. Earl Curzon of Kedleston.

ONIONS

**Carters
Holborn
Onion**

STANDARD VARIETIES FOR
SPRING SOWING

Our onions are grown
with the closest su-
pervision and care,
and our stocks
are second
to none

Carters Holborn (*see Photograph*). — Equally valuable for exhibition and for table purposes. Perfect in shape, it grows to a large size, and is distinct in colour of skin from other Globe varieties. It is a capital keeper, and the delicate flavour nearly approaches that of the imported Spanish Onions sold by grocers and fruiterers. This fine Onion was included in the Large Gold Medal Exhibit, Shrewsbury, 1912. Price, .15 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Early Wonder. — A small globe Onion, maturing with great rapidity; its keeping qualities are also remarkable. Price, .25 per pkt. Stock limited.

Carters Tennis Ball. — This magnificent Onion is specially adapted for early sowing; the flavour is mild and delicate, and as an exhibition variety in summer it is invaluable. Price, .15 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Long Keeper. — Will remain sound the year round if properly kept.

"I am sending some examples of your Long-keeping Onion, grown in 1912, and it is now October 5, 1913. Gardeners about here hardly believe it." — J. L. BLACKHEATH.

Price, .15 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Silver Ball. — A pretty, medium-sized white globe Onion of fine texture and mild flavour. It makes a nice contrast on the exhibition table.

Price, .20 per pkt.; .60 per oz.; 2.00 per $\frac{1}{4}$ lb.

Carters White Spanish. — A Reselected Stock. — Our stock of this popular variety has been very carefully selected by us, and is offered as the most perfect form of the Banbury type it is possible to procure. It grows to a very large size, is of a pale yellow colour, and good flavour.

Price, .15 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Record continues to hold its prominent position in public favour as the largest globe-shaped Onion in cultivation. It can be sown either in the autumn or spring, but if large bulbs are desired autumn sowing is recommended. It shows a disposition to vary in colour to a small percentage, which can be eliminated at time of transplanting. It will be remembered that a specimen illustrated in the *Gardening World* turned the scale at $4\frac{1}{2}$ lbs.; this was probably the heaviest Onion ever grown.

Price, **.15** per pkt.; **.50** per oz.; **1.75** per $\frac{1}{4}$ lb.

Carters Selected Ailsa Craig.—We offer a very fine strain of this popular Onion, which, on account of its enormous size, is in great demand amongst exhibitors of vegetables. It is a good keeper, and is much liked and recommended on account of its acceptable, delicate, and pungent flavour. Three hundred and eighty-four First Prizes reported during the past few seasons.

Price, **.15** per pkt.; **.50** per oz.; **1.75** per $\frac{1}{4}$ lb.

Carters Pearl Pickler Onion

Carters Pearl Pickler (*see Photograph*). — This is the genuine miniature Onion that is preserved in white vinegar, and found on the tables at the leading hotels.

Price, .15 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Selected Yellow Globe Danvers. — Our stock of this very popular variety has been carefully selected by us from numerous tests in regard to its size, shape, colour, solidity, and flavour, by the Carter method, and we are pleased to say this strain of seed is the most perfect form of a Yellow Globe Onion ever produced. No vegetable garden should be without this onion.

Price, .15 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Autumn Giant. — A very large, white-skinned Onion, mild and agreeable flavour.

Price, .15 per pkt.; .40 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Golden Globe Tripoli. — A large variety, similar in size to the *Giant Rocca*. The skin is of a transparent golden-straw colour, and it will be found invaluable in exhibition collections.

Price, .15 per pkt.; .40 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Giant White Tripoli. — Especially suitable for culinary purposes and exhibition; a rather tender Onion on heavy soils; ripens very early.

Price, .15 per pkt.; .40 per oz.; 1.25 per $\frac{1}{4}$ lb.

Giant Rocca. — A fine large Onion. The original variety.

Price, .10 per pkt.; .30 per oz.; 1.00 per $\frac{1}{4}$ lb.

Carters White Emperor. — Unquestionably the finest form of flat Onion in cultivation, with silvery-white skin and flesh of a most agreeable mild flavour. Included in the Champion Gold Medal Collection of Vegetables, Shrewsbury, 1912.

Price, .15 per pkt.; .40 per oz.; 1.25 per $\frac{1}{4}$ lb.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Blood Red . — Splendid deep blood-red colour, of medium size10	.20	.75
Carters Spanish . — Of fairly large size, pale in colour, and mild flavour10	.25	.90
Carters White Globe . — Good medium-size variety, of mild flavour10	.25	.90
Cranston's Excelsior . — A fine variety, of good shape, suitable for exhibition purposes15	.40	1.50
Covent Garden Pickling . — A splendid pickling variety much in demand15	.40	1.50
Improved Reading . — A large and popular variety15	.35	1.25
The Queen . — A miniature15	.50	1.75
Red Wethersfield . — A variety of exceptional quality and flavour and a good keeper10	.25	.75
Southport Yellow Globe . — A variety of excellent flavour and good keeping qualities10	.25	.75
Silver-Skin or White Queen10	.30	1.00
Shallots . — Jersey red-skinned10	.25	

The Cultivation of Onion. — The ground cannot well be too rich for this crop, nor the soil in too fine a condition. Sow the seed as early as the soil can be worked though the weather be yet damp and cold. The soil must be made firm before the operation is undertaken in either beds or drills. The seed should be sown thinly and covered lightly, the drills 12 inches apart, and the young Onions thinned out to about 6 inches apart, according to the variety. In very dry weather a good watering is very beneficial. Growers of Onions for exhibition generally transplant, and this is also a sure means of checking the onion grub, so troublesome in some districts. One ounce of seed will sow 100 feet of drill; 4 to 5 pounds to an acre.

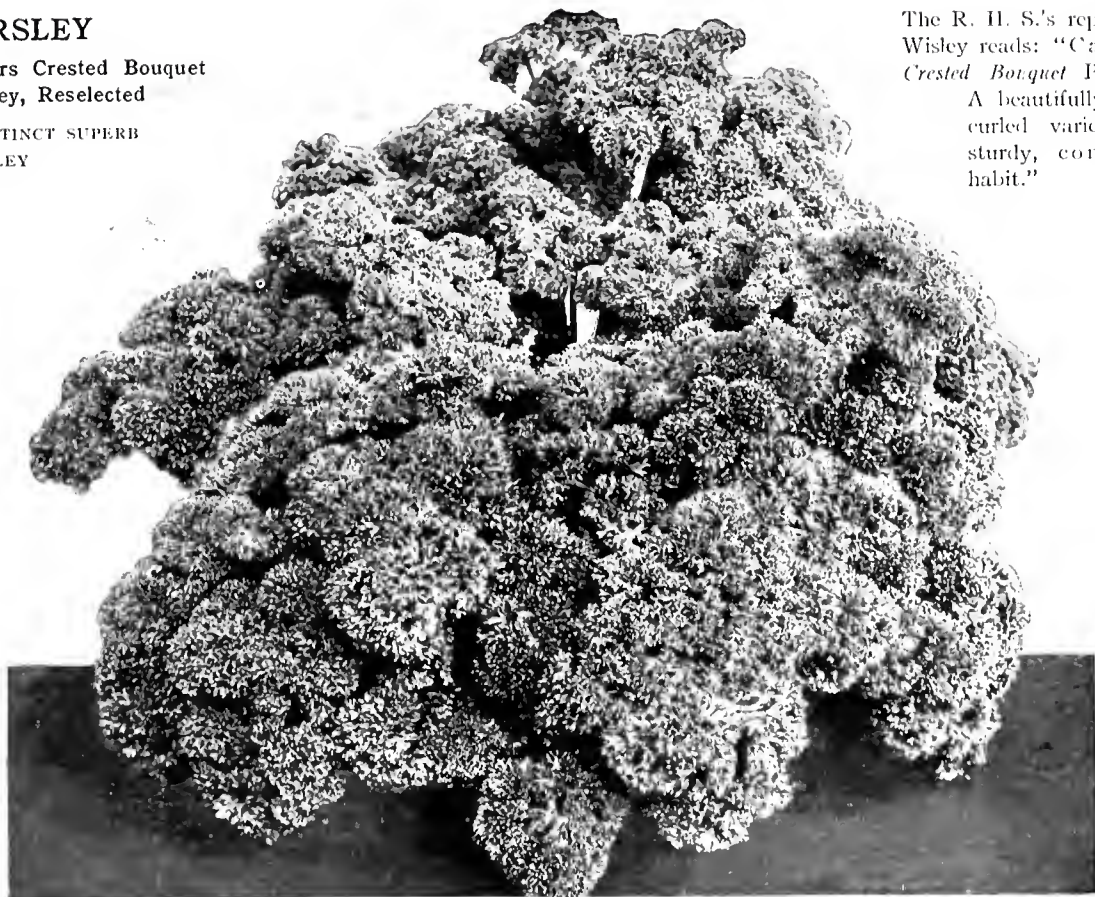

PARSLEY

Carters Crested Bouquet
Parsley, Reselected

A DISTINCT SUPERB
PARSLEY

The R. H. S.'s report at
Wisley reads: "Carters
Crested Bouquet Parsley.

A beautifully deep
curled variety, of
sturdy, compact
habit."

Carters Crested Bouquet Parsley, Reselected. — This superb variety has been reselected and improved by us, and is without question the most perfect type of Parsley ever offered; numerous visitors to our Trial Grounds at Raynes Park have freely endorsed our opinion. It is of dwarf, compact habit, the exquisite curl of the leaves giving it a very attractive crested appearance.

Price, .25 per pkt.; .50 per oz.; 1.75 per $\frac{1}{4}$ lb.

Carters Emerald Green. — *Award of Merit R.H.S.* This excellent stock of Parsley is becoming very popular. The colour is of a very rich deep green; habit taller and more branching than our celebrated *Champion Moss Curled*; is also quick in developing and of great value to market growers.

Price, .10 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Perpetual. — This splendid variety was introduced by us some years ago, and has attained a large sale on account of its excellent quality and its characteristic of being remarkably slow to run to seed; has large and handsome curled leaves, is rather taller and more branching in growth than our *Crested Bouquet*. Price, .15 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Fern-Leaved Parsley. — Exquisitely perfect in form and colour; quite fern-like and highly ornamental; for garnishing purposes it is ideal.

Price, .15 per pkt.; .35 per oz.; 1.25 per $\frac{1}{4}$ lb.

Carters Champion Moss Curled. — A very close, handsome Parsley; both useful and ornamental.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.

Carters Curled. — Compact and hardy; beautifully curled.

Price, .10 per pkt.; .25 per oz.; .85 per $\frac{1}{4}$ lb.

The Cultivation of Parsley. — Sow the seeds thinly in beds any time from very early spring until the end of June. In dry seasons it is an advantage to water the beds, as the seeds will sometimes lie a long while dormant. One ounce of seed will sow 150 feet of drill.

PARSNIP

Carters Holborn Marrow Parsnip

A Sweet Delicate-Fleshed Variety

(See Photograph)

A truly refined Parsnip. When lifted it leaves the ground clean, smooth, and well shaped. It is not so large as our Maltese, but its flavour is unusually marrow-like and delicate. The Royal Horticultural Society, reporting, says: "Roots thick, handsome, and not too large; just the size and shape a Parsnip should be."

Price, .15 per pkt.; .25 per oz.;
.90 per $\frac{1}{4}$ lb.

"The Holborn Marrow Parsnip is the most delicious I ever tasted, and it deserves all you say about it."—J. FREEMAN, Esq.

Carters Maltese Parsnip

A Superb Giant Parsnip for Exhibition or Table Use

We are confident that this highly selected strain cannot be surpassed either for size or flavour, the roots, which attain to a very large size, being as tender and sweet flavoured as varieties which do not reach one half the size.

Price, .10 per pkt.; .20 per oz.;
.75 per $\frac{1}{4}$ lb.

Carters Long Parsnip.

— Fine variety, of splendid flavour.10 .15 .50

Hollow Crown.— An old favourite10 .15 .50

The Student.— Extremely delicate flavour10 .15 .50

The Cultivation of Parsnip.— Sow the seed early in March as soon as the season will permit. The ground should be well manured and deeply trenched, the drills about 15 inches apart and the plants thinned out the same distance apart. The quality of the roots is improved by allowing them to winter in the ground for spring use. One ounce of seed will plant 100 feet of drill; 5 pounds to the acre.

Carters
Holborn Marrow
Parsnips

"Your seeds turned out splendidly last year; I had wonderful crops, some of the Maltese Parsnips weighed 4 pounds

2 ounces each and were quite sweet and succulent, not a bit strong in consequence of the size."—Mrs. PHILLIPS.

OKRA OR GUMBO

	Per pkt.	Per oz.
Dwarf Green. A very early and tender sort10	.20
Tall Green. A heavy producing variety10	.20
White Velvet. Produces large, tender, white pods10	.20

Cultivation of Gumbo.—Early in May the seed should be sown in rows about three feet apart and two inches deep. As the plants appear thin to about one foot apart. One ounce of seed will plant forty feet of drill.

EARLIEST GARDEN PEAS

Carters New Giant Lightning

types will speedily displace the smaller-podded varieties, as in addition to the increased size of pod the haulm is stronger, the cropping much heavier, and the flavour superior to the older varieties.

Carters "Giant" Lightning (*White Round, 3 to 4 feet*). — The new large-podded early white round Pea. (See Photograph.) Price, .90 per qt.; .50 per pt.; .25 per pkt.

Carters "Giant" Blue Express (*Blue Round, 3 to 4 feet*). — The new large-podded early blue round Pea. Price, .90 per qt.; .50 per pt.; .25 per pkt.

In establishments where Peas are required very early, these *Giant* introductions will be much appreciated, as it is well known that round Peas are hardier and generally can be sown earlier than the wrinkled varieties.

For our collection of Peas for succession of crop see page 58.

Carters Eight Weeks Pea

GREEN, ROUND, 15 INCHES

This is the *Earliest Dwarf Pea in the world*, proved not only from our own trials, but from the expert reports we receive from time to time. A very hardy variety, possessing all the good points of the best type *American Wonder*, which was one of its parents. As both a forcing and an early border variety it has become a boon to gardeners whose demands are heavy early in the season. The seed is slightly dented, and of the same colour as its other parent, *William the First*. The pods are freely produced, and well filled with sweet-tasting peas. It is a splendid forcer.

Price, .90 per qt.; .50 per pt.; .25 per pkt.

Carters Forcing Pea (*Wrinkled, 1 foot*). —

A valuable Pea for early culture. Its stocky growth is rarely more than 1 foot in height. It commends itself not only to professional gardeners who are required to produce Peas nearly the year round, but also to amateurs who can, with this sturdy Pea, raise supplies for the table very early in the year.

Price, .65 per qt.; .35 per pt.; .20 per pkt.

LARGE PODDED, EARLY ROUND VARIETIES

Carters "Giant" Lightning and Carters "Giant" Blue Express Peas

After years of patient labour we have pleasure in introducing the above magnificent Peas. There is no doubt that these

Carters Early Morn Pea

A superb First Early Giant Sort

(*Wrinkled, 3 feet*).—This grand introduction maintains its position as one of the best early wrinkled Peas ever raised. Although very early, the seed should not be sown until the soil is in a fit state to receive it. The pods are very large and well filled, and are often ready to pick during June.

Price, .60 per qt.;
.35 per pt.; .20 per pkt.

"Your Early Morn Pea is quite the best Pea I have ever tasted; and also a fine cropper."

—Mr. T. F. STANNETT, Gardener to F. MAY, Esq.

Laxtonian — Carters Re-selected (*Wrinkled, 1½ feet*).—This fine new Pea has been highly selected by us, and the stock is saved from deep-green giant-podded plants only. It is very early, closely following *Eight Weeks*. Its deep-green pods are long and curved, and of excellent flavour.

Price, .90 per qt.;
.50 per pt.; .25 per pkt.

Carters Blue Express (*Blue Round, 2½ feet*).—A re-selected stock of an early, round-seeded variety, and a very productive bearer, the pods well filled with fine-flavoured Peas, of a distinct colour when boiled.

Price, .60 per qt.;
.35 per pt.; .20 per pkt.

Carters Lightning (*Round Seeded, 2½ feet*).—A re-selected stock of the earliest white round-seeded Pea.

Price, .60 per qt.;
.35 per pt.; .20 per pkt.

Carters Early Morn Pea

A NEW AND ABSOLUTELY DISTINCT FIRST EARLY PEA

Carters Early Duke Pea

Blue Express Duke of Albany

Early Duke

Carters Early Duke

WRINKLED VARIETY

Height, 3 feet

This unique variety from a cross as shown above is offered after several seasons' tests, both at Raynes Park and on the grounds of the leading growers in the country. For quality it is unequalled, the foliage and pods being of an exceptionally deep, rich green; it forces well, matures about the same time as Carters *Early Morn*. The handsome pods contain peas of exceptional colour and quality. Its remarkably prolific habit is the main feature of this grand First Early, the most distinct and striking sort introduced for many years.

Award of Merit, R. H. S.

Price, 1.00 per pt.; .25 per pkt.

"*Early Duke* is one of the best Early Peas; the pods are large and well filled with delicious flavoured Peas." — Mr. PHILLIPS.

Carters American Wonder Reselected (*Wrinkled, 18 inches*). — Our stock of this variety is highly selected, having pods nearly as large again as the older stock; with peas of excellent flavour and appearance.

Price, .65 per qt.; .35 per pt.; .20 per pkt.

The Pilot — Carters Reselected (*Round Seeded, 3 feet*). — This Reselected variety is without question the most perfect stock on the market; it produces large, full deep-coloured pods, about the size of *Gradus*.

Price, .65 per qt.; .35 per pt.; .20 per pkt.

Gradus (*Wrinkled, 4 feet*). — An early large-podded wrinkled Pea. Large, deep-green pods, good flavour. A standard variety of excellent merit.

Price, .50 per qt.; .30 per pt.; .15 per pkt.

William the First — Carter's Reselected (*Round Seeded, 4 feet*). — Long, handsome pods, quite hardy

Price, .50 per qt.; .30 per pt.; .15 per pkt.

Carters Little Marvel Pea

Carters Little Marvel (*Wrinkled*, 18 inches). — This is one of the best and most popular Early Dwarf Peas, bearing a very heavy crop of dark pods, tightly filled with large Peas of excellent flavour. First early green wrinkled.

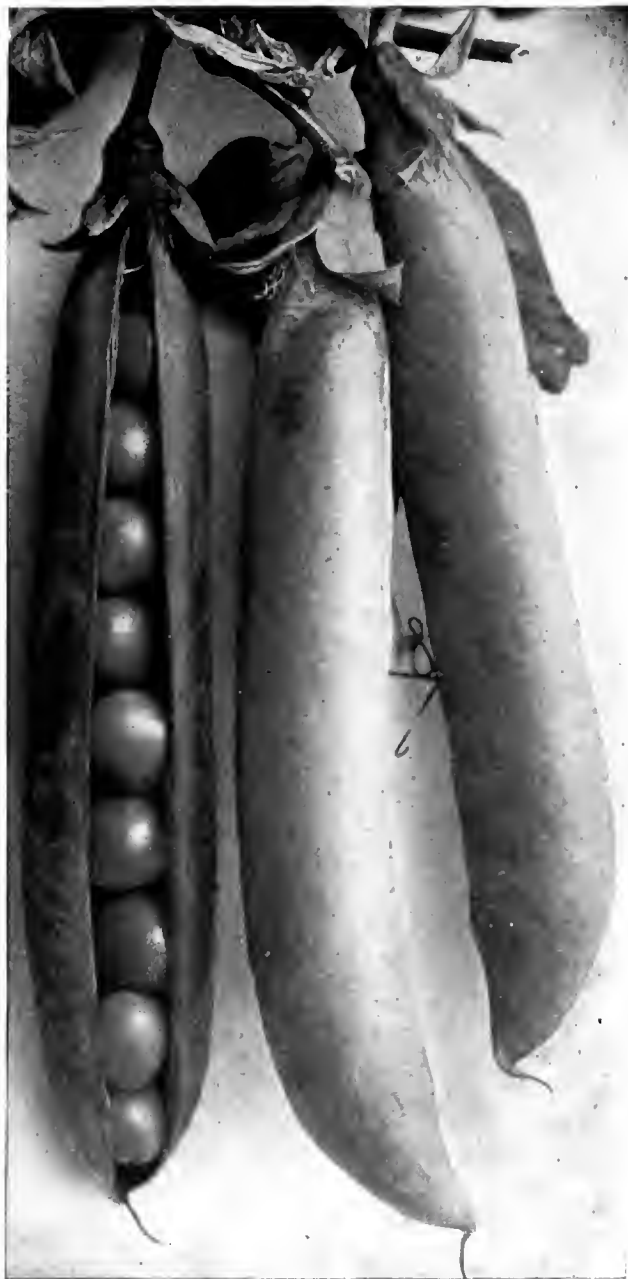

Price, .60 per qt.; .35 per pt.; .20 per pkt.

"Your Little Marvel Pea without a doubt is the best early variety I have had from you within the last 20 years I have traded with you." — G. DAKIN, Gardener to C. Wright, Esq.

"One of the best Peas, if not the best, for early crops, is *Eight Weeks*, sent out by the Carter firm; those who have grown it speak very highly of it. A pea suitable to follow this is *Little Marvel*, a wrinkled Marrow, 18 inches in height; this is so highly esteemed by gardeners that they grow successional crops through the season." — *The Gardeners' Magazine*.

Carters King of the Earlies (*Wrinkled*, 18 inches). — This Pea is a cross between *Daisy* and another first early wrinkled sort and was raised at the Royal Gardens, Windsor. It has a robust haulm, covered with giant pods. Price, .75 per qt.; .40 per pt.; .25 per pkt.

EARLIEST GARDEN PEAS — *Continued*

Carters Mayflower Pea

Carters Mayflower (*Wrinkled, 18 inches*).—A superb Dwarf first early wrinkled Pea. A cross between *Daisy* and *William Hurst*. Is a fine variety, with long, pointed pods twice the size of *William Hurst* and much more freely produced; being one of the most prolific dwarf peas grown. The vine is robust, resembling in character its most famous parent *Daisy*, with pods of similar colour to that variety. Seed wrinkled. Every one should try this fine introduction, which is but very inadequately shown in the photograph.
Price, .60 per qt.; .35 per pt.; .20 per pkt.

Alaska or Earliest of All (*Blue, Round, 2 feet*).—A well-known extra early round, blue pea, which produces Peas in great quantity. The seed can be planted as soon as the ground is fit to work in springtime.
Price, .35 per qt.; .20 per pt.; .10 per pkt.

Nott's Excelsior (*Wrinkled, 18 inches*).—An improved type of *Little Gem*, being as early and pods decidedly larger, and containing seven to nine large, solid peas of fine quality. Height, 14 inches.
Price, .45 per qt.; .25 per pt.; .15 per pkt.

Sutton's Excelsior (*Wrinkled, 18 inches*).—Very early and prolific, producing an abundance of broad pods well filled with peas of an unsurpassed flavour. Of so hardy a nature that this sort can be planted without fear at the same time as the smooth, round varieties. The haulm is very stout, and all in all this is a very near all around pea for any garden.
Price, .45 per qt.; .25 per pt.; .15 per pkt.

	Per qt.	Per pt.	Per pkt.

EARLIEST GARDEN PEAS — *Continued*

Carters Snowdrop

Early Morn Express
—————
Carters Snowdrop

Carters Snowdrop (*Wrinkled*, 4 feet). — Award of Merit R.H.S. A cross between *Early Morn* and *Express*. This first early Pea can best be described as an early *Ne Plus Ultra*, having pods similar in shape and colour; it is a few days later than our *Early Morn*, growing rather taller, but possessing the robust constitution of its other parent (*Express*). For early sowing we can strongly recommend.

Price, .90 per qt. ;
.50 per pt. ; .25 per pkt.

Admiral Brand's Head Gardener writes:—"Snowdrop, a very fine early pea with abundance of fine dark, square pods, containing 9 peas in most pods; this, I consider, fills a want in giving the true marrow flavour of the old *Magnum Bonum*. It has a splendid constitution, and will certainly rank as one of the best early peas."—Mr. W. BACK.

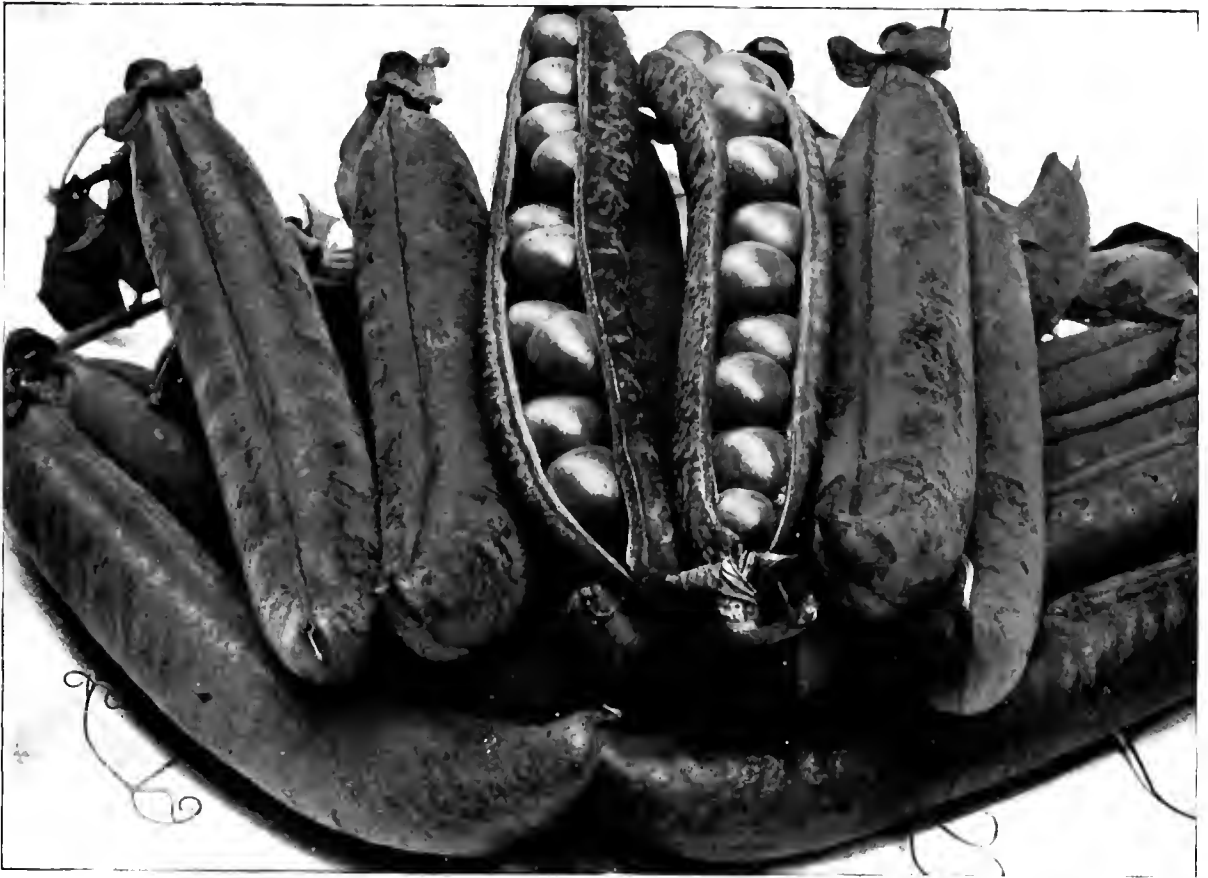

Carters Snowdrop Pea

Carters Daffodil (*Wrinkled*, 18 inches). — A dwarf and very prolific Pea with the highest commendations, being of the rich deep colour of the *Stratagem*, and a decided improvement upon *British Wonder* and *English Wonder*. It is a first early of bushy habit, about 18 inches. Its pods are larger than most of the early dwarf class, while the quality and flavour of the Pea is delicious.

Price, .60 per qt. ; .35 per pt. ; .20 per pkt.

SECOND EARLY GARDEN PEAS

Carters Market Gardener Pea

NOVELTY

Early Morn Duke of Albany

Carters Market Gardener

Alderman, or other popular market peas. We believe it will supersede all other market garden varieties.

Price, .90 per qt.; .50 per pt.; .25 per pkt.

"Your Market Gardener Pea bore an impressive crop of handsome, long-curved pods, containing nine or ten seeds, dark green in colour, but delicious when cooked. It attained to a height of 5 to 6 feet; sown on April 24th, gave first picking on July 19th." — Mr. W. STRUGNELL.

NOVELTY

Lightning Duke of York

Dawn

Carters Dawn (*Wrinkled, height 4½ feet*). Awarded The R. H. S.'s Certificate. — A very sturdy and hardy Second Early, supplanting such old types as *Champion of England* and *King of the Marrows*, etc., which are continually asked for because of their hardy nature.

For utility and heavy cropping it is a very valuable addition; pods medium colour.

Price, .90 per qt.; .50 per pt.; .25 per pkt.

"A Pea of great promise, which reached 5 feet in growth. A good cropper, the pods well filled with peas of first-rate flavour." — Mr. GEO. TAYLOR.

	Per qt.	Per pt.	Per pkt.
Favourite Marrowfat (<i>Wrinkled, 2 feet</i>). — Improved type of <i>Yorkshire Hero</i>50	.30	.15
Heroine (<i>Wrinkled, 2½ feet</i>). — Very rich green pods. Good cropper50	.30	.15

French Peas

Carters Petit Pois (*Delicatesse. Wrinkled, height 3 feet*). — This Pea has gained a great renown among the continental connoisseurs, who regard it as a delicacy. It is very prolific, producing long, curved pods in pairs. Price, .50 per qt.; .30 per pt.; .15 per pkt.

SECOND EARLY GARDEN PEAS — *Continued*

Carters International Pea

Early Morn

Duke of Albany

Carters International

Carters International (*Wrinkled, 5 feet*) (*see Photograph*). — **Award of Merit R.H.S.** This magnificent Pea is the result of a cross between *Early Morn* and *Duke of Albany*. Is quite distinct, both in shape of pod and habit; pods of a rich deep green, containing Peas of excellent size and flavour. Is undoubtedly the largest curved podded Pea at present offered to the public; is becoming the most famous second early.

Price, .60 per qt.; .35 per pt.;
.20 per pkt.

Admiral Brand's Head Gardener writes: — "*International*, surely the last word as far as size and quality are concerned; free cropping, hanging mostly in pairs, with fine, dark-marbled foliage, withstanding mildew well. Height, 5 feet. This is a Pea that must push its way to front rank; indispensable to exhibitors, many of the pods over 6 inches in length." — Mr. W. BACK.

Carters Daisy Pea

The Most Famous Second Early
Wrinkled Pea in Cultivation

Carters Daisy (*Wrinkled, 15 inches*). — **First-Class Certificate, R.H.S.** — This grand dwarf Pea has been before the public for some years, and still stands at the head, as confirmed by the great independent trial of Peas conducted by the R.H.S. Carters Daisy gained the First-Class Certificate given by this Society. Carters Daisy Pea is an early main crop, growing about 15 inches high. The haulm is very robust and the crop of giant, well-filled pods is enormous.

Price, .60 per qt.; .35 per pt.;
.20 per pkt.

"I advise those who have not yet grown this Pea to procure a quart of seeds from the raisers and sow as soon as the state of the soil will allow, and I will vouch for it they will not be disappointed." — Mr. J. MAYNE, of Bicton Gardens.

Carters International Pea

Carters "Quite Content" Pea

A Giant-Podded Main Crop, Wrinkled

Pods Longer and Larger Than Any Other Pea in Cultivation

THE HIGHEST HONOURS
AWARDED THIS PEA

The First-Class Certificate of the R. H. S.
Shrewsbury, 1912

THE FIRST PRIZE AND CHAMPIONSHIP
(Competition Open to the World)

THE LARGE GOLD MEDAL to a Separate
Exhibit, in Conjunction with Carters
other Vegetables

Carters Quite Content (*Main Crop, Wrinkled. Height, 5 feet*). — This grand Pea which has caused such a stir in the horticultural world is the outcome of a cross between *Alderman* and *Edwin Beckett*. In general character it resembles the former, but the pods are considerably larger than either parent. In our trials it has amply demonstrated its superiority, and when exhibited in the open class at Shrewsbury, easily secured the **First Prize**, and was pronounced by leading experts to be the finest Pea ever seen. It is exceedingly prolific, and the pods hang mostly in pairs.

Price, 1.00 per qt.; .60 per pt.; .25 per pkt.

We would respectfully draw our customers' attention to the following:—"The true and original Pea *Quite Content*, as sent out by Messrs. James Carter & Co., is a main crop variety, height 5 feet, foliage and pod deep green, pod 7 inches long, hanging mostly in pairs, and is quite distinct from all other Peas. We make this statement, as we are given to understand that a Pea, which has not all the claims of Carter's *Quite Content*, has been widely distributed, either by accident or design, thereby causing much correspondence and annoyance to the growers and Messrs. Carter alike. Messrs. Carters *Quite Content* was distributed this past season in their sealed packets, and is each year carefully reselected." — *The Garden*.

"*Quite Content* has been better than ever, wonderfully large pods, causing every person who sees it to exclaim, 'What a marvellous pea.' I have seen it at several first-class shows, and it has always been to the front." — Mr. W. A. COOK.

"The *Quite Content* Peas I had from you are wonderful this July." — Mrs. MEADOWS.

"I must tell you I took First Prize with your *Quite Content* Pea against strong competition at our Show." — Mr. G. VINES.

Carters Quite Content. Actual Size

PEAS — MAIN CROP

Carters Buttercup Pea

(See Photograph)

(Round Blue, $1\frac{1}{2}$ to 2 feet)

A hardy type of *Daisy* Pea; may be described as an early main crop; fine robust habit, long, well-filled pods, produced in pairs, remarkably free bearing. The large, deep-green seed, which is almost round, retains the sweet marrowfat flavour when cooked.

Price, .75 per qt.; .40 per pt.; .25 per pkt.

"A fine variety, the pods being literally packed with fine peas of excellent flavour." — Mr. E. BECKETT, Head Gardener to the Hon. Vicary Gibbs.

Carters Commonwealth (Wrinkled, 2 feet).

— We have a most perfect reselected stock of this popular Main Crop Pea. It is a strong grower and a prolific bearer of large exhibition pods of a fine, deep colour, besides being a first-class table Pea. Strongly recommended.

Price, .60 per qt.; .35 per pt.; .20 per pkt.

Carters Danby Stratagem, Reselected Stock (Wrinkled, $2\frac{1}{2}$ feet).

— Award of Merit, R.H.S. — A distinct improvement on the original *Stratagem*, having longer, straighter, and broader pods, very freely produced. The haulm is robust, and extends to a height of $2\frac{1}{2}$ feet, bearing a profusion of immense pods, frequently containing ten large, full-flavoured Peas.

Price, .75 per qt.; .40 per pt.; .25 per pkt.

Carters Reselected Duke of Albany

(Wrinkled, 5 feet). — A great advance on the original stock, the pods being straighter and longer, and should be grown by all who know the original variety. The Royal Horticultural Society, reporting, says: "Carters *Duke of Albany*, Reselected. This is a fine stock of this now well-known excellent variety."

Price, .75 per qt.; .40 per pt.; .25 per pkt.

Carters Buttercup Pea

Champion of England (Wrinkled, 5 feet). — Prolific and hardy; standard variety. See Dawn on page 50.

Price, .50 per qt.; .30 per pt.; .15 per pkt.

King of the Marrows (Wrinkled, 6 feet). — Much improved type of *Forty-fold*. See Dawn on page 50.

Price, .50 per qt.; .30 per pt.; .15 per pkt.

Stratagem (Wrinkled, $1\frac{1}{2}$ to 2 feet). — Original stock of this fine dark-green podded Pea.

Price, .60 per qt.; .35 per pt.; .20 per pkt.

PEAS — Main Crop — *Continued*

NOVELTY **Carters Harvestman** (*see Photo-Express Duke of Albany graph*) (*Wrinkled, 5 feet*).

Carters Harvestman **Award of Merit, R. H. S.**

This grand Pea, which is a cross between *Express* and *Duke of Albany*, possesses all the qualities of *Duke of Albany*, but the pod is distinct in shape, more regular in growth, not quite so tall, and altogether superior. Its appearance and cropping qualities are far ahead of either *Duke of Albany* or *Duchess*, or any of a similar class. We are confident that there is a great future before it. For market or garden it is a most profitable Pea.

Price, **.75** per qt.; **.40** per pt.; **.25** per pkt.

"*Harvestman*. Good main crop Pea, splendid cropper, with large, well-filled pods of good colour and fine-flavoured Peas. Height, 5 feet." — Mr. JAMES WHYTECK.

Carters Exhibition (*Wrinkled, 5 feet*). — Main crop. Seed large, green, and wrinkled. A magnificent Pea, the result of a selection from *Carters Model Telephone*, the selection having been made for the purpose of obtaining an Exhibition Pea possessing all the good points of that celebrated variety, but bearing even a larger and richer-coloured pod.

We claim that in every respect we have been successful, this superb variety **bears immense, rich, deep-green pods, perfect in shape, and well filled with large green Peas** of excellent flavour. Forty-one First Prizes reported last season

Price, **.60** per qt.; **.35** per pt.; **.20** per pkt.

Alderman (*Wrinkled, 5 feet*). — Very fine Pea of splendid quality; large, deep-green pods. (*See Quite Content on page 52.*)

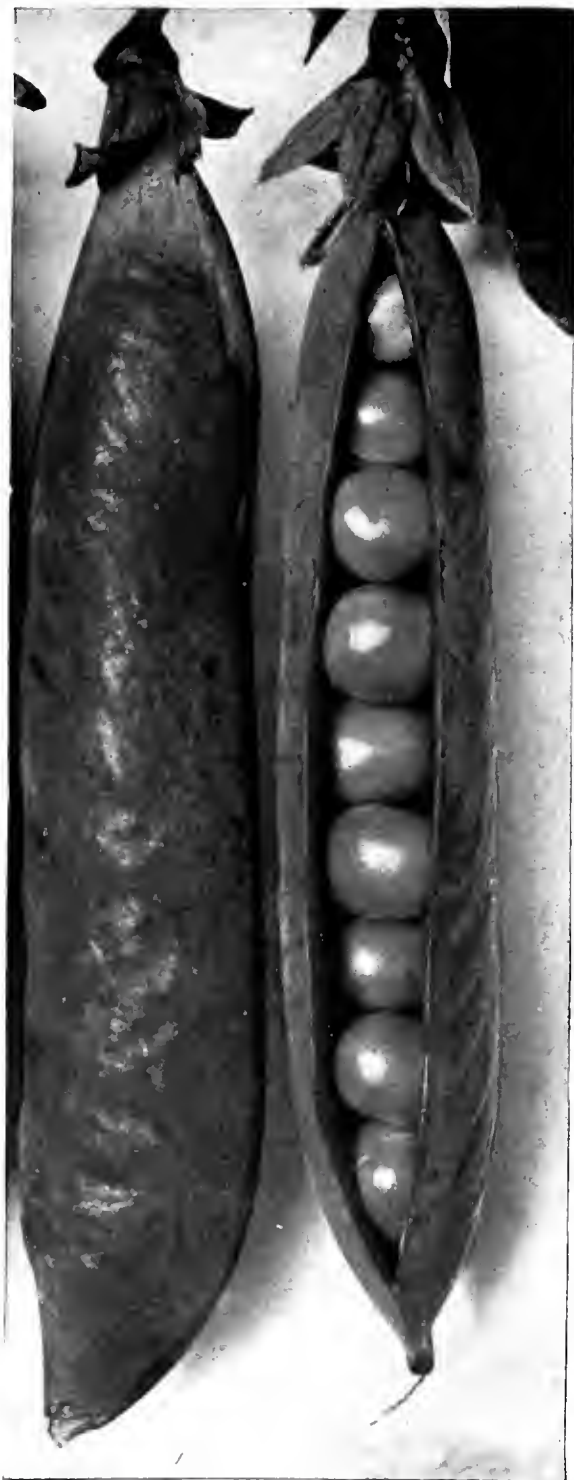

Price, **.60** per qt.; **.35** per pt.; **.20** per pkt.

Doctor McLean, Reselected (*Wrinkled, 3 feet*). — A fine Marrow Pea.

Price, **.60** per qt.; **.35** per pt.; **.20** per pkt.

Yorkshire Hero (*Wrinkled, 3 feet*). — Small pods but prolific bearer.

Price, **.50** per qt.; **.30** per pt.; **.15** per pkt.

Carters Harvestman Pea

Telephone (*Wrinkled, 5 feet*). — Large pods, prolific; suitable for light soils.

Price, **.50** per qt.; **.30** per pt.; **.15** per pkt.

NEW LATE WRINKLED PEA

Carters Dreadnought Pea

Carters Dreadnought (*Wrinkled, 3 feet*). (See Photograph.) This remarkable Pea has been selected by us as a grand addition to the late Main Crop Section. After careful comparison we fail to find a Pea that pleases us more as a variety to come in between the Main Crop and late Peas. It has large, bold pods, well filled with Peas of delicious flavour.

We have been instrumental in introducing many Peas which have become standard varieties, and we prophesy that this novelty is destined to take a permanent place, not only among amateurs, exhibitors, and connoisseurs, but also as a profitable market Pea. Its large, deep-green, well-filled pods and its resistance to mildew and drought are its distinguishing characteristics.

Price, .75 per qt.; .40 per pt.; .25 per pkt.

Carters Model Telephone (*Wrinkled, 5 feet*). — A reselection from *Telephone*, a main crop wrinkled sort, which bears to-day a world-wide reputation. It is remarkably prolific, bearing large pods of very attractive appearance. For soils of a light nature we strongly recommend this variety.

Price, .75 per qt.; .40 per pt.; .25 per pkt.

Carters Model Telegraph (*Round Seeded, 5 feet*). — A selection from our original *Telegraph*. Very valuable as a table Pea, on account of its size and fine, dark colour. Seed round and of a deep green, which is retained when cooked.

Price, .75 per qt.; .40 per pt.; .25 per pkt.

LATE WRINKLED PEA

Carters Latest Giant

half a bushel from a very short row; some of the pods almost 6 inches long, and eleven Peas in a pod was quite common. Another remarkable thing about this variety was that, although cropping so freely, it continued to grow and produce flowers and seed pods; in fact, at this time everything points to a good picking from this row in November. I may add that the seed was sown on June 19th, and beyond deep digging and early mulching no attention was given it. Had feeding been resorted to, the pods would possibly have been larger. As it was, the height was 4 feet, while very few single pods were produced. — F. R. CASTLE, in *The Gardener*.

Carters Latest Giant

NOVELTY

Gladstone Exhibition
Carters Latest Giant

Carters Latest Giant (*Wrinkled, 4 feet*) (see *Photograph*). This splendid late Pea is the outcome of a cross between *Gladstone* and *Exhibition* and has been exhibited at various Royal Horticultural Society Shows under Seedling No. 241. It is a grand selection, possessing the free podding and strong habit of *Gladstone*, but bearing handsome, well-filled pods very much larger than that excellent variety. The pods contain large, deep-coloured Peas. It is fit for exhibition and unequalled for market. Is well described by the name *Latest Giant*. Price, .75 per qt.; .40 per pt.; .25 per pkt.

Autocrat (*Wrinkled, 4 feet*). — Excellent cropper, deep-green pods. Price, .60 per qt.; .35 per pt.; .20 per pkt.

Latest of All (*Wrinkled, 3 feet*). — A very prolific Pea, a later type of *Autocrat*. Pods like *Ne Plus Ultra*. Price, .50 per qt.; .30 per pt.; .15 per pkt.

Ne Plus Ultra — Carters reselected (*Wrinkled, 6 feet*). — This is a highly selected stock of the old favourite variety; it is exceedingly prolific, bearing blunt-ended pods with peas of very fine flavour. Splendid for late crops. Price, .60 per qt.; .35 per pt.; .20 per pkt.

The Gladstone — Carters reselected stock (*Wrinkled, 4 feet*). — A fine late Exhibition variety, bearing long sickle-shaped pods, dark in colour, very prolific. Price, .75 per qt.; .40 per pt.; .25 per pkt.

Under date October 26, 1912

In many gardens this season the Pea crop has been anything but satisfactory, but with the return of more seasonable weather during part of August and throughout September our late varieties seem to have determined to grow again in a normal fashion. Quite the best of them was *Latest Giant*, sent out by Carters, of Raynes Park. It proved to be a strong grower, quite outclassing four others grown alongside it under similar conditions. On October 9th we picked nearly

LATE GARDEN PEAS — *Continued*

Carters Michaelmas

(Wrinkled, $2\frac{1}{2}$ feet)

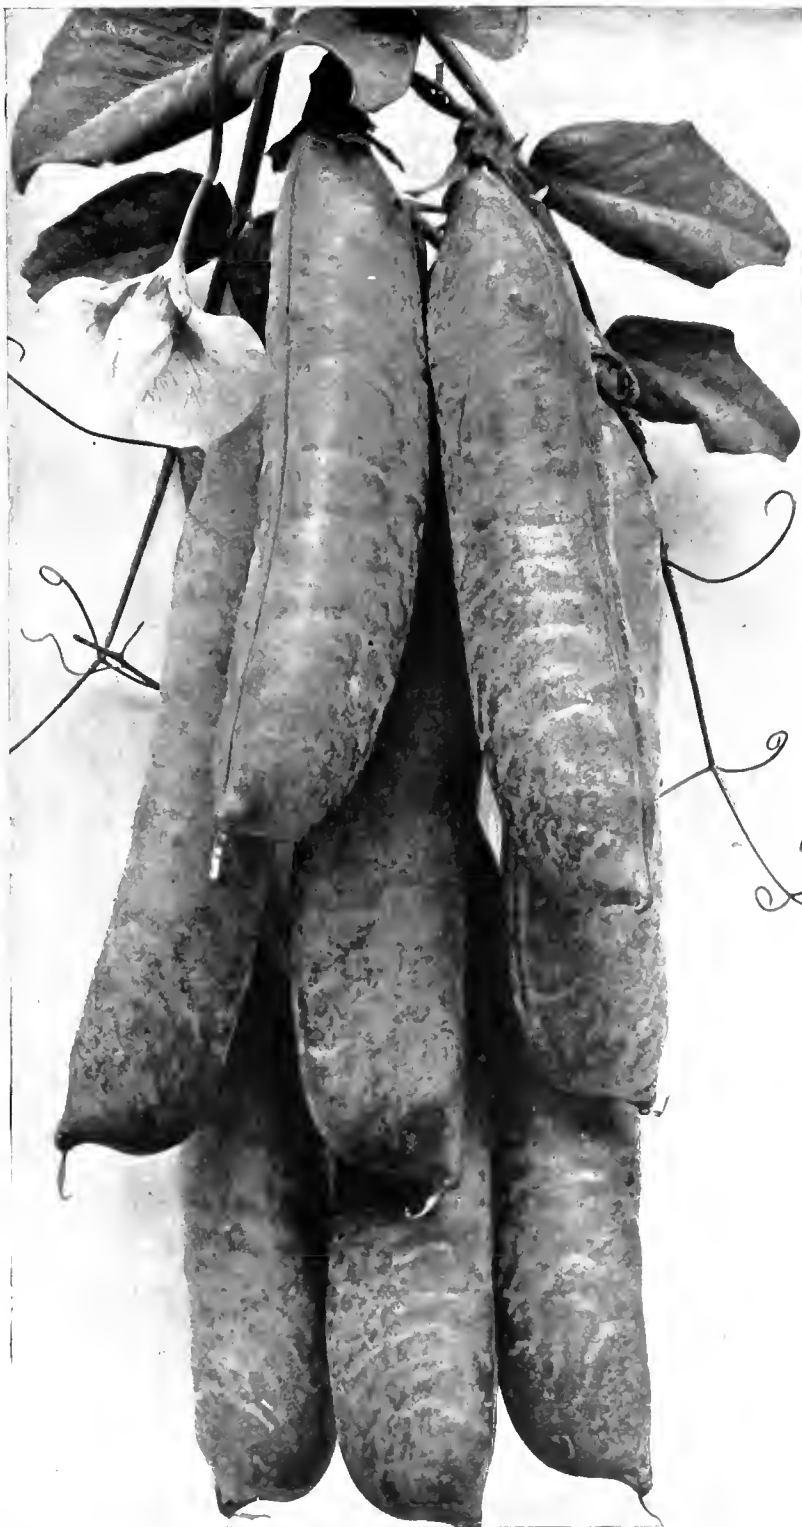

(See Photograph)

This grand Pea quite oversteps the boundary hitherto set by the times and seasons, and is absolutely distinct. Late varieties of Peas of past fame have been late mainly by reason of their strawy character. The constitution of Carters *Michaelmas* Pea is not run through in straw, but is of a fixed dwarf, bushy growth, which holds back its natural force and throws it into the pods; consequently, being very prolific, its colour in pod is of the deepest green, and are large and well filled. We have proved this Pea to possess a reserve strength which will enable it to resist drought and mildew to a degree hitherto unknown in a Pea. The R.H.S. in its report of trials at Wisley, says: "Carters *Michaelmas*. Height, $2\frac{1}{2}$ feet; haulm and pods very dark green; very sturdy; pods in pairs; heavy crop."

Price, .75 per qt.; .40 per pt.;
.25 per pkt.

"Carters *Michaelmas* is still to gather — September 21st — and what I said last year I maintain now, we shall have Peas till after Michaelmas, and this variety produces Peas of the very best quality." — Mr. W. A. Cook.

We were awarded the gold medal at the 1912 Exhibition of the Southampton Royal Horticultural Society for a collection of vegetables of 100 distinct varieties.

Carters Michaelmas Pea

Cultivation of the Garden Pea. — The smooth, round-seeded extra early varieties of peas are generally the very first to be sown in spring, and should be sown as soon as the ground is fit to be worked. The wrinkled sorts are not so hardy, and should not be planted before the ground has warmed up to a certain degree. The tall varieties require brush, or other suitable support, but by selecting sorts that do not grow over 2 feet the necessity of providing brush may be eliminated. A careful selection of varieties and a frequent planting for succession will insure a continuous crop of peas from June until the early frosts. The seed should be sown in rows 3 feet apart and 3 inches deep, and should be planted at the rate of one quart of the smoother sorts to 100 feet of drill and one quart of the wrinkled varieties to 80 running feet. Cultivate similarly to corn or beans. The taller sorts may be planted in double drills and brush placed between for a support. For best results all garden peas require good, fertile soil and moisture. Great success has been attained by the use of only the very earliest dwarf peas, making plantings ten days apart from early spring until the last of July.

PEPPERS

	Per pkt.	Per oz.		Per pkt.	Per oz.
Pepper, Bell or Bull10	.35	Pepper, Sweet Mountain10	.30
“ Chinese Giant10	.35	“ Ruby King10	.30
“ Large Squash10	.40	“ Small Red10	.40
“ Long Red10	.40	“ Chili10	.40
“ Neapolitan10	.40	“ Mixed Sorts10	.40

Sow in the hotbed or greenhouse in March or April and transplant to the open ground when all danger of frost is over. Plant in rows 3 feet apart and 18 inches between the plants; cover the seed when sowing with about $\frac{1}{4}$ inch of soil.

PUMPKIN

Cultivation of Pumpkins. — After all danger of severe frosts has passed the seed may be sown in hills 8 feet apart each way, or in the corn field, using 3 or 4 seed with that of the corn in every fourth or fifth hill. Do not plant different varieties of Pumpkin together, as they are very apt to become mixed, although they do not easily hybridize with squash or other vines. One ounce will plant twenty-five hills, 3 pounds will plant an acre.

Sweet or Sugar. — An unsurpassed variety for making pies. The pumpkins are small, but they are very sweet, fine grained, and of the best quality. The skin is a deep orange in colour.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

Winter Luxury. — A smooth, yellow-skinned, round Pumpkin, with a thick flesh of excellent flavour. It is a splendid keeper, with a russet-yellow coloured skin.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

Large Cheese. This is a fine sort for either stock or table purposes. Colour creamy buff, flavour very sweet, shape flat, and very productive.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

Mammoth King. — Often produces a Pumpkin weighing over 100 pounds. It is a fine keeper and is used in winter as a figure in displays of a rustic nature. It is a fine stock-feeding variety.

Price, .10 per pkt.; .20 per oz.; .50 per $\frac{1}{4}$ lb.

Connecticut Field. — Unrivalled for stock-feeding and produces wonderfully well.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

POTATOES

The following varieties of potatoes, all of which are Maine grown, and true to name, are as free from disease as science will allow. When ordering please state the variety and exact quantity desired. (Ten bushels are required to plant one acre.)

Beauty of Hebron.
Early Norther.

Early Rose.
Irish Cobbler.

Green Mountain.
Carman No. 3.

New Queen.
Delaware.

Pk. .60; Bu. 2.00; Sack of 2 $\frac{3}{4}$ Bu. 4.75

Prices F.O.B. Boston. All subject to the market changes.

We also remind our customers that as potatoes are of a perishable nature we can assume no responsibility, and ship only at purchaser's risk. We of course exercise the greatest care in packing and shipping, so that the tubers may be protected from sudden changes in the temperature.

Cultivation of Potatoes. — Under the right climatic conditions any good fibrous soil will produce potatoes, but a better quality will result from a production in a good sandy loam. Make furrows of good depth, about 3 feet apart, apply a good dressing of commercial fertilizer or well-decayed stable manure to each drill; cover this slightly and plant good-sized pieces of the potatoes, each containing two or three eyes, 15 inches apart in the furrows. Then cover the seed to the depth of 2 inches. Begin to cultivate when the plants are up, and at each hoeing thereafter bring additional soil about the plants.

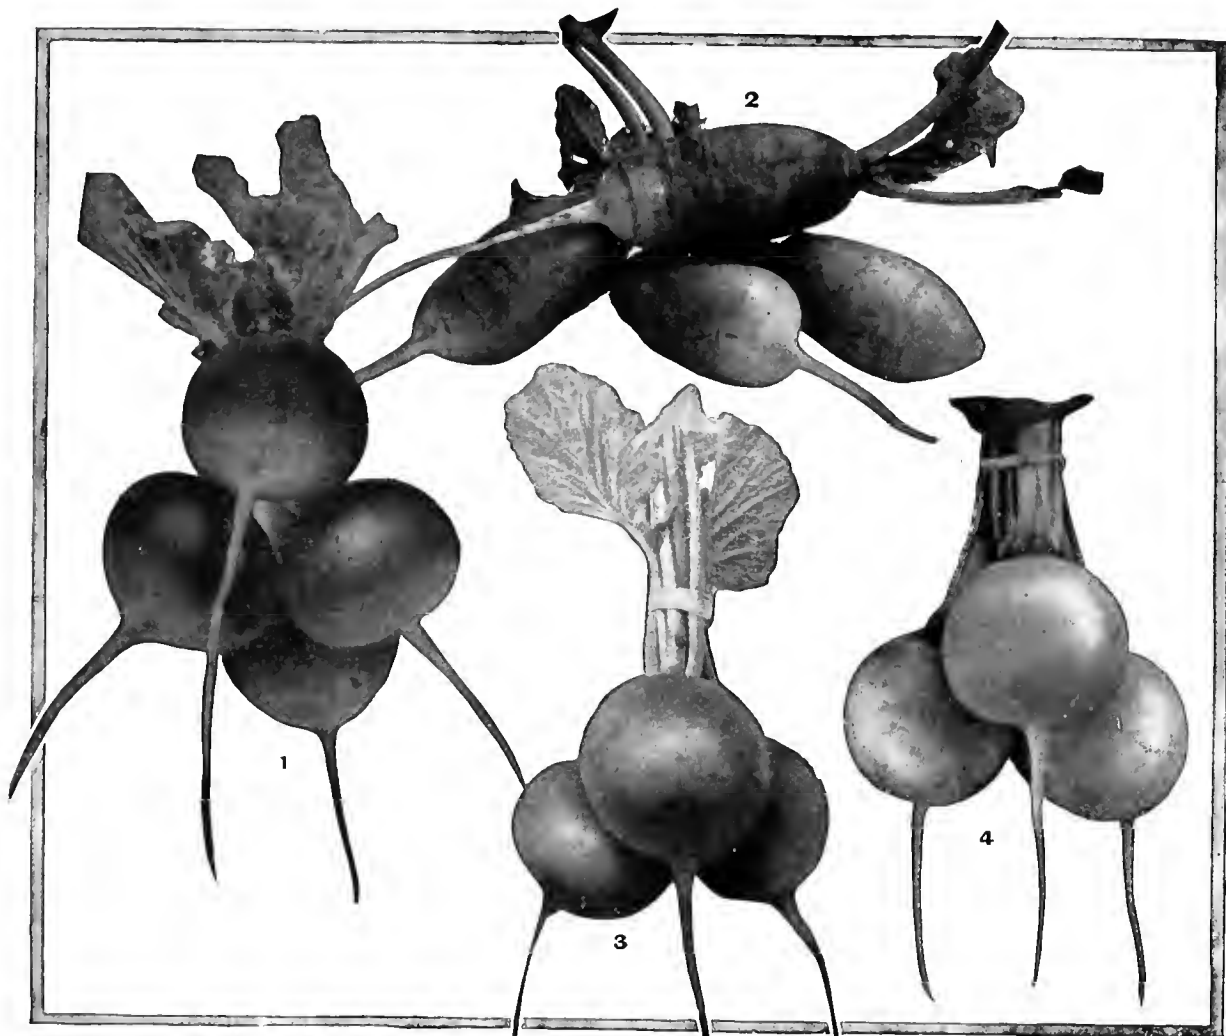

SALAD PLANTS

Every one should enjoy the pleasure of a salad several days a week, at all events during the summer season, with but trifling expense. It is a wholesome addition to more substantial diet, rendering it grateful to the palate. We will enumerate a few of the salad plants, with some notes on their cultivation.

	Pkt.	Oz.	$\frac{1}{4}$ lb.
American Land or Upland Cress may be sown at any time during spring and summer out of doors10	.20	.75
Beet. — See pages 5 and 6.			
Celeriac, Carter's Improved (or turnip-rooted Celery). — Pure white root, refined flavour. — See page 25.10	.25	.90
Chervil is used for seasoning soups and mixing in salads. It is grown from seed sown in spring and summer for successional crops.10	.25	
Chicory. — See page 26.			
Whitloef is a distinct variety of Chicory10	.25	.90
Cardoon. — See page 4.			
Clary , used for flavouring soups10	.30	
Corn Salad or Lambs' Lettuce. — See page 4.			
Cress. — See page 26.			
Cucumber. — See pages 27 and 28.			
Dandelion. — See page 31.			
Endive. — See page 31.			
Lettuce. — See pages 33 to 35.			
Mustard. — See page 26.			

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Nasturtium , of which the green seeds make a delightful salad. The flowers are often used in salads and the leaves are frequently pickled10	.15	.50
Purslain is a succulent plant and raised from seed, which may be sown in March on a warm border or bed, and treated the same way as Chervil10	.35	
Radish. — See pages 59 to 61.			
Rampion. — A plant producing a spindle-shaped root of light colour and agreeable flavour. It may be raised from seed if sown in a warm aspect. Water well in dry weather10	.35	
Scorzonera, Carters Improved. — The roots are eaten cooked like those of the Salsify, the leaves can be used as a salad. — See also page 61.10	.25	.90
Shallot Seed. — Jersey Red Skinned10	.25	
Tomato. — See pages 66 to 68.			
Watercress. — Watercress will succeed only in very damp soils or borders of streams where the roots are partially submerged in water. Plant the seed a quarter of an inch deep and keep well weeded until they make a strong growth. One ounce of seed will sow 100 feet of drill10	.50	1.50

NEW AND DISTINCT RADISHES
VALUABLE FOR FORCING AND EXTRA EARLY OUTDOOR WORK

No. 1. Carters Extra Early Round White Tipped.—An exceedingly attractive variety. Crimson scarlet with white base. Is very quick in growth, produces small top, and flesh is of the finest quality.
Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

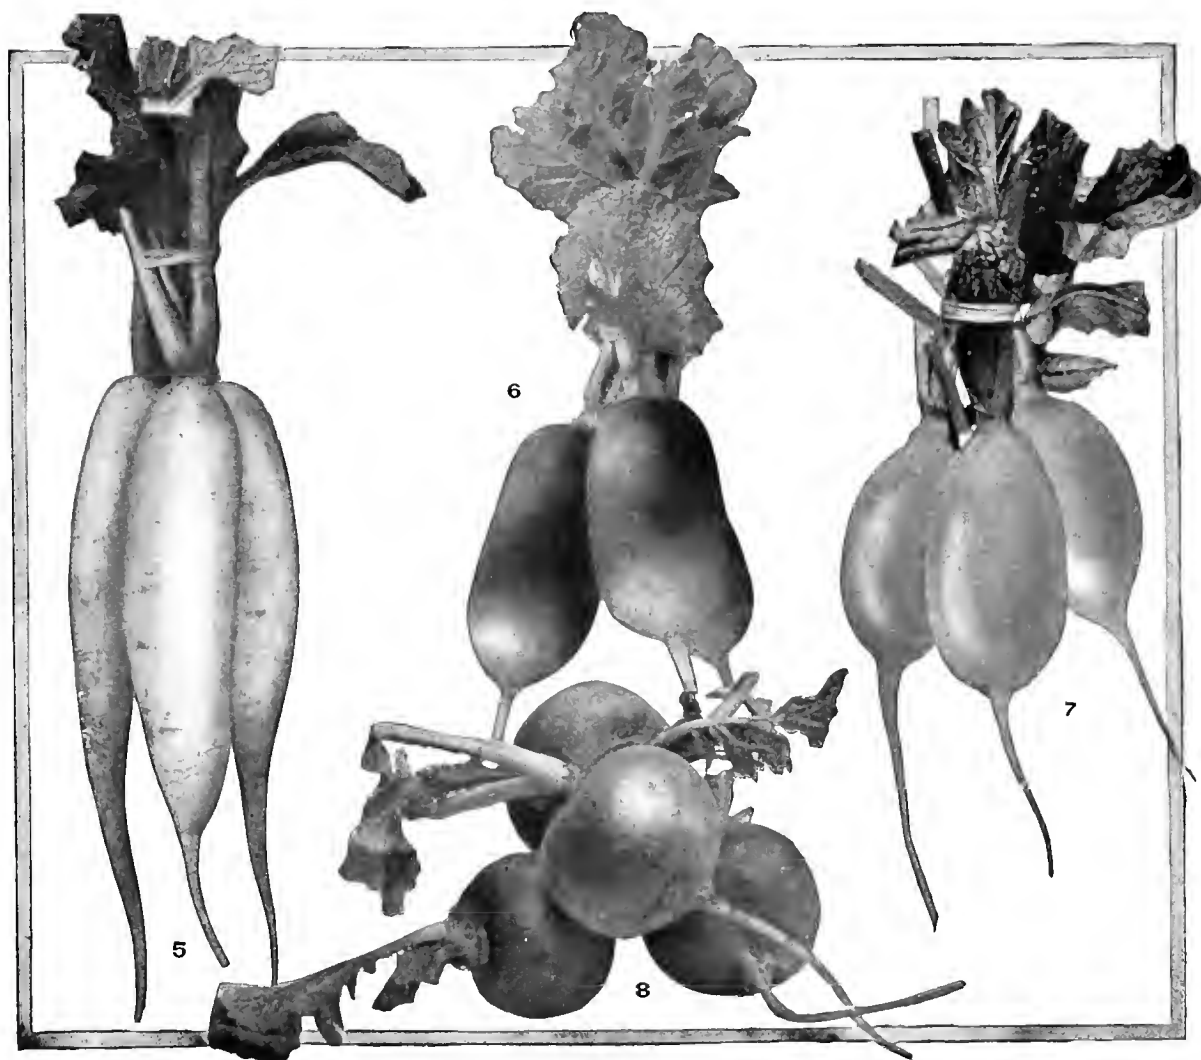

No. 2. Carters Sixteen Days.—A new and remarkably pretty introduction. For quality and forcing it has no equal, being fit to pull in sixteen days from date of sowing. Small and oval in shape, bright crimson colour, with ivory-white tip.
NOVELTY
Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

No. 3. Carters Extra Early Scarlet Radish.—The most rapid-growing and perfect-shaped scarlet Turnip Radish. Small topped and perfect quality. Sown with Carters *Lightning White* makes a most perfect combination. Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

No. 4. Carters Lightning White Round.—A small white marble Radish of lightning growth; excellent quality, extremely small topped, the *quickest Radish* ever introduced. Sown in frames or on a warm border it is fit for the table in fourteen days.
NOVELTY
Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

Carters Crimson Forcing Olive.—Splendid rich colour, very rich growing, having small top; flavour sweet and delicate. Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

NEW AND DISTINCT RADISHES
VALUABLE FOR FORCING AND EXTRA EARLY OUTDOOR WORK

No. 5. Carters Icicle.—So named because of its unique transparent whiteness, attractive appearance, and freshness early in the season. The earliest long white Radish, of extraordinary crispness and tenderness. We offer this as a companion to our *Long Forcing Scarlet* Radish.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

No. 6. — Carters Delicatesse. — An attractive breakfast dish. Its peculiar shape, crisp flesh, and nutty flavour give this fine selection a distinct advantage. Suitable for forcing.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

No. 7. — Carters Extra Early White Olive. — This Radish has been specially selected for its crisp texture and fine flavour. It produces very little top and matures with remarkable rapidity.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

No. 8. — Carters Crimson Marble. — A quick-growing, globe-shaped Radish of good colour and flavour. *Will not force.*

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

Carters Mixed Extra Early Olive. — This mixture of all the quickest-growing Olive Radishes makes a most attractive dish. When pulled the different colours make a charming effect for the table.

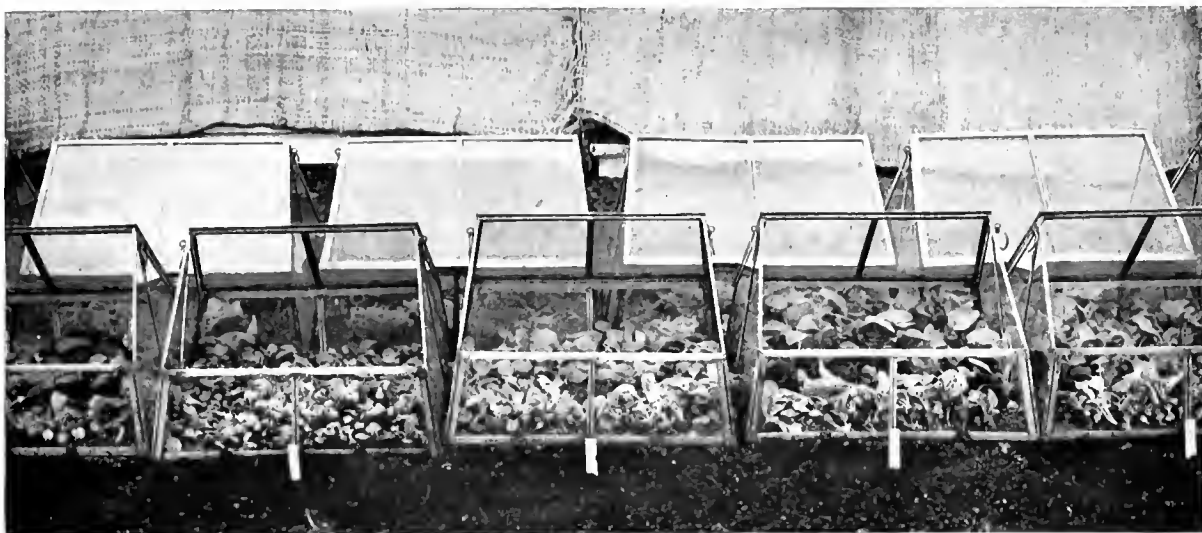

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

Carters Long Forcing Scarlet. — A great advance on the old varieties. The very best long scarlet Radish for early work. Flesh crisp and tender.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

RADISH — Continued

The Cultivation of Radish. — Sow on a moderate hotbed in January, February, and March, also every ten days during the spring and summer in well-prepared places in the open. The Radish thrives best when quickly grown in a rich, deep, moist soil, kept well watered during the hot weather. Winter varieties should be planted about the middle of July; store the roots during the winter in a cool pit or cellar and cover them well with earth. One ounce of seed will sow 100 feet of drill; 10 pounds will plant an acre.

Comparative Tests of Radishes for Forcing in Carters Trial Grounds at Raynes Park

Carters French Breakfast. — (Introduced by our house from Paris years ago.) We recommend all connoisseurs of a fine appetizing breakfast dish to grow only the real original type.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

Carters Early Round White. — A small, very quick-growing variety, having a very sweet and delicate flavour.

Price, .10 per pkt.; .20 per oz.; .65 per $\frac{1}{4}$ lb.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Scarlet Olive Shaped. — Of bright, attractive appearance and good flavour	.10	.15	.45
Carters White Olive Shaped. — Fine flavour; flesh clear and crisp	.10	.15	.45
Red Turnip. — Rich scarlet	.10	.15	.45
White Turnip. — Fine flavoured	.10	.15	.45
Long Black Spanish. — For winter use; large and distinct	.10	.15	.50
China Rose, Oval Shaped	.10	.15	.45

RHUBARB

Cultivation of Rhubarb. — The seed should be sown in the spring, in drills about 1 foot apart, and the plants thinned to 5 inches apart. In the spring following, transplant to their permanent bed 4 feet apart each way, cultivate well, using manure freely. One ounce of seed will produce about one thousand plants.

	Per pkt.	Per oz.
Myatt's Linnæus	.10	.30
Mixed Varieties	.10	.30

SALSIFY OR VEGETABLE OYSTER

Cultivation of Salsify and Scorzonera. — The ground should be well trenched and manured during autumn. Sow during March and April in drills about 15 inches apart. Thin out the plants to from 6 to 8 inches apart for Salsify, but allow rather more room for Scorzonera. The roots should be taken up in November and stored in the same manner as Carrots.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Mammoth. — A greatly improved form of the ordinary Salsify	.10	.30	1.00
Scorzonera, Carters Improved. — The roots are eaten cooked like those of the Salsify, the leaves can be used as a salad.	.10	.25	.90

SEAKALE

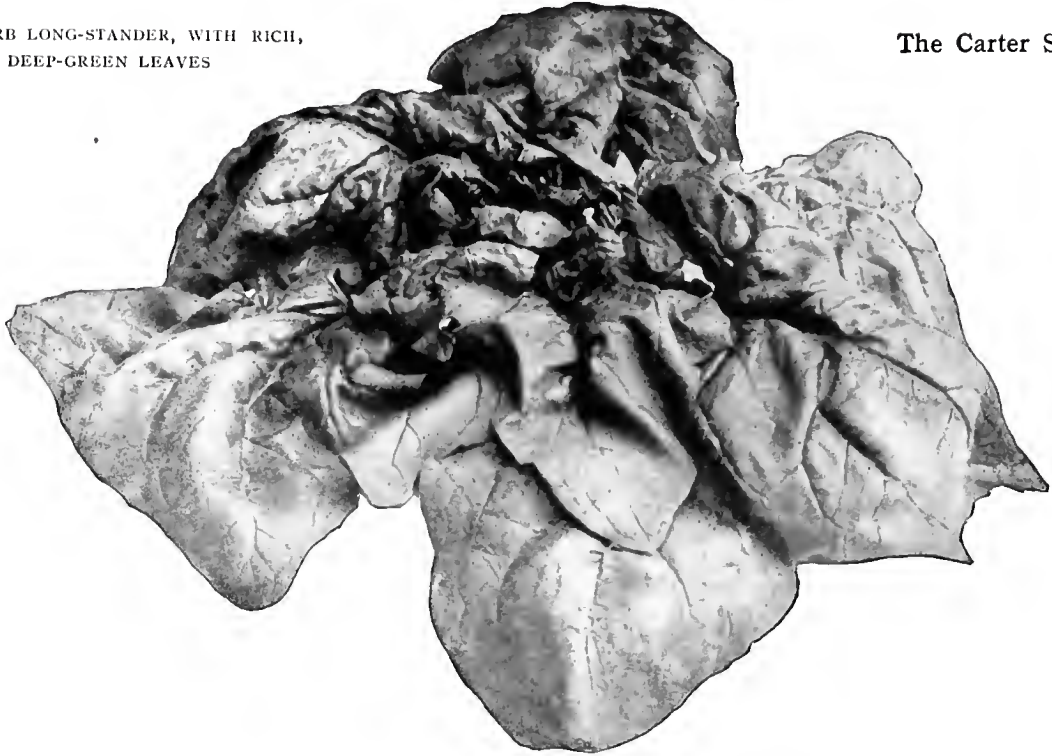

Cultivation of Seakale. — These tasty shoots are blanched and used similarly to asparagus. They should be sown in drills early in the spring, after the ground is thoroughly warm, covering the seed about 1 inch. Thin to 6 inches, and the following spring transplant to rows, leaving about 2 feet between each plant. One ounce of seed will plant 75 feet of drill.

	Per pkt.	Per oz.
Lily White	.25	.50
Ordinary Seakale	.10	.30

SPINACH

A SUPERB LONG-STANDER, WITH RICH,
DEEP-GREEN LEAVES

The Carter Spinach

The Carter Spinach (*see Photograph*). — This fine Spinach was sent for trial to the Royal Horticultural Society, and was given an *Award of Merit*. Our photograph illustrates in a remarkable manner the solid substance of the leaves; and the whole plant, which is very fine in colour, is of far greater duration than ordinary Spinach. Awarded the Large Gold Medal with Carters other vegetables, Shrewsbury, 1912.

Price, **.10** per pkt.; **.15** per oz.; **.50** per $\frac{1}{4}$ lb.

	Per pkt.	Per oz.	Per $\frac{1}{4}$ lb.
Carters Giant-leaved Winter. — A large, thick-leaved form of the hardy prickly Spinach. Useful on cold, backward soils10	.15	.50
Carters Market Favourite. — A well-known variety with leaves of great substance10	.15	.50
New Zealand. — One planting on rich soil will give masses of healthy green foliage to last through the summer season10	.25	.85
Carters Long-Standing. — Stands well when others run to seed10	.15	.50
Carters Summer. — Thick leaves of great substance, stands longer than most others10	.15	.50
Perpetual Spinach, or Spinach Beet. — Leaves used in autumn as a substitute for Spinach10	.15	.50
Prickly, or Winter. — For winter or spring use, very hardy10	.15	.50
Thick-leaved Round. — Improvement on the old round variety10	.15	.50

The Cultivation of Spinach. — Sow Round Spinach in succession from April to June, and Prickly or Winter Spinach during August and September to stand the winter. These plants should be well mulched and protected from the first approach of severe weather. Sow New Zealand Spinach in March in heat and transplant about the end of May, setting the plants about 3 feet apart. This seed should be well soaked in hot water before sowing. One ounce of ordinary spinach seed will plant 100 feet of drill; 12 pounds to the acre in drills. One ounce of New Zealand spinach will plant 50 feet of drill.

SQUASH

Cultivation of Squash and Vegetable Marrow. — Never sow the seed in the spring until lasting warm weather is an absolute certainty. A warm, mellow, well-manured soil suits them best. The seed should be planted in hills about 4 feet apart each way for the bush varieties and marrows, and 10 to 12 feet apart each way for the running varieties. Plant 12 to 15 seeds in each hill so as to offset the loss by insects and weakness. When all danger of such losses is past, thin to 3 or 4 plants to the hill. Winter sorts may be planted with corn, using four or five seeds in every fourth or fifth hill at the same time as the corn is planted. One ounce of seed will plant fifty hills of the early sorts and thirty hills of the later varieties, five to six pounds to the acre.

EARLY BUSH VARIETIES

Giant Summer Crookneck. — Without a doubt this is the most popular summer squash grown. The flesh is thick, yellow, and of splendid quality.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

Early Mammoth White Bush. — A superb sort for early use, and is considered the best scalloped squash produced.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

Golden Custard. — A fine, large, yellow squash, similar in shape to the Mammoth White Bush.

Price, .10 per pkt.; .15 per oz.; .45 per $\frac{1}{4}$ lb.

RUNNING VARIETIES FOR AUTUMN AND WINTER CROPS

Delicious. — A winter squash considered by squash raisers to be a very superior sort, even surpassing the Hubbard in its finished qualities. Its colour is an even shade of green, and the flesh is a deep orange; it ripens off with a compact grain, dry throughout, and with a very sweet, tasty flavour.

Price, .10 per pkt.; .25 per oz.; .75 per $\frac{1}{4}$ lb.

Boston Marrow. — A fine, reddish-yellow skinned autumn variety. The flesh is well flavoured, of a deep-orange colour, and well grained, with fine keeping qualities.

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.

Essex Hybrid or Hard Shell Turban. — A result of the hybridizing of American Turban and Hubbard, combining all the excellent qualities of both these superior sorts. It has sweet flesh of a very fine grain and rich, tasty flavour. The skin and flesh are both of a richly coloured orange. Considered a fine keeper.

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.

Improved Hubbard. — This is the most popular and reliable old-time winter squash raised. The skin is coloured a dark green, with a fine-grained, dry, very rich bright orange flesh of a fine flavour. Averages in weight from 10 to 20 pounds and keeps well. The shell is very hard.

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.

Golden Hubbard. — Very similar to the Improved Hubbard, except in colour, which is a reddish yellow

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.

Mammoth Warty Hubbard. — A strong-growing vine, producing a great number of dark-green warted squashes similar in every other way to the Improved Hubbard and very much larger.

Price, .10 per pkt.; .15 per oz.; .50 per $\frac{1}{4}$ lb.

VEGETABLE MARROW

COMPARATIVE TESTS OF VEGETABLE MARROW IN OUR TRIAL GROUNDS

Carters Long Green Striped
Muir's Prolific

Pen-y-byd

Carters Trailing White
Moore's Green Striped

Carters Epicure (*see Photograph*). — We consider this the best flavoured variety in cultivation. In order to enjoy the full delicious flavour, the fruit should be cut when about eight inches in diameter. It is a splendid forcing variety of a very prolific character.

NOVELTY

Price, .35 per pkt.

Carters Trailing White. — One of the quickest-growing varieties we know of; the fruit will extend to a great length whilst retaining all the tenderness of small young Marrows.

Price, .15 per pkt.

Carters Long Green Striped. — A giant prolific variety, the very best for gardens that lie in a bleak and exposed position.

Price, .15 per pkt.

Muir's Prolific. — A distinct variety, with small, globular fruit, creamy white in colour, and solid flesh.

Price, .15 per pkt.

Pen-y-byd (The best in the world). — A round fruiting Marrow, creamy-white in colour, very superior.

Price, .15 per pkt.

New Marrow, Carters Epicure

Moore's Vegetable Cream. — Very fine variety, of creamy colour and of delicious flavour.

Price, .15 per pkt.

Moore's Green Striped. — A small green Marrow of excellent flavour.

Price, .15 per pkt.

Bush or Cluster. — A useful variety in small gardens.

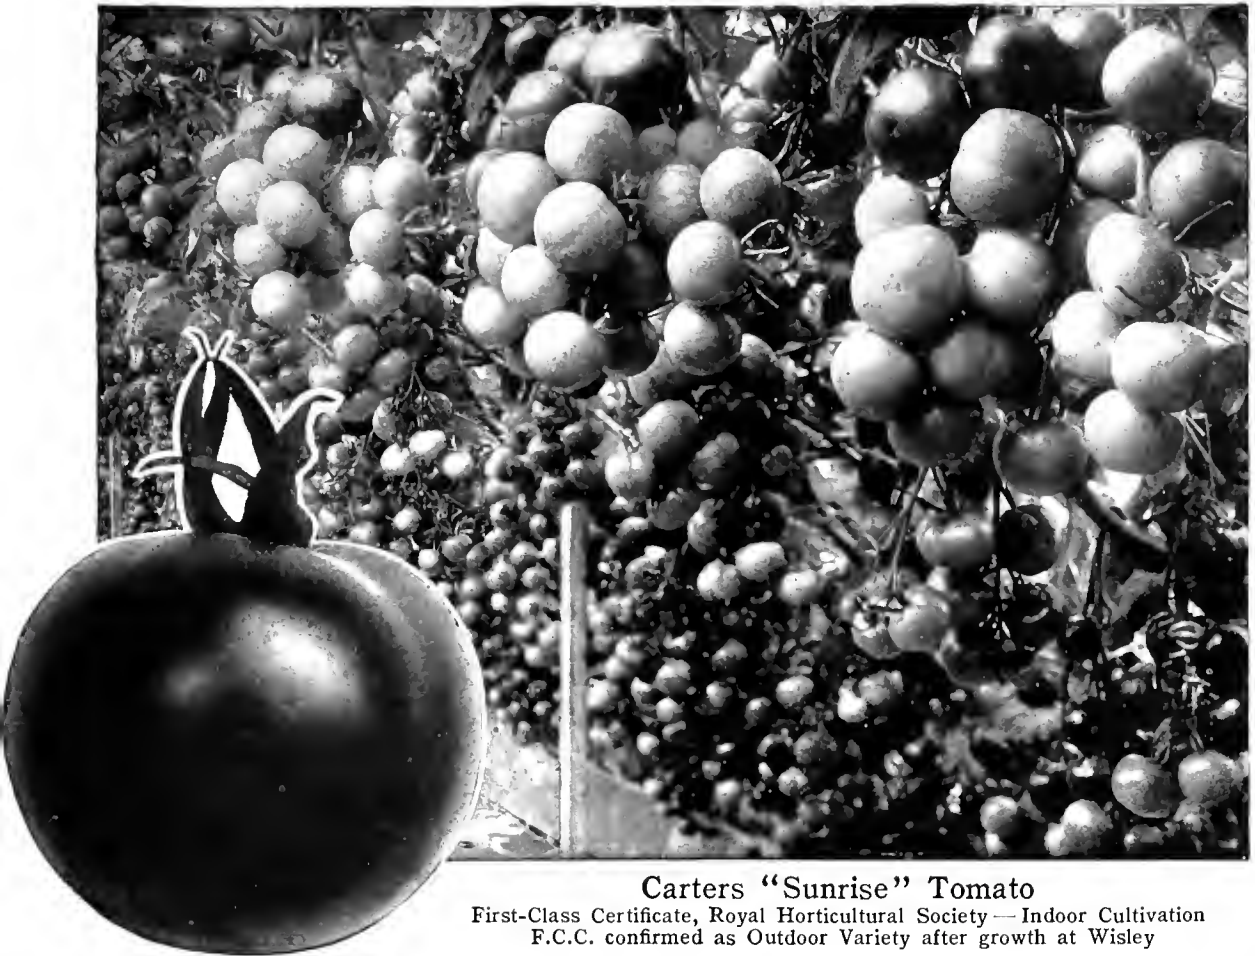

Price, .10 per pkt.

Large Cream. — Cream-coloured fruit, growing to large size.

Price, .10 per pkt.

The Vegetable Marrow Squashes are of an English production, but should be more generally used in this country, as they are far superior in every way to our Summer Squash. They will grow well anywhere with just a little care, and the results are more than satisfying. When the fruit is from half to three quarters grown prepare similarly to Squash or slice and fry, like Egg Plant, and the superiority in both cases is remarkable. All the varieties of Marrows that we offer for planting in America this year were planted with great results last year, and we predict a great future for this vegetable here, judging from the remarks of satisfaction on all sides.

TOMATO

Carters "Sunrise" Tomato

First-Class Certificate, Royal Horticultural Society — Indoor Cultivation
F.C.C. confirmed as Outdoor Variety after growth at Wisley

During an extensive trial of Tomatoes made by the Royal Horticultural Society, seventy-one varieties were sent in from all the leading houses. The only First-Class Certificate was given to Carters "Sunrise," and the following note is attached to the report: — "Tomatoes have reached such perfection that it is now very difficult to raise a variety superior to those already in commerce. In this trial only one stood out as being of exceptional value, viz., 'Sunrise.'"

It is some time since such a high honour has been granted to a Tomato.

The chief points in Sunrise are —

Its Earliness. — It ripens days earlier than most varieties.
Its Cropping Properties. — See Photographs and Testimonials.
Its Healthy and Robust Constitution. — No trace of Disease.

Its Solid but Delicate Flesh. — Contains very few seeds and practically no eye.
Its Evenness of Size as a Dessert Fruit.
Its Bright Scarlet Colour and rich Acid Flavour.
Its equal value for Indoor or Outdoor Cultivation.

Included in the Large Gold Medal Exhibit, Shrewsbury, 1912

CARTERS TESTED SEEDS, INC., Boston, Mass.

Dear Sirs: I grew your Sunrise Tomato this year and wish to say that it is the best and earliest tomato I have ever grown.

The seeds were sown the same day with four other varieties and all treated alike, and I was picking splendid, well-formed ripe fruit from your Sunrise plants fifteen days earlier than any of the other varieties.

(Signed) ALEXANDER MICHIE, Plymouth, Mass.

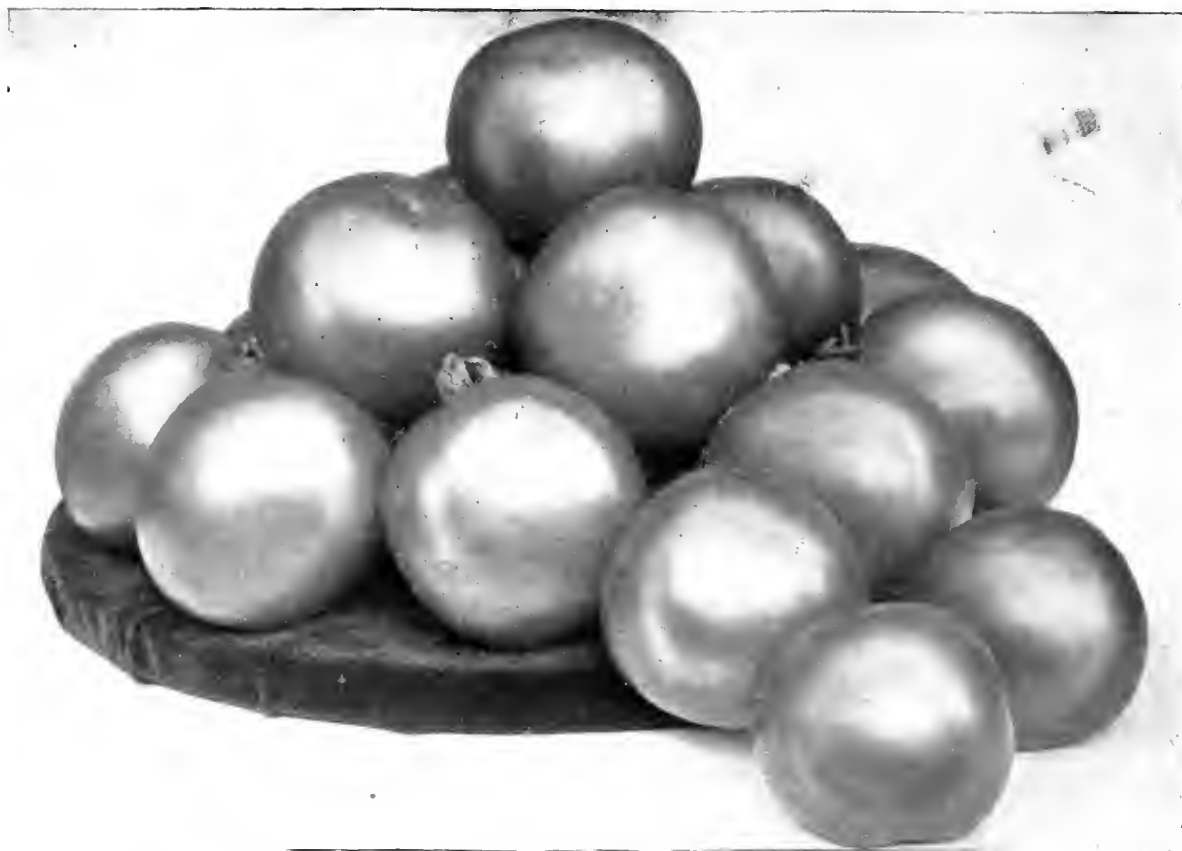

"We grew fifty plants of Sunrise Tomato in pots here. It is a good cropper, sets very freely, and bears fine medium-sized fruits of splendid quality and flavour."—Mr. J. WHYLOCK.

"A marvellous cropping variety, and destined to become the Tomato for market growers especially. I never saw its equal for cropping, and the fruits are just the size the market growers require—medium, with good appearance and no waste."—Mr. B. ASHTON.

"I have grown your Sunrise Tomato since first it came out, and I consider it the best Tomato ever sent out. It is earlier than most, no trouble to set, nice even size, and very heavy cropper; above all, the quality is unsurpassed."—Mr. H. W. BLAKE.

Carters "Sunrise." — The Finest Tomato for Indoor and Outdoor Culture
Price, .75 per pkt.; 5.00 per oz.

TOMATO — *Continued*

Carters Golden Sunrise

Carters Golden Sunrise. — Although there seems to be a general prejudice against yellow tomatoes we believe this variety has a great future before it. A golden prototype of our famous Sunrise. It is a heavy cropper of handsome medium-sized fruit. The flavour is remarkably good, being slightly more acid than our red variety.

Price, .75 per pkt.

Carters Duke of York. — This grand variety still holds a very high position in public favour. Colour rich scarlet, splendid cropper, almost globular in shape; flesh very firm, fine flavour. A leading feature of this superb variety is that it ripens its fruit with the most pronounced uniformity, whilst the profusion of clusters, averaging six and ten evenly formed fruit each, makes it conspicuously handsome. Invaluable as an exhibition variety as for private growers and market purposes.

Awarded the First-Class Certificate of the Royal Horticultural Society and Four Silver Medals; also the Large Gold Medal, Shrewsbury, 1912.

Price, .75 per pkt.

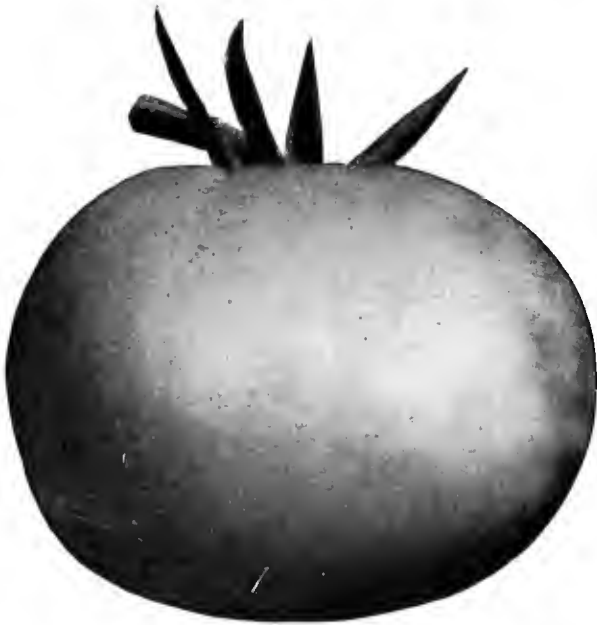

Buck's Tresco. An entirely new variety of tomato on which a great deal has been said and written. All reports show it has wonderful cropping qualities. It produces freely, marvelously large flower trusses. The fruits are undersized, of very uniform shape; colour a clear red; of excellent flavour.

Price, .75 per pkt.

Carters Coreless. — We were quite impressed by the habit and quality of this main crop variety at our grounds at Raynes Park. It is a good, bright-red variety, almost round, and solid and free from green core.

Price, .50 per pkt.

TOMATO — *Continued*

Earliana. — A very early, large, bright red Tomato, which runs very uniform in size and shape. It is very hardy and can be set out early. Price, **.15** per pkt.; **.50** per oz.

Carters Outdoor Improved. — This variety fruits readily in any situation where the full influence of the sun is felt. Has good form and shape although not so round as Duke of York or Sunrise. Price, **.25** per pkt.; **1.00** per oz.

Carters Perfection. — Quite distinct from any other variety named *Perfection*. It is very handsome in form, distinct in colour, exceedingly prolific, and of exquisite flavour. Price, **.25** per pkt.; **1.25** per oz.

Livingston's New Globe. — A fine main crop Tomato of a highly coloured crimson. Price, **.15** per pkt.; **.60** per oz.

Livingston's Stone. — Always in demand, almost round, very solid and tasty, and of good keeping qualities. Price, **.10** per pkt.; **.40** per oz.

Dwarf Stone. — These plants are very dwarf and sturdy, and produce a very large-sized fruit which resembles Livingston's Stone Tomato very closely. Price, **.10** per pkt.; **.40** per oz.

Dwarf Champion. — A very popular variety, of sturdy dwarf habit. Fruit solid and excellent quality. Price, **.10** per pkt.; **.35** per oz.; **1.00** per $\frac{1}{4}$ lb.

Comet. — This is a very popular sort for growing indoors or out, with a medium-sized fruit almost round and of a rich scarlet colour. One of the best forcing tomatoes. Price, **.25** per pkt.; **1.25** per oz.

Chalk's Early Jewel. — One of the best early tomatoes, of medium size and very productive. The colour is a bright red and it is almost seedless. Price, **.15** per pkt.; **.50** per oz.

Golden Queen. — The largest yellow tomato, with an excellent flavour. Very attractive when sliced with the red sorts. Price, **.10** per pkt.; **.40** per oz.

Lister's Prolific. — A splendid forcing variety, of excellent cropping qualities, with good form, colour, and flavour. Price, **.15** per pkt.; **1.25** per oz.

Ponderosa. — Without a doubt this is the largest tomato grown. The fruits are solid and of a bright crimson colour. Price, **.15** per pkt.; **.60** per oz.

Sterling Castle. — An excellent forcing variety, of medium size, splendid form, colour glowing scarlet. Price, **.15** per pkt.; **.60** per oz.

Carters Red Cherry. — A very prolific variety, about the size of a cherry. Price, **.15** per pkt.

Carters Red Plum. — Plum shaped, of prolific habit and good flavour. Price, **.25** per pkt.

Carters Yellow Plum. — A very popular and most prolific variety. Price, **.25** per pkt.

Carters Peach. — A curious, peachlike variety, quite distinct from any other. Price, **.15** per pkt.

Cultivation of Tomatoes. — About the last week in February or the first week in March is the proper time for starting seasonable plants. The plants can be started in greenhouses, hotbeds, window-boxes, or most any sunny spot where the temperature is never below sixty degrees. Sow the seed lightly in rows about 5 inches apart, and when the plants have reached a height of 2 inches transplant to other hotbeds or boxes, so that the plants are 4 or 5 inches apart each way. May 15th until June 1st is a good period for the transplanting to the open ground. Set the plants deeply 4 feet apart mixing a good shovelful of well-rotted manure with the hilling soil of each plant; water freely at this time and protect for a few days from the sun during the midday. A clearer-coloured, better-flavoured, and larger fruit will be obtained by training the plants to a trellis. Tomatoes are rapidly growing in favour as a greenhouse vegetable, and the forcing varieties do well and show wonderful productions. The plants should be started late in August for a midwinter crop. One ounce of seed will produce two thousand to three thousand plants.

TURNIP FOR FRAMEWORK AND EARLY USE

Carters Early Long Forcing (*see Photograph*). — Quite a distinct Turnip for **Frame or Outdoor Work**. Pure white flesh, and of most delicate flavour. It matures very rapidly, and is fit for table sooner than any other Turnip. Included in the Large Gold Medal Exhibit, Shrewsbury, 1912. Award of Merit, Royal Horticultural Society, for roots sown in cold frame March 6th and exhibited May 8th.

Price, .15 per pkt.; .20 per oz.;
.45 per $\frac{1}{4}$ lb.;
1.50 per lb.

Included in
three
Gold Medal
Exhibits
1913

Carters Early Long Forcing Turnip

A New Early White Turnip

Carters Little Marvel (*see Photograph below*). — A cross between *Early White Milan* and *Jersey Lily*. This is a highly reselected stock. It is undoubtedly the quickest white globe-shaped Turnip in cultivation. Flesh crisp and solid and, as aptly described by one of our customers, "is a Little Marvel." Very distinct in both habit and foliage, and is a splendid Table Turnip.

The R. H. S., reporting from its trials at Wisley, says:—"Carters *Little Marvel* Turnip. White, round, handsome; foliage short and sturdy. A very early variety that should be valuable for forcing."

Price, .15 per pkt.; .20 per oz.;
.45 per $\frac{1}{4}$ lb.; 1.50 per lb.

"A New Turnip — Little Marvel. — This new introduction from Messrs. Carter & Co. is a great gain in earliness and quality, and will be a most valuable root for first crop in the open. So far I have only had roots grown in frames, and when forced they were superior to the *Early Milan* variety. It should be a useful

root for first crop in the open, or for a quick crop required in a short time, and it can be grown for a summer crop."—G. WYTHES, in *The Garden*.

Carters Little Marvel Turnip

The Cultivation of Turnip. — Sow Carters *Little Marvel* or Carters *Jersey Lily* for early use the first week in March on a gentle hotbed under glass, and later in a warm situation in the open ground. For main succession crops, sow every three weeks in the open ground until the beginning of July. Turnips for winter use must be planted during August and early in September, sowing the seed in rows about 18 inches apart and thinning the plants to 3 or 4 inches apart. The *Ruta Baga* sorts should be sown from the 15th of June until late in July. One ounce will sow 150 feet of drill, 2 pounds will sow an acre in drills.

TURNIPS FOR THE GARDEN

Carters Jersey Lily

Carters Jersey Lily (*see Photograph*). — The most perfect in outline, and the best White Garden Turnip grown. In shape as round as an orange, of exquisite flavour, and very distinct small top.

Price, .10 per pkt.; .15 per oz.; .35 per $\frac{1}{4}$ lb.; 1.25 per lb.

Carters Purple-Top Strapleaf. — A variety with plain, strap-like leaves and flesh of fine texture; colour of top of root a rich reddish purple. A perfect model in form, and highly valuable for exhibition.

Price, .10 per pkt.; .15 per oz.; .35 per $\frac{1}{4}$ lb.; 1.25 per lb.

Carters Golden Rose. — One of the hardiest and best Winter Turnips; flesh of a rich golden-yellow; flavour delicate and melting. Awarded a Special First-Class Certificate by the R. H. S.

Price, .10 per pkt.; .15 per oz.; .35 per $\frac{1}{4}$ lb.; 1.25 per lb.

Carters White Milan — This is an exceptionally fine selected stock, strongly recommended for early garden work. It is as quick as a Radish, clean in growth, and of very fine flavour.

Price, .10 per pkt.; .20 per oz.; .45 per $\frac{1}{4}$ lb.; 1.50 per lb.

RUTA BAGA OR SWEDISH TURNIP

Carters Holborn Invicta Swede (Our Ennobled Strain)

This Ruta Baga has been described by our customers from all parts of America and Great Britain as the "best-keeping Swede ever introduced," and is "the most popular Swede in cultivation." It is considered to be the most consistent variety, always growing true to type. Its chief characteristics are its purplish-bronze colour and even shape, with a close-set neck, with size and keeping qualities unapproached by any other variety. Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Carters Improved American Purple Top. — This variety is without a doubt the most popular Swede grown by Market Gardeners and in kitchen gardens in the United States. It possesses a high feeding value, and its qualities of keeping are the best. The flesh is firm and rich yellow in colour, with a most delicious flavour. In size it has few equals.

Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Sweet German. — A pure-white fleshed variety, very solid in structure, sweet, mild, and well flavoured. It is a good keeper.

Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

White French or Rock. — This Swede is a grand keeper, and of the white varieties is unsurpassed for table or stock. Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

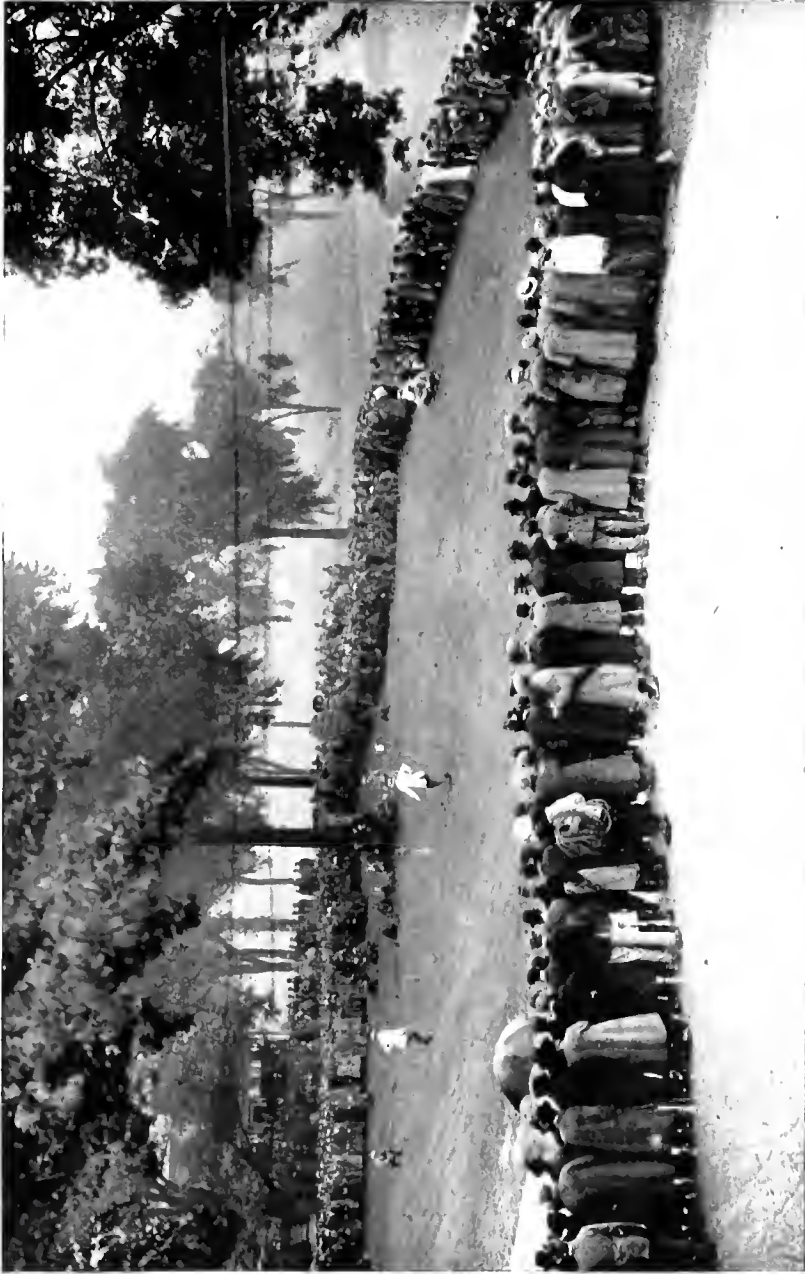

Skirving's Purple Top. — A well-known, very large yellow turnip, with good keeping qualities. The flesh is firm and sweet.

Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Shamrock. — A globe-shaped variety, extremely hardy, of fine grain and yellow flesh.

Price, .10 per pkt.; .15 per oz.; .25 per $\frac{1}{4}$ lb.; .75 per lb.

Carters Tested Grass Seed

Mr. Francis Ouimet, Harry Vardon, and Edw. Ray. The Country Club, Brookline, Mass.

September, 1913
Carters Tested Grass Seeds used exclusively on this Course

(Photo by Pietzcker, St. Louis)

Carters Tested Grass Seed

are today being used by every Championship and Prominent Golf and Country Club in the World.

Grass Seeds Prescribed for all Soils and Purposes

For Lawns, Shaded Lawns, Tennis Courts, Gold Courses, Bowling Greens, Cricket Grounds, Football, Baseball, and Polo Fields.

Prices

CARTERS FINEST MIXTURES OF GRASS SEED FOR PUTTING GREENS OR TENNIS COURTS (without Rye Grass): Mixtures of the very fine bladed species, which, if sown according to our recommendations, should produce a close, thick turf on all good soils, and are especially suitable for all games in which the ball is required to run true.

Lots under 10 bushels, per bushel of 25 lbs.	8.75 or 35.00 per 100 lbs.
Lots of 10-20 bushels, per bushel of 25 lbs.	8.50 or 34.00 per 100 lbs.
Lots of 20-60 bushels, per bushel of 25 lbs.	8.25 or 33.00 per 100 lbs.
Lots of 60-1,000 bushels, per bushel of 25 lbs.	8.00 or 32.00 per 100 lbs.

When ordering state whether the soil is light, medium, or heavy, as a mixture is sent accordingly.

Carters Fine Mixture of Grass Seed for Fair Greens, Tees, Lawns, Shaded Grounds, Football, Baseball, Polo Fields, etc.

(without Rye Grass)

Mixtures not so fine as the above, but better adapted for the purposes where a turf of the finest texture is not required, producing a strong, hard-wearing turf.

Lots under 10 bushels, per bushel of 25 lbs.	7.75 or 31.00 per 100 lbs.
Lots of 10-20 bushels, per bushel of 25 lbs.	7.50 or 30.00 per 100 lbs.
Lots of 20-60 bushels, per bushel of 25 lbs.	7.25 or 29.00 per 100 lbs.
Lots of 60-1,000 bushels, per bushel of 25 lbs.	7.00 or 28.00 per 100 lbs.

When ordering state whether the soil is light, medium, or heavy, as a mixture is sent accordingly.

Carters Invicta Lawn Grass Seed

(with Rye Grass)

An all round mixture of fine, hardy grasses for lawns, golf courses, especially the tees, tennis courts, shaded grounds, etc.

Lots under 20 bushels, per bushel of 25 lbs.	6.25 or 25.00 per 100 lbs.
Lots over 20 bushels, per bushel of 25 lbs.	6.00 or 24.00 per 100 lbs.
Per pound30	5 lb. bags . . 1.30
	10 lb. bags . . 2.50

All Above Prices F. O. B., Boston, Mass.

Do You Know the Carter System

of making Golf Courses, Lawns, etc.? Write for our pamphlet, "The Making of a Lawn," which deals with the making and renovation of grassy lands, post free.

		Mixed Poas — including large percentage Poa Annua80

Prices on large quantities sent on application

Hints When Ordering Grass Seed

We would respectfully ask our customers when ordering grass seeds to give as much information as possible on the following questions; this will assist us in supplying the most suitable mixture for the particular purpose for which the seed is required.

- What is the nature of the soil: heavy, medium, or light? Purpose for which the lawn is required.
- Is the seed required for a new lawn? If so, send a sample of soil.
- Is the seed required for renovating an old lawn? If so, send a sample of existing turf.
- Is the ground in good heart?
- Do you intend to manure the ground? If so, can you procure any well-rotted farm or stable manure?
- Is the ground well drained? Is water laid on? Quality of seed required.

Sowing Grass Seed (Quantity of Seed Required)

In sowing a new lawn use six to eight bushels or 200 pounds per acre. Figure a small lawn at the rate of 1 ounce per square yard. Use half the above quantities for renovation purposes.

One bushel of seeds weighs 25 pounds. A putting green should be divided into squares of 4 yards each way, or 16 square yards, and the seed required for that area should not be less than 2 pounds, which is at the rate of 2 bushels, or 50 pounds, to an area of 20 yards each way, or 400 square yards.

For renovating purposes, about one half the above quantity would be required, according to the state of the existing turf, for an area of 20 yards square, or 400 square yards.

Golf fair greens should be sown at the rate of from 6 to 12 bushels per acre.

CARTERS COMPLETE GRASS MANURES

FOR USE IN SPRING AND AUTUMN

Their Action and How to Use Them

Carters Complete Grass Manure (No. 1) is, as its name implies, a complete grass food, that is to say, it contains all that is necessary for the growth of fine grasses, but it does not force or burn them.

DIRECTIONS FOR USE

When making a new lawn or green, spread the manure evenly over the surface at the rate of 2 ounces per square yard, and rake it in. The seed can be sown immediately afterwards, but it is better to allow a few days to elapse between the two operations.

For renovating a lawn, spread the manure evenly over the ground at the rate of 2 ounces per square yard, and rake it in whilst preparing the surface for the seed.

When used to improve existing turf, sow at the rate of 2 ounces per square yard, mixing the manure with two or three times its own bulk of sifted soil when treating light sandy soils, or sharp sand — sea sand preferred — when treating heavy soils.

Price	100 lbs.	1,000 lbs.	2,000 lbs.
	\$4.50	\$42.50	\$80.00

Carters Anticlover Manure (No. 2) is also a complete grass food; it is slightly quicker in action than the above, and its constituents are so balanced that it effectively checks the growth of clover, and for this reason it is very valuable for dressing putting greens, tennis courts, croquet lawns, and other lawns in which the growth of clover is objectionable.

DIRECTIONS FOR USE

Sow at the rate of 2 ounces per square yard, mixing the manure with two or three times its own bulk of sifted soil when treating light sandy soils, or sharp sand — sea sand preferred — when treating heavy soils.

Price	100 lbs.	1,000 lbs.	2,000 lbs.
	\$5.00	\$45.00	\$85.00

Carters General Purposes Manure (No. 3), for rejuvenating large areas of turf for field games where a strong, tough, hard-wearing turf is required, rather than one of the finest texture.

Very useful for dressing golf courses, "through the green," football, hockey, cricket fields, etc.

DIRECTIONS FOR USE

Mix the manure with two or three times its own bulk of sifted soil or sand, so as to facilitate its even distribution, and apply it broadcast at the rate of 5 cwt. per acre, either in early autumn or spring and bushharrow it in.

Price	100 lbs.	1,000 lbs.	2,000 lbs.
	\$3.50	\$32.50	\$60.00

Carterite, for exterminating daisies and shallow-rooted weeds in lawns, etc.

Price	25 lbs.	50 lbs.	100 lbs.	500 lbs.	1,000 lbs.
	\$1.75	\$3.25	\$6.00	\$29.00	\$55.00

For other Manures (*please see index*)

F.O.B. Boston, Mass., U.S.A.

Lawns at Parnham, sown with Carters Tested Grass Seeds

Carters Worm-Eradicating Fertilizer

A preparation for removing earth worms from lawns, putting greens, tennis courts, etc., and at the same time it has a stimulating effect on the turf.

65.00 per ton (20 bags)

35.00 per half ton (10 bags)

4.00 per bag (100 lbs.)

Prices — F.O.B. Boston, Mass.

Plenty of water should be used in washing this powder into the turf, and a day selected when the worms are working near the surface. Special circular sent on request.

Humus

One of the very best fertilizers for top dressing lawns, putting greens, tennis courts, etc., and for renewing thin or impoverished soil is Alphano Humus. Humus is a necessity in all soils. Alphano Humus is five times stronger and lasts ten times longer than the richest barnyard manures. One cubic yard of Alphano Humus will cover 144 square yards to a thickness of one quarter inch. One ton of humus is nearly two cubic yards. A one-inch covering on an acre of ground requires 120 cubic yards of Humus or about 60 tons (2 carloads). Pamphlet with full information sent on request.

Prices: 5 bags — 100 lbs. each	5.00
By the ton in bags	12.00
By the car in bags	per ton 10.00
By the car or barge load in bulk	per ton 8.00

Above prices F.O.B. Alphano, N. J.

Pulverized Sheep Manure

Best quality, free from weed seeds 32.00 per ton (2,000 lbs.)

2.00 per bag (100 lbs.)

F.O.B. Boston, Mass.

Special prices on larger quantities F.O.B. Chicago, Ill., quoted on application.

NOTE. — In giving orders it is preferable to mention the numbers without the names, but, as the numbers are changed every year, it is absolutely necessary to give the date of the Catalogue from which the numbers are taken, **Ex Catalogue, 1915.**

Ageratum, Imperial Dwarf Blue (see below)

AGERATUM. — Half-hardy annual, neat habit, with effective flowers, mostly lavender blue; very useful in beds or along borders. Sow early in spring in pans, in heat, and prick off when the seedlings are sufficiently advanced in growth. Can also be sown in the open in May.

No. 143.	Imperial Dwarf Blue. — The finest bedding variety in cultivation, as shown in the photograph above. 9 inches	Per oz. .75	Per pkt. .15 and .25
" 140.	Blue Star. — The most compact Ageratum yet introduced. Light blue. 6 inches		.15 and .25
" 141.	Little Dorrit. — Lavender. 6 inches		.15 and .25
" 142.	Victoria Louise. — Dwarf; light blue with white centre; very showy		.10 and .25
" 144.	Imperial Dwarf White. — 9 inches		.10 and .25
" 145.	Carters Lavender Band (new). — Extremely dwarf, about 4 inches, of soft lavender hue		.15 and .25
" 146.	Mexicanum Blue. — 18 inches	Per oz. .50	.10 and .25

ABRONIA (Sand Verbena). — Half-hardy annual of elegant trailing habit for rockeries and dry places. Sow in early spring in pots and plant out, or sow out of doors in May.

No. 133.	Umbellata. — Rosy pink	.10 and .25
----------	-------------------------------	-------------

ABUTILON (Indian Mallow). — Elegant form. Useful for conservatory decoration and for subtropical bedding. Sow in heat early in spring, and pot off as soon as large enough to handle. For bedding out they should be hardened off well before planting out. Height, 6 feet.

No. 134.	Thompsonianum. — Variegated foliage	.15 and .25
" 135.	Carters choicest mixed	.15 and .25

ACACIA (Mimosa, Wattles). — Shrubs in high repute for decorative purposes under glass.

No. 136.	Armata (Kangaroo Thorn). Good pot plant	.15 and .25
" 137.	Lophantha. Elegant foliage	.15 and .25
" 138.	Carters Choice Mixed. — All the best kinds	.15 and .25

ACHIMENES. — Tuberous rooted. Sow in heat in February and treat as Gloxinias.

No. 139.	Carters Choice Mixed	.25 and .65
----------	-----------------------------	-------------

ACROCLINIUM. — See Everlasting Flowers, page 119.

CARTERS ÆSTHETIC OR DECORATIVE FLOWERS

FOR CUT BLOOMS

Culture. — Sow in spring and plant out as soon as the seedlings are strong enough, or sow in the place where they are intended to flower and thin out as may be necessary. Flowers that are not cut should be taken off when they wither, and fresh ones will quickly take their place.

White Marguerite

- | No. | Per pkt. |
|--|-------------|
| 88. Blue Marguerite (Perennial).—Hardy, admirable for cutting. 1½ feet | .15 and .25 |

| No. 99. Silver Thistle (Perennial).— Unique ornament to the mixed border; bright metallic lustre. 2½ feet | .15 and .25 |
| No. 100. Complete Collection of above (Nos. 88 to 99) | 1.50 |

Carters Dwarf Alyssum Snow Carpet (*see below*) in our Trial Grounds

ALYSSUM. — For spring or summer. Good pot or rockery plants. Easily grown.

- No. 149. **Carters Snow Carpet.** — Annual. One of the most valuable dwarf bedding plants of modern introduction. Perfectly hardy. If transplanted a foot apart the plants spread out their side branches along the ground till they meet, becoming covered with pure white flowers, giving the effect of a snow carpet. Flowers through the summer and autumn until cut off by frosts. 4 inches Per oz. 1.00 .10 and .25
- " 150. **Maritimum Sweet Alyssum.** White. Annual. 9 inches Per oz. .40 .10 and .25
- " 151. **Saxatile sulphureum.** New shade. Perennial. 9 inches10 and .25
- " 152. **Saxatile compactum.** Bright yellow. Hardy perennial for rockwork. 6 inches10 and .25

ALONSOA. — Treat as half-hardy annual; pretty plants for flower borders.

- No. 147. **Warszewiczii.** Bright scarlet. 2 feet . . .15

ALSTRÆMERIA (Peruvian Lily). — Perennial. Sow in gentle heat early in spring, and prick off.

- No. 148. **Carters choice mixed.** 1½ feet. .15 and .25

AMARANTHUS. — Half-hardy annuals, with very ornamental foliage. Sow in March in gentle heat.

- No. 152. **Melancholicus ruber.** — Maroon. 1 foot. Hardy .10
- No. 154. **Princess of Wales.** — Brilliant colour; subtropical. 3 feet .15
- No. 155. **Salicifolius (Fountain Plant).** — Long, graceful, willow-like foliage, tinted crimson and gold. 3 feet .15
- No. 156. **Tricolor (Joseph's Coat).** — Subtropical; colours scarlet, crimson, and gold. 2 feet .15

AMARYLLIS. — Stove and warm greenhouse bulbous plant.

- No. 1538. **Extra choice Hybrids,** cross fertilized, and saved from one of the finest collections . . .65

AMBROSIA MEXICANA.

- No. 157. Delicate perfumed foliage; hardy annual. 1 foot10

AMMOBIUM ALATUM. — Half-hardy annual of easy culture. Sow in spring in borders.

- No. 629. **White Everlasting.** 2 feet10

AMPELOPSIS VECTCHI (Boston Ivy). — A very popular climbing perennial15

ANAGALLIS (Pimpernel). — An old-fashioned half-hardy annual. Will flower all the season in warm soils, or may be grown in pots for greenhouse decoration.

- No. 158. **Large Blue.** Ultramarine. 6 inches . . .15

CARTERS SUPERB LARGE-FLOWERED ANTIRRHINUM

Carters System of outdoor test "ANTIRRHINUM" facing staff entrance at Raynes Park

Carters Intermediate Large-Flowered Antirrhinum

The above photograph contains a portion of our trials of these brilliant and ever popular flowers. The remarkable colours are the admiration of all who have seen them during their blooming period. Apart from their easy culture the convenient adaptability of the Antirrhinum for any decorative garden scheme should be borne in mind. We keenly regret that space prevents our illustrating them in colours for this is their all prevailing feature. The intermediate and dwarf sections illustrated here command much attention.

See next page for description and price.

Carters Dwarf Large-Flowered Antirrhinum

ANTIRRHINUM OR SNAPDRAGON

Sow the seed in pans or boxes from February to March, and transplant to bed or border when large enough. If the withering flowers and seed pods are kept picked off, the plants will last in bloom for a long time, and continue again the following year. Can easily be grown as Annuals if sown in the open ground in April. Thin out about 12 inches apart.

CARTERS INTERMEDIATE LARGE-FLOWERED ANTIRRHINUM

This is undoubtedly the finest form, both for bedding and ribbon borders, the dense, well-formed trusses contrasting beautifully with the deep green foliage.

The trusses are excellent for cutting, and being slightly curved lend themselves to any decorative arrangement. Height, 1 to 1½ feet.

		Per pkt.
No. 60.	Carters Salmon Queen. — A beautiful salmon-rose colour. Most attractive	.25
" 188.	Carters Gold Crest. — Soft rose pink, tinged salmon, with golden orange lip. We predict a great future for this remarkably brilliant variety as a bedding plant	.25
" 51.	Carters Scarlet Flame. — A self-brilliant, fiery scarlet, hence the name we have given to it. In the sunshine the spikes look flame-like in their brilliancy	.25
" 174.	Carters Terra Cotta and Creamy Shades. — A charming strain of soft, delicate shades which are quite new in this section	.25
" 1457.	Carters Fiery Belt. — A most striking colour, fiery brilliant orange scarlet, with white throat. A small group of this flower enlivens the whole garden	.15 and .25
" 176.	Carters Pink. — Quite a charming variety. Delicate pink with white throat	.15 and .25
" 187.	Black Prince. — Crimson, dark foliage	.15 and .25
" 47.	Carters Butterfly. — Crimson purple, with pure white throat	.15 and .25
" 175.	Carters Gloriosa. — Rich purple carmine, relieved by pure white	.15 and .25
" 48.	Crimson. — Very rich colour	.15 and .25
" 49.	White. — Pure white flowers	.15 and .25
" 50.	Yellow. — Pale colour	.15 and .25
" 52.	Carters Intermediate Mixed. — 1 to 1½ feet	Per oz. 1.00 .15 and .25

CARTERS DWARF LARGE-FLOWERED ANTIRRHINUM

A compact strain. Flowers variously coloured. This type makes a good pot plant, and is invaluable in borders or beds. Height, 6 inches. We offer the following colours in the Dwarf Section:

		Per pkt.
No. 165.	Crimson. — Fine rich colour	.15 and .25
" 166.	Rose. — Highly commended by the Royal Horticultural Society	.15 and .25
" 167.	White. — Pure white flowers	.15 and .25
" 168.	Yellow. — Pale shade	.15 and .25
" 169.	Fiery red, yellow lip	.15 and .25
" 170.	Deep rose, white throat, yellow lip	.15 and .25
" 171.	Crimson, white throat, yellow lip	.15 and .25
" 172.	Striped. — Endless shades of all striped and blotched varieties	.85
" 43.	One packet each of above eight varieties	Per oz. 1.00 .15 and .25
" 173.	Carters Dwarf, Choicest Mixed. — Height, 6 inches	

CARTERS TALL LARGE-FLOWERED ANTIRRHINUM

This fine hardy perennial, which should be treated as an annual for bedding, has been greatly improved in size and colourings. Height, 2 to 3 feet.

		Per pkt.
NOVELTY	No. 178. Carmine King. — Bright purple carmine with white throat	.25
NOVELTY	No. 117. Cardinal. — The most effective colour yet produced	.25
No. 56.	Purple King. — A self-coloured, purple Snapdragon of enormous size	.25
" 58.	Fire King. — Bright cinnabar red, with small yellow spot on the under lip; effective	.25
" 59.	Venus. — Noble flower of a delicate rose colour on white ground	.15 and .25
" 177.	Crimson. — Rich colour	.15 and .25
" 179.	White. — Long spikes of pure white flowers	.15 and .25
" 55.	White, with rose lip. — Most delicate	.15 and .25
" 180.	Striped. — Endless shades of all striped and blotched varieties	.15 and .25
" 181.	Yellow. — Pale shade	.15 and .25
" 182.	Fiery red, yellow lip	.15 and .25
" 183.	Crimson, white throat, yellow lip	.15 and .25
" 184.	Deep rose, white throat, yellow lip	1.00
" 44.	One packet each of the nine varieties.	.15 and .25
" 186.	Coral Red. — A lovely coral	.15 and .25
" 185.	Carters Tall Large-flowered Mixed. — 2 to 3 feet	Per oz. .80 .15 and .25

AQUILEGIA (Columbine)

Carters Long-Spurred Aquilegia

CARTERS LONG- SPURRED AQUILEGIA

(Columbine)

Hardy perennials of great beauty and utility in borders, where they will bloom freely when established, early in the summer. The long-spurred type, of which we make a specialty, gives elegant cut flowers. We have now included some new and effective colours. Sow seeds under cover in February for transplanting in spring to a border, when, if the summer is favourable, they may bloom in autumn. If sown in summer, sturdy plants will be ready by autumn for transplanting to the border to flower next May and June.

			Per pkt.
No. 191.	Carters Long-Spurred Blue (Cœrulea). This beautiful large-flowered free-blooming variety is most valuable for cutting. 2 feet	Per $\frac{1}{4}$ oz. 1.25	.15 and .25
No. 192.	Carters Long-Spurred Single Golden (Chrysantha). 2 feet		.15 and .25
No. 193.	Carters Long-Spurred Double Golden (Chrysantha Double). 2 feet		.15 and .25
No. 196.	Carters Long-Spurred White. — In some cases the spurs are slightly shaded with blue. 2 feet		.10 and .25
No. 189.	Carters Choicest All Colours Mixed (Long Spurred)	Per $\frac{1}{4}$ oz. 1.00	.10 and .25
No. 190.	California Hybrida. — Pure yellow and scarlet. 2½ feet	Per $\frac{1}{4}$ oz. 1.00	.15 and .25
No. 194.	Glandulosa. — Blue and white. 1 foot		.10 and .25
No. 195.	Skinneri. — Scarlet, tipped with green. 2 feet		.15 and .25

Gentlemen: "It is a great pleasure for me to inform you that from your seeds I have not had one failure in either my vegetable or flower garden this year. They have given me entire satisfaction." — W. OWEN, C. E., Louisville, Ky.

The following publications will be mailed upon application: "Carters Garden and Lawn," "Carters Practical Green Keeper," "The Making of a Lawn," and "Carters Bulbs Book." If interested in any of the above publications register by sending us your name and address, also stating the publication desired.

CARTERS TESTED SEEDS, INC

ANCHUSA (Bugloss). — Hardy perennials, of easy culture. Sow in spring, and transplant. Per pkt.
 No. 159. **Capensis** (Cape Forget-me-not). Blue. 1½ feet. **.15 and .25**
 " 160. **Italica**. Brilliant blue. 3 feet **.10 and .25**
 " 1498. **Dropmore Variety**. A very fine variety, with heads of beautiful flowers of a lovely gentian-blue shade. Excellent for cutting. 4 feet **.15 and .25**

ANEMONE (Wind Flower). — These beautiful spring and autumn flowers are perfectly hardy. Nos. 161 and 162 are bulbous, and 163 and 164 are herbaceous perennials. Seed of the tuberous varieties should be sown thinly in light soil in spring and remain in seed bed until after flowering.

No. 161. **St. Brigid**. Double and Semidouble, easily grown from seed **.15 and .25**
 " 162. **Coronaria** (Poppy Anemone). Beautiful single large-flowered varieties **.15**
 " 163. **Japonica**. Hardy perennial, flowering in September; soft rose. 2 feet **.15**
 " 164. **Japonica Honorine Joubert**. The best white for cutting. 2 feet **.25**

ARABIS (Rock Cress) — Hardy perennial for spring bedding.
 No. 197. **Albida**. White; neat. 6 inches **.10 and .25**
 No. 198. **Alpina**. Paper white. 6 inches **.10 and .25**

ARALIA. — Foliage plants for general purposes. Sow in pots in early spring, in heat, and pot off.
 No. 199. **Papyrifera** (Rice Paper Plant) **.25**
 No. 200. **Sieboldi**. Palmate foliage **.25**

ARGEMONE (Prickly Poppy). — Sow in March and plant out in sunny borders. Very easily grown.
 No. 202. **Grandiflora**. Hardy annual; white **.15**

ARISTOLOCHIA (The Dutchman's Pipe). — Climbing plants, with curious pipe-shaped flowers. Sow in heat in March, and pot off.
 No. 203. **Elegans**. Perennial; handsomely spotted. Pretty for conservatory **.25**
 No. 204. **Sipho**. Hardy climber; splendid foliage, and easily grown **.25**

ASPARAGUS PLUMOSUS. — Easily raised from seed sown in early spring in heat. Valuable for cutting for bouquets and table decoration. Also makes a nice plant for covering a pillar in the conservatory, or for training over a balloon-shaped frame. *A. Sprengeri* is a grand basket plant.
 No. 205. **Asparagus plumosus nanus** . . Per 100 seeds **1.00 .25**
 No. 206. **Asparagus Sprengeri**. Per 1,000 seeds **1.50 .25**

ASPERULA.
 No. 207. **Odorata** (Woodruff) New Mown Hay. The dried leaves and stems are very fragrant. Perennial, white, sweet scented. 4 inches **.10 and .25**

ARCTOTIS. — Half hardy. An annual from S. W. Africa. Most useful for cutting, having long stalks borne erect.
 No. 201. **Grandis**. Daisy-like flowers, pure white, lilac on the outside, with a lavender disc: of very easy culture, flowering all the summer. 2 feet Price per pkt. **.25**

Arctotis Grandis

ASTERS

Carters Ray Aster

Quite a new type of the annual Aster. The flowers, which are very large, often 5 inches across, are produced on long stalks and have prettily arranged quilled petals. Fine for cutting, as they last a week in water if cut before fully expanded. Height, 1½ feet.

Per pkt.			Per pkt.		
No. 1515.	Carters Crimson15 and .25	No. 210.	Carters Azure Blue15 and .25

" 215.	Carters Rose and White	.15 and .25			

Carters Plume Asters

We particularly recommend these varieties for cutting. The blooms, equalling Chrysanthemums in form, are borne on long stems and the three shades blend well together.

		Per pkt.
No. 228.	Carters White	.25
" 229.	Carters Blue	.25
" 230.	Carters Rose	.25
" 231.	Carters Choice Mixed	.25

The most noble flowered Aster in cultivation. With flowing feathery petals; grand for cutting.

Height, about 18 inches.

We have measured blooms
6 inches across.

(For our List of Flower Collections
see page 78.)

ASTERS — *Continued*

Since the introduction of this beautiful garden flower into England by the late Mr. James Carter, about the year 1830, continuous skilful cultivation has produced the present developments in form and colour.

The whole group may be described as Half-Hardy Annuals, the seeds being best sown under glass in early spring, and the seedlings pricked out into boxes or in frames for planting out or potting, as the occasion requires, when they are ready.

No. 258. **Extra Early Midsummer Scarlet.** — Comes into bloom about middle of June; a striking pot plant. Price, **.15** and **.25** per pkt.

No. 64. **Christmas Tree Aster.** — Mixed colours. Similar in habit to a small Christmas Tree. Sometimes giving as many as a hundred blossoms on one plant. Flowers perfectly double. Height, $1\frac{1}{2}$ feet. Price, **.25** per pkt.

No. 66. **Japanese Aster.** — Mixed colours. Needle-shaped petals, tapering to a point, producing graceful forms. Height, $1\frac{1}{2}$ feet. Price, **.25** per pkt.

No. 68. **Unicum Aster.** — Pure white. Flowers similar to our *White Plume*, with almost threadlike petals, prettily twisted. Height, $1\frac{1}{2}$ feet. Price, **.25** per pkt.

Carters Sinensis Single. — A free-growing single Aster, suitable for vases and house decoration. Height, 18 inches.

Aubrietia, Whitewell Gem
(Selected by the Rev. J. Jacob, M.A.)

BARTONIA (Hardy Annual).—Showy, and very easily grown. Sow in open border in spring.

No. 298. *Aurea* (see Photograph). Rich golden colour. Per pkt. .10 and .25

BEE LARKSPUR (Delphinium).—Of easy culture for large flower borders and wild gardens.

No. 299. Hardy perennial, bright blue. 3 feet. Per pkt. .15 and .25

BEET, Ornamental. — For mixed beds or borders and sub-tropical gardens. Sow under glass in spring, prick off and plant out in May.

No. 300. Flower Garden. Rich coloured variety. Per pkt. .15 and .25

BEGONIA. — See pages 92-93.

BIDENS (Black Dahlia). — Half-hardy annual for beds and borders.

No. 301. *Atrosanguinea*. Excellent for cutting. 1½ feet. . . . Per pkt. .15

BIGNONIA (Trumpet Vine). — A fine climber for conservatory decoration and warm situations in the garden. Seeds must be sown in heat early in spring.

No. 302. *Grandiflora*. Large orange-scarlet trumpet-shaped flowers Per pkt. .15 and .25

" 303. *Radicans*. Scarlet Per pkt. .15 and .25

BRACHYCOME. — See Daisy, Swan River, page 114. .15 and .25

BROOM. — Sow in spring or summer for strong plants to flower the following year.

No. 1546. Carters Crimson and Gold. Excellent for cutting . . . Per pkt. .25

" 1545. Carters White. Free bloomer, long sprays of white flowers Per pkt. .25

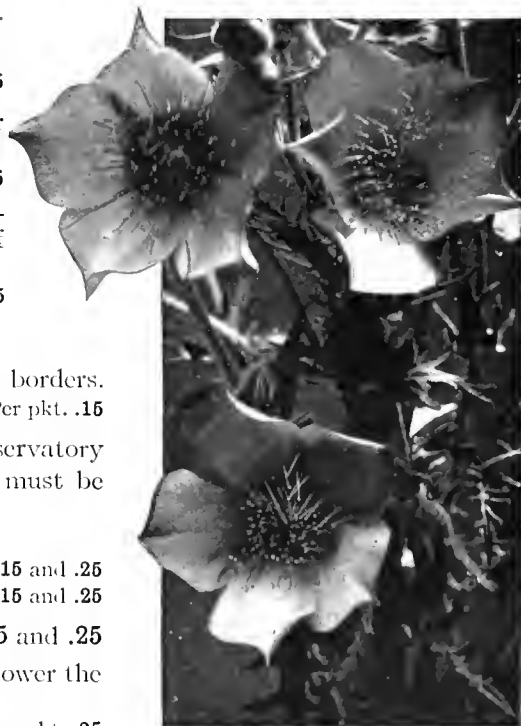

AUBRIETIA. — Great favourites for spring bedders, rockeries, etc. Perennial, quite hardy. Bright perpetual bloomers. Easily raised from seed sown in spring. 4 inches.

No. 278. *Whitewell Gem*. Originally found in an old Shropshire garden twenty years ago. Continual selection has improved and fixed the strain. The flowers are large and of an intense glowing reddish purple. Plants are very vigorous and remain in flower for many weeks. This latter characteristic added to its free-flowering qualities makes it a most valuable asset to the garden. Per pkt. .25

Bartonia Aurea

Carters Choice Double Begonia, Tuberous Rooted (*Natural Size Bloom*)

Begonia, Carters Choicest Double. — This fine strain contains all the largest and best forms and most brilliant colours in cultivation. The Begonia is fast becoming a popular summer bedding plant, displacing the Geranium in many gardens.

No. 296

Price, per pkt. .40 and .75

Begonia, Carters "Fringed" Double. — A production of great novelty and beauty.

No. 297

Price, per pkt. .40 and .75

CARTERS BEGONIA BULBS (*See page 174*)

"I am sending you a specimen bloom of one of your seedling Begonias. I got a 3s. 6d. packet of seed from you spring, and I sowed half the quantity, and have got one hundred splendid plants in bloom now." — P. ADDISON,

BEGONIA — *Continued*

Carters Choice Single Begonia, Tuberous Rooted

A Very Popular Plant for Pots and Bedding Out

Begonias are much superior to Geraniums for bedding, being quite unaffected by heavy rains, a moist atmosphere suiting them.

Begonia, Carters "Crown Jewels."
Mixed Single, including Fringed vars., as illustration. — It is impossible to praise too much this superb strain of this highly favoured flower; it is simply perfection, and needs but finished culture to attain pleasing results, alike for size and quality of the flowers, combined with brilliance in colours. Grand for bedding out.

No. 292. Price, .40 per pkt.

Begonia Hybrida Cristata. — Grand flowers, crested by the elongation and fimbriations of the petals; 70 per cent true from seed.

No. 293. Price, .65 per pkt.

Begonia, Carters New Marbled Hybrids. — New colourings of great beauty.

No. 1481. Price, .65 per pkt.

Begonia, Carters Fiery Scarlet. — Enormous blossoms, producing a gorgeous display.

No. 1482. Price, .65 per pkt.

Bedding Begonias—Perpetual Flowering, Small Blooms in Clusters, Fibrous Rooted

Crimson Bedding. — Dwarf compact variety; flowers crimson, foliage deep red, with metallic sheen.
No. 1597. Price, .25 per pkt.

"Vernon" Tom Thumb. — A charming free-flowering variety; blood-scarlet flowers and bronze foliage.
No. 294. Price, .25 per pkt.

"Fairy Queen" Tom Thumb. — Colour delicate glistening rose, marked with white centre
No. 295. Price, .25 per pkt.

Luminosa. — Flowers fiery deep scarlet with satiny brownish-red foliage.
No. 1544. Price, .25 per pkt.

The seed should be sown in heat at end of winter to produce strong flowering plants in the summer, in pans of very fine soil. Prick off the seedlings into pans and pot off later. Care should be used when sowing, as the seed is very fine. We can also supply tubers ready to start into growth in early spring.

These Begonias are invaluable for growing in beds and groups; also for pot culture. They come into bloom very early, and last all the season.

CACALIA

- No. 304. **Coccinia**, the Scarlet Tassel flower. For mixed borders. Annual. 1 foot **.10 and .25**

CALAMPELIS (Eccremocarpus). — Climber for verandahs, trellises, etc.; handsome racemes of bloom. Sow in heat to bloom the first season out of doors.

- No. 305. **Scabra**. Orange scarlet; perennial. 10 feet **.15**

CALANDRINIA. — Perennial. Succulent plant. Sow in pans in spring, place in frame and prick out in bed or border for summer blooming.

- No. 306. **Umbellata**. Vivid crimson; good rock plant **.10 and .25**

CALCEOLARIA. — See page 96.

CALENDULA (Pot Marigold). — Annual. Very showy border plant, lasting the whole of the summer without any attention whatever beyond keeping the seed vessels picked off. Not at all particular to either soil or surroundings, and may be described as everybody's flower. Sow in spring where plants are intended to flower.

- No. 307. **Cockade Orange**. Very large double flowers; showy colour. 1 foot Per oz. **.40** **.15 and .25**

- " 308. **Meteor**. Lemon yellow, orange stripes. 1½ feet **.15 and .25**

- " 309. **Hybrida, or Pot**. Single yellow. 1½ feet **.10 and .25**

- " 310. **Officinalis**. The single yellow cottage garden Marigold. 1 foot Per oz. **.40** **.10 and .25**

- " 311. **Pluvialis**. Pure white. 1 foot. **.10 and .25**

CALLIRHOE (Poppy Mallow). — Very pretty half-hardy annual. Sow in spring, in gentle heat, and prick out.

- No. 344. **Digitata**. Rosy carmine; erect habit. 1½ feet **.10 and .25**

CALVARY CLOVER. — An interesting novelty. Raise in spring, and treat as an annual.

- No. 345. The leaves are singularly blood marked **.15**

CAMELLIA. — Greenhouse shrub, universally admired. Sow seeds early in the spring in pots, place in heat, and pot off as soon as seedlings can be conveniently handled.

- No. 346. **Japonica fl. pl.** Saved from best varieties **.25**

CLARY. — Sow outdoors in spring.

- No. 460. **Purple**. Hardy annual, for bedding. **.15**

CLEMATIS (Virgin's Bower). — Well-known climbing perennials. Sow seed in early spring under glass, pot off and plant outdoors in early summer.

- No. 461. **Flammula**. Ordinary white, sweet scented **.15**

- No. 462. **Jackmanni varieties**. Saved from the best colours **.25**

Per pkt.

Canary Creeper, Photographed in our Trial Grounds at Raynes Park

Per pkt.

CANARY CREEPER (Tropæolum Peregrinum). — Favourite climber for trellises, arbours, stumps of trees, etc.; very graceful; bright canary colour. Sow in pots in February and bring on under glass or sow in the open in spring. 10 feet.

- No. 312. **Canary Creeper**. Half-hardy climbing annual Per oz. **.40** **.10 and .25**

CANNABIS (Indian Hemp). — One of the finest foliage plants for subtropical gardens and beds. Sow in spring and prick off.

- No. 362. **Indica**. 6 feet. **.15**

CARTERS VICTORIA PRIZE CALCEOLARIA

It is impossible by photography to give any adequate idea of the beauty of these magnificent flowers; the variations and markings are endless, the flowers are of large size and perfect in form, and the habit is unexceptionable. Our exhibit at the Temple Show of the Royal Horticultural Society every May is always the theme of general admiration, and we have been awarded the highest honours for our displays.

- | | |
|--|-----|
| No. 313. CARTERS Victoria Prize, mixed, all colours. In addition to the usual range of colours found in this plant, our choice strain produces many distinct seedlings of unique colour, the rose, pink, and cupreous shades being particularly pleasing . . . | .65 |
| " 314. Calceolaria, Golden Princess. Exquisite yellow, of the same perfect habit as our Victoria Prize strain. The pure golden flowers are very valuable for conservatory decoration during the period of the year when this colour is scarce . . . | .65 |
| " 315. Calceolaria, Mixed Colours. An excellent strain containing a splendid range of colour. | .40 |
| " 316. Calceolaria, Hardy, Shrubby. From best varieties | .65 |
| " 317. Calceolaria, New Dwarf Bedding | .65 |

Carters Miniature Calceolaria. — A curious small-flowered type, quite unique in growth and character; makes a fine dwarf plant for stage fronts in conservatory among other growths of similar habit.

- | | | | |
|---|-----|---|-----|
| No. 318. Calceolaria, The Pigmy. A dainty plant, with beautifully variegated blossoms. Height, 5 inches | .25 | No. 319. Calceolaria, Tom Thumb. Brilliant as the <i>Victoria Prize</i> varieties, but of dwarf habit | .25 |
| | | " 320. Calceolaria, The Gem. Similar to <i>The Pigmy</i> , but the flowers are more of one colour | .25 |

Carters Annual Calliopsis

CALLIOPSIS

(Coreopsis)

Hardy annuals and perennials. All are universal favourites and useful for cut flowers. The annual varieties should be sown outdoors in April in the place they are intended to flower, or, for earliest work, may be sown under glass, and then pricked out.

ANNUAL VARIETIES

CARTERS TALL

2½ to 3 feet. Large flowered, branching habit; very useful for back of borders and cut flowers.	Per pkt.
No. 321. Crimson10 and .25
" 322. Crimson and gold10 and .25
" 327. Carters Choice Mixed Tall Annual varieties, all sorts	Per oz. .50 .10 and .25

CARTERS DWARF

15 to 18 inches, compact habit; useful for cut flowers.

No. 323. Crimson . Rich and handsome10 and .25
" 324. Crimson and gold . A rich combination10 and .25
" 328. Carters Choice Mixed Dwarf Annual varieties, all sorts	Per oz. .50 .10 and .25

CARTERS MINIATURE

9 to 15 inches. The shortest growing type, fine for edges.

No. 325. Crimson Marbled .—The flowers show a groundwork of chocolate, flaked and marbled with gold, giving a most fantastic combination. Unfortunately some tall plants invariably appear amongst the dwarfs.10 and .25
No. 326. Crimson and Gold .—Of all the dwarf varieties this is the most miniature10 and .25

VARIOUS CALLIOPSIS

No. 329. Burridgi . Annual; rich crimson and gold. 2½ to 3 feet10 and .25
No. 330. Bicolor (Tinctoria). Annual; very pretty. 2½ to 3 feet10 and .25
No. 331. Coronata . Perennial; yellow; dark spot. 2 feet10 and .25
No. 332. Drummondii . Annual; yellow, dark centre. 2 feet.10 and .25
No. 333. Ackermanni . Annual; very early; free bloomer. 2 feet10 and .25
No. 334. Grandiflora . Grandest of all; large golden yellow; a hardy perennial. A lovely border plant both for effect and cutting. Much appreciated for house decoration when cut. 3 feet	Per oz. .60 .10 and .25

CAMPANULA (PERENNIAL VARIETIES)

For flowering the following spring the seeds should be planted in midsummer, in a partially shaded spot in nice soil and keep them growing until strong enough to transplant or pot.

		Per pkt.
No. 336.	Persicifolia Alba (Giant White) (see Photograph).—This is the finest form of this most effective hardy border perennial. The graceful spikes render it invaluable for house decoration either when cut or as pot plants. June flowering. 3 feet15 and .25
" 335.	Mirabilis. Magnificent, pyramidal and bushy; pale blue. Perennial. 2 feet40
" 337.	Carpatica. Perennial; large blossoms; excellent pot plant; blue. 6 inches10 and .25
" 338.	Carpatica Alba. Perennial; white variety15 and .25
" 339.	Grandiflora. Perennial; purple violet. 1½ feet15 and .25

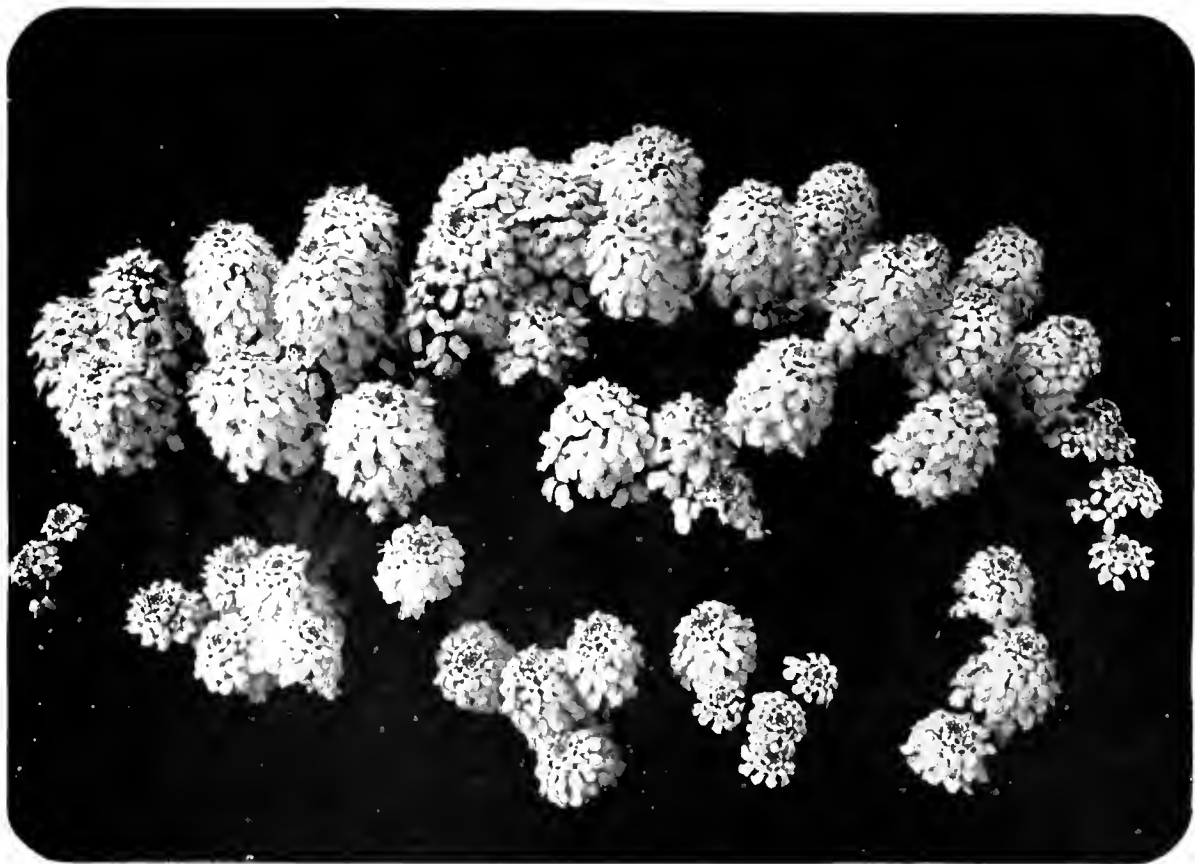

Campanula Pyramidalis Alba

Campanula Persicifolia Alba

		Per pkt.
No. 340.	Grandiflora Alba. White; perennial. 1½ feet10 and .25
" 341.	Pyramidalis. Blue; perennial; charming pot plant. 4 feet.15 and .25
" 342.	Pyramidalis Alba (see Photograph). White variety; perennial10 and .25
" 343.	Rotundifolia (Harebell). Deep blue; perennial; the true wild species. 1 foot25

Carters Empress Compact Candytuft

CANDYTUFT (Iberis)

Carters Empress Compact Candytuft.—Large spikes of the purest white and of erect habit, dwarf and compact, very profuse in bloom, exceedingly showy and effective. Height, 6 inches.

No. 1483. Price, .25 per pkt.

			Per pkt.
No. 347.	Carters Hyacinth-Flowered. —A magnificent introduction, each plant having five or six heads of bloom. Its fine spiral spikes of the purest whiteness make it a very attractive decoration in either beds or borders. Sow in spring and transplant 9 inches apart, keeping the faded heads cut away. 1 foot.	Per oz. 1.00	.10 and .25
" 348.	Carters Pigmy. —A dwarf type of hyacinth flowered. Forms quite a white carpet. 4 inches		.15 and .25
" 349.	Rose Cardinal. A beautiful shade of rosy scarlet	Per oz. 1.00	.15 and .25
" 350.	Carters Carmine. Bright rose, excellent form	Per oz. .75	.15 and .25
" 351.	Carters Spiral. Pure white, long trusses	Per oz. .75	.10 and .25
" 352.	Crimson (Dunnett's). Brilliant	Per oz. .50	.10 and .25
" 353.	Purple	Per oz. .50	.10 and .25
" 354.	Lilac	Per oz. .50	.10 and .25
" 355.	White	Per oz. .50	.10 and .25
" 356.	Carters Choice Mixed. For open borders	Per oz. .40	.10 and .25

PERENNIAL CANDYTUFT, FOR BORDERS OR ROCKWORK

No. 357.	Iberis Gibraltarica. Suffused lilac, lovely species	.25
" 359.	" Sempervirens. White	.15 and .25

Hints on Culture.—These hardy flowers are now a necessity; brilliant in colour, compact in habit, and useful alike in pot or border. Sow in spring in ordinary soil. For pot work, sow in pots in frame, and thin out the seedlings, or they may be transplanted. Average height, 1 foot.

Canterbury Bell. — Hardy biennials. Sow in summer, transplant to a bed in autumn for flowering following year. They also make effective pot plants for spring flowering, sown in summer and potted in autumn, and kept in a cool frame through winter. No matter how carefully the double flowering types are saved, some are certain to come single. The seed-bearing spikes should be cut out when the beauty is over, and more may come. Averaging 3 feet in height.

Double Canterbury Bell. See page 100

- CANNA** (Indian Shot). — Ornamental-foliaged plants with showy flowers, for stove, greenhouse, or subtropical planting. Steep seed 24 hours in tepid water, and sow in strong heat. Pot off seedlings as soon as they can be handled.

- No. 407. **Barbata coccinea**. Bright scarlet perennial. 2 feet .10 and .25
- CELSIA**. — Half-hardy Biennial. A pretty plant for greenhouse and conservatory decoration. Sow in spring and summer for pot work.
- No. 402. **Cretica or Golden Spray** .25

Carters Choice Double Carnation

Sow under glass in January and February, and transplant as soon as ready. They commence to flower in July, producing a wealth of large blooms of great variety in colour until cut off by the frost, thus producing a supply after the perennial varieties are over. Valuable for indoor cultivation, can be potted and placed in a cool greenhouse, when they will provide a succession of bloom during the winter months. They can also be sown in June to flower the following year. They produce a very large percentage of double flowers, rich with delightful fragrance and diversity of colour.

- | | | |
|------------------------------------|---|----------|
| No. 389. Carters Annual Carnation. | Producing a great variety of colours and forms | Per pkt. |
| " 391. Margaret, Mixed. | — A class which begins to bloom in the fourth month from the time of appearing above ground | .40 |
| " 392. White Margaret. | — Pure white blossom, delicately scented | .25 |

CARNATION AND PICOTEE

A popular and lovely flower, always in fashion. In colour and form unique, with a pleasing fragrance in many types. Whether grown in pots, benches, or in garden beds for summer display, its charms are equally attractive. Our seed is saved with the greatest care, and should produce a large percentage of the best double flowers.

Carters Choice Double Carnation

No. 388. A splendid mixture of Selfs, Flakes, Bizarres, Fancies, and Yellow Grounds.

All varieties mixed,
Price, .40 per pkt.

Sow in spring in cool frame, prick out, and plant out in good soil when strong enough.

		Per pkt.

Carters Annual Carnations

Bloom in six months from seed

Carnations are favourites with all lovers of flowers. This new strain will bring them within the reach and the cultivation of everybody, as it is one of the most valuable introductions of modern times.

CARTERS RAINBOW CELOSIA

Celosia Plumosa (Feathered, Cockscomb). — Annual. A grand feature in subtropical bedding; graceful plumes. Sow in spring, in heat, prick off into pans, and pot off. They like a good, rich soil in a sunny spot. 2 feet.

Per pkt.

No. 398. **Carters New Rainbow** (see Photograph). A magnificent strain. Plants of perfect habit, carrying enormous plumes from pale rose to deepest crimson and deep primrose to old gold. Per oz. **2.00** .40

No. 400. **Carters Dwarf Golden**. Splendid type for bedding or pot work, the compact plants bear splendid feathery plumes and come quite true from seed. Height, 15 inches **.25**

No. 401. **Carters Dwarf Crimson**. Splendid type for bedding or pot work, the compact plants bear splendid feathery plumes and come quite true from seed. Height, 15 inches **.25**

No. 399. **Carters Perfection Plume. Mixed**. Per oz. **1.25** .25

COCKSCOMB (*Celosia Cristata*). — Annual. Our strain cannot be surpassed. For earliest work, sow in January or February, and again in spring for general work, using good, light, sandy loam.

No. 468. **Carters Empress**. — Combs of immense size; we have measured these 15 inches across. Rich crimson, dark foliage **.10 and .25**

No. 469. **Crimson**, light foliage. Good ordinary stock . . **.10 and .25**

No. 358. **Dwarf Mixed**, very choice strain **.25**

Carters Rainbow Celosia

Centaurea Americana. (*Annual. Height, 2 feet.*)

This beautiful annual can be sown in open ground in spring. Although this charming lavender *Centaurea* has been offered by us for many years it has never attained the popularity which its beauty deserves.

No. 413. Price, **.25** per pkt.

Centaurea (*Perennial*).—Beautiful silver-foliaged plants, with variously cut leaves, for mixed borders or variegated bedding. Sow in spring and prick out.

No. 410.	Candidissima.	Purest silver.	2 feet	Per pkt.	.25
" 411.	"	Compacta.	1 foot		.25
" 412.	Gymnocarpa.	Wide leaf			.15

CENTAUREA, OR GIANT SWEET SULTAN

The flowers of this greatly improved annual are at least twice the size of the older varieties. It is most deliciously scented, with long flower stalks to facilitate cutting, and when cut will last in water for a fortnight. In this respect alone it exceeds any other annual we can call to mind. We give this flower the highest possible recommendation. *For ordinary Sweet Sultans see page 169*

Height, 1½ feet.

May be sown in pots and pricked out for early flowering, or in open borders in spring for general work.

ANNUALS

	Per pkt.

" 413. Americana. Purple, thistle-like flowers, <i>see page 103</i> . .	.25
" 414. Depressa. Old-fashioned annual, with large blue flowers .	.10 and .25

CHRYSANTHEMUM ANNUAL

Of all annuals these pretty flowers hold a leading position, and many of them have been raised on our Seed Farms. All are beautiful in beds and borders and good for window boxes or cutting. Sow seed in spring in boxes for early flowering, and in the open for general work. Some varieties make useful pot plants; for this purpose they should be sown under glass. 1½ feet.

No. 420. **Carters Choice** Per pkt.
Mixed Annual .15 and .25

ANNUAL CHRYSANTHEMUMS

No. 415. **MORNING STAR.** Per pkt.

" 435. Snowball.	Double. Beautiful pure white. Height, 1 foot15 and .25

Perennial Varieties see page 106.

CHRYSANTHEMUMS — *Continued* (Perennial Varieties)

Chrysanthemum, Shasta Daisy. Much Reduced

		Per pkt.
No. 437.	Shasta Daisy. A new perennial variety with large white flowers on long stalks. When sown very early under protection the flowers often appear before summer is over. Height $2\frac{1}{2}$ feet15 and .25
" 436.	Maximum "Princess Henry." Single. Pure white; good for cutting15 and .25
" 1530.	" "King Edward VII." Single. A splendid large-flowered variety, which we highly recommend; the flowers are pure white, and borne on long, stiff stalks well above the foliage. Height, $2\frac{1}{2}$ feet25

Carters Early Autumn Flowering Hybrids

Can be treated as an annual.

Sown in January and February will produce plants which flower from the middle of August onwards. Both for outdoor culture and growing under glass this strain is extremely valuable, supplying large quantities of cut flowers at a season of the year when they are particularly needed.

Singles, semidoubles, and doubles in endless varieties of shades are contained in this splendid mixture.

No. 159465

| No. 446. | Carters Choicest Mixed | Price, .40 per pkt. |
|----------|----------------------------------|---------------------|

- " 448. **Cineraria Maritima.** — A well-known hardy silver-foliaged perennial, for bedding or mixed borders; 1½ feet. The seed of this variety should be sown under glass in early spring, and the seedlings planted outside when all danger of frost is gone Price, .10 and .25 per pkt.

Sow seed in pans filled with a good, light, sandy compost, in spring up to the beginning of July. Transfer to small pots as soon as the seedlings have developed their leaves, and pot on as the plants require it. They should be grown in a cold frame until frost necessitates their removal to a greenhouse. Even in winter they should not receive much artificial heat. Will come into bloom from Christmas to May.

Double Scarlet Queen

CLARKIA

Well-known hardy annual, of great decorative value and easy culture. Seed should be sown in spring in the open border. The *Elegans* type are excellent for vases, as the long spikes continue to bloom for many days. Sown during autumn and grown on in a cool-house, Clarkias make magnificent plants 4 to 5 feet high for greenhouse decoration or winter garden.

Clarkia Elegans, Double Scarlet Queen. — The most brilliantly coloured variety of the tall-growing Clarkias, surpassing even the *Salmon Queen* for some purposes. Height, 2½ feet.
No. 1409, Price, .25 per pkt.

- | | |
|---|-------------|

HOMESTEAD, N. J., 1914.

GENTLEMEN: I am more than pleased with the results obtained from the seeds which I bought of you. Thanking you for all past favors, I remain,

Yours very truly, ROBERT W. JOE

CARTERS EARLY FLOWERING COSMOS (COSMEA)

Carters Early Flowering Cosmos

A pretty feathery-foliaged annual, useful for cutting, grows to a height of 4 feet, and very effective right up to the frost. Makes a nice winter flowering pot plant if sown in summer. Cosmeas have hitherto been shut out of our gardens on account of their lateness in flowering; this novel race brings them within the range of desirable flowers for this country. Height, 3 to 4 feet.

			Per pkt.
No. 1459.	Early Flowering Varieties, in white, rose, pink, and mixed	Per oz. 1.25	.10 and .25

CARTERS "PERFECTION" CYCLAMEN

SIZE OF BLOOM OF CARTERS WHITE SWAN CYCLAMEN.

	Per pkt.		Per pkt.
No. 505. Carters Superb Mixture. — Our grand large-flowered strain in all its best forms and every shade of colour, including our superb salmon. This is a selection of many years' patient observation and labour50	No. 511. Fairy Queen. — Pale rose, compact habit50
" 506. Carters White Swan. (<i>See Photograph above.</i>) — The most profuse-blooming white Cyclamen in cultivation50	" 512. Mont Blanc. — Magnificent, pure white50
" 513. Brilliant. — Pure deep crimson blooms, with a metallic sheen shading each petal and making a very brilliant effect75	" 514. Princess May. — A dainty soft pink50
" 516. Dainty Queen. — A true giant flower of splendid substance. Colour a soft, rosy mauve, deeper at the base. Should be in every collection75	" 515. Rosy Morn. — One of the finest in form; colour, bright rose with dark claret base50
" 1608. Excelsior. — The largest, solid white flower with claret base, equal in size or vigour to White Swan75	" 517. The Sultan. — The richest-coloured Cyclamen; intense crimson50
" 1460. Carters Salmon. — Distinct and fresh; a strong and vigorous variety50	" 1599. "Mrs. Buckston." — This novelty bears beautifully frilled petals of a real salmon shade of colour. The flowers are very large and freely produced65
" 507. Charming Bride. — A superb pure white variety, with large, handsome petals.50	" 521. Carters Butterfly Cyclamen. — This charming variety may be considered one of the most striking among florists' flowers. The colours are surprisingly varied and beautiful. This has taken the highest prize wherever exhibited, and will prove of intense interest to Cyclamen lovers50
" 508. Crimson Queen. — A bold, well-formed flower; colour, deep maroon red.50	" 522. Carters Crested Cyclamen. — A very pretty type of flower, contrasting conspicuously when mingled with a collection of the ordinary type. The flowers very lasting. Choicest mixed50
" 509. Dixon Hartland. — White; dark claret base; large flower; fine form50	" 518. Collection of 12 varieties for.	3.00
" 510. Duke of Connaught. — Deep cherry colour; blossoms of grand substance and form50		

Sow in heat in pots or pans, in peaty loam and sand, covering the seed scarcely a quarter of an inch; keep the soil moist but well drained. The seed takes from four to six weeks to germinate. When the bulbs are the size of a pea transplant into small pots and transfer to larger pots as they develop. An average of sixty degrees is the temperature best suited for producing well-developed flowers, and good ventilation without draught is a safeguard from disease.

DAHLIA

Carters Cross-Fertilized Strains

Our strain has been specially hybridized and fertilized with various species, and should produce some novel kinds. Sow the seed in early spring, in heat, and pot off. Plant out as soon as large enough in June.

The Photograph depicts **Carters Perfection Single Dahlia**.

Grown from Seed in 6 Months

which formed a conspicuous display among the sorts listed below in our Trial Grounds this past summer; many visitors were, in fact, surprised that the Dahlia can be so easily raised from seed sown in the early spring.

No.		Per pkt.
521.	Carters Single Dahlia. Magnificent flowers of the newest and best colours.25
525.	Pigmy Single Dahlia. Forms a dwarf bush.25

CARTERS NEW ESCHSCHOLTZIAS (California Poppy)

Carters
Selected
Eschscholtzias
(California Poppy)

NOVELTY

No. 1609. **Carters New Fringed Eschscholtzias.**—We have been responsible for the introduction of more new varieties of eschscholtzia. This year we introduce a new form, prettily fringed, of the California type, with a deep-coloured base.

Price, per pkt., .25

No. 1598. **The Rajah** is another outcome of the various crossings which we have described with some detail in previous catalogues, and is a new colour which can best be described as a purplish carmine.

Price, per pkt., .25

No. 1576. **Carters New Hybrids** contain shades and tints of colour rare in Eschscholtzias, intervening between the pale rosea and the intense *Mikado*, and between the lemon and the brilliant *Carmine*, giving a variety interesting and brilliant.

Price, per pkt., .25

No. 635. **The Mikado. Award of Merit, R.H.S.**—A cross between *Mandarin* and *Carmine King*. The blend of these two colours has produced a brilliant orange crimson, suffused with the lustre of the *Carmine King*.

Price, per pkt., .25

No. 581. **Carters Carmine King.**—Much admired by those having seen it, the lustrous carmine colour being quite novel in Eschscholtzias.

Price, per pkt., .15 and .25

No. 584. **Carters Diana.**—This is a most dainty flower. The colour is a rosy white, while the petals are fluted in a most novel manner, giving the flower quite a fantastic and attractive appearance.

Price, per pkt., .15 and .25

No. 1490. **Dainty Queen.**—A beautiful shade in Eschscholtzias. Colour a tender blush or pale coral pink.

Price, per pkt., .15 and .25

No. 1491. **Carters Double Orange.** A great variety . . . Per pkt. .15 and .25

" 582. **Carters Mandarin.** Exterior of blossom orange crimson. . . Per oz. .60 .15 and .25

" 583. **Carters Rose Cardinal.** Delicate bright rose. . . Per oz. .60 .15 and .25

" 585. **The Golden West.** Orange yellow. The largest flowering of all the Eschscholtzias10 and .25

" 588. **Californica Lemon.** Yellow. One of the old but popular varieties . . . Per oz. .40 .10 and 25

ESCHSCHOLTZIA or California Poppy is a hardy annual of immense utility for mixed borders. Free blooming, and of the easiest culture. Sow in open in spring and thin out. Height, 1 foot.

EVERLASTING FLOWERS

HELICHRYSUM

----------	--	-----

ORNAMENTAL GRASSES FOR DECORATIONS

Cultivation. — The annual varieties should be sown out of doors during April, where they are intended to flower, or for earlier work sow under glass and plant out. The perennial varieties are best sown during summer, and planted out in borders in spring. The flower heads should be cut in a young stage and hung upside down to dry, as they are then more lasting for decorative purposes. Varieties marked thus * will not bloom the first year from seed.

No. 130. Ornamental Grasses

GARDENIA (Cape Jessamine).

No. 652. **Florida.** Pure white; delicious; pot plant .65

GENISTA (Cytisus). — Perennial. Sow Candicans in spring, in pans, and grow on in pots. Andreeana should be sown in the open ground, where intended to remain or transplanted.

No. 654. **Andreeana.** Hardy shrub, orange yellow, maroon markings .25

" 655. **Candicans.** Yellow; favourite for table decoration. 2 feet .15

CARTERS ORNAMENTAL GOURDS

Ornamental Gourds, require about the same cultivation as Vegetable Marrows or Squash, and should be largely grown in Flower Gardens and Pleasure Grounds.

Trained over a Pergola, they form a distinct, interesting, and beautiful feature. The smaller fruiting Apple, Orange, Pear, and Egg-shaped kinds produce a charming effect when trained over arches, while the majority of varieties have a very charming effect when tied up to poles.

	Per pkt.

Seed in Six
Months

No. 678. Carters Invincible Prize Superb Mixture

Price, per pkt., .65

It may be asserted without fear of contradiction that no flower for exhibition produces a greater effect than a first-class group of Gloxinias. The superb mixture we offer under the name *Invincible* is magnificent. It contains all the best self-colours, crimson, sapphire, purple, rose, blush, violet, white, etc., also the finest edged, tipped, ringed, and shaded varieties, together with the most beautiful spotted or marble kinds, and is the finest we have seen.

" 684. Othello. — Very large; deep blue40
" 685. Gloxinia. — Erect varieties.40
" 686. Drooping varieties40

Culture. — Sow in well-drained pans from January to March (or in the autumn), fill the pans with soil consisting of a mixture of half peat and half leaf mould, with a small quantity of pulverized charcoal and silver sand sifted very fine, to within half an inch of the rim; water with fine rose, then sow the seed thinly, taking care not to cover it with soil; place in a temperature of 75 degrees, and cover the pans with a piece of shaded glass, gradually removing the same as the seedlings progress. When large enough to handle, prick off into pans at about one inch apart, then pot off into single pots. Many will soon attain the requisite strength to go into 5 inch or 48 pots, and will bloom in August and September of the same year.

For price of Gloxinia Bulbs see page 174

Carters Double Pink Godetia

GODETIA

One of the choicest of all
annual flowers

We have grown them in large areas for many years and were awarded the First-Class Certificate of the Royal Horticultural Society for that beautiful variety, *Lady Satin Rose*, perhaps the finest annual flower ever raised. The Godetia makes an excellent cut flower.

Carters Double Pink

No. 698. Hardy Annual, quite distinct, producing long spikes with 18 to 20 beautiful double pink blooms. They make an excellent cut flower, a spike of half-opened buds continuing to develop for a long time if fresh supplies of water be given daily. It also makes an effective pot plant for the conservatory stage when sown at end of summer and kept growing through the winter in a cool house. Height, 2 feet.

Price, .15 per pkt.

Carters Lavender Trailing

No. 700. This most graceful Godetia of a colour unknown before will be a surprise to botanists and growers alike. During the first of the season it is slightly trailing; when commencing to bloom the plants become upright, attaining a height of 2 feet. The flowers are nearly 2 inches across and are produced in royal abundance.

Price, .25 per pkt.

"The Godetias I had from you last spring are a fine show just now, and have been much admired." — Mrs. RAE.

	Per pkt.
No. 702. Carters Miniature Crimson. — A most valuable plant for edging or bedding; a dwarf compact variety, with glowing crimson flowers. Height, 6 inches25
" 687. Carters Dwarf Deep Rose Pink (<i>Lady Satin Rose</i>). — The flowers are of a most beautiful deep rose pink, the surface shining like satin. Height, 1 foot15 and .25
" 688. Carters Dwarf Pink (<i>Rosamund</i>). — A rich, glossy pink. Height, 1 foot15 and .25
" 689. Carters Dwarf Crimson (<i>Gloriosa</i>). — A rich, glowing crimson. Height, 1 foot15 and .25
" 693. Carters Dwarf White (<i>White Pearl</i>). — Height, 1 foot15 and .25
" 692. Carters Tall Dark Rose (<i>Lady Albemarle</i>). — Height, 2 feet15 and .25
" 691. Carters Tall Carmine (<i>Duke of York</i>). — Height, 2 feet15 and .25

Carters Double Hollyhock

HOLLYHOCK

Now that so many beautiful forms are to be obtained quite true from seed, this delightful subject should again become popular. We therefore recommend our customers to again give this useful plant a place in their borders.

Where plants have suffered from rust they should be sprayed with Bordeaux Mixture early in spring, and again when the flower spikes are forming.

Seed is usually sown in summer, and the plants grown on to flower next season, but some prefer to sow in boxes or on a hotbed early in the year, prick the young plants out, and plant out in April to bloom same summer.

Carters Double Show Hollyhock

	Per pkt.

No. 728. Choice Mammoth Fringed Varieties. Mixed colours15 and .65
" 1588. Hollyhock. Single hybrids15 and .65

No. 72. Hollyhock, Double Palling Belle. This particularly fine form bears large double flowers of a charming shade of silvery pink and attracts much attention; a splendid subject for clumping at the back of herbaceous borders.

Price, per pkt., .65.

No. 727. Hollyhock, Carters Perpetual-flowering, mixed (Annual Type). — Sown early in spring and planted out first week in May, it will bloom from middle of July to late in autumn. Habit branching, semi-tall, flowers double, with graceful, loose petals Price, per pkt. .15 and .25

KOCHIA (Trichophylla)

(Mock or Summer Cypress)

No. 750. Carters Selected Kochia (*Trichophylla*).—Hardy Annual. Makes a most effective decorative plant with a habit much resembling one of the compact evergreen shrubs; it has a light grass-green feathery foliage, which changes in the fall to a rich crimson. It is a perfectly hardy annual and can be sown in the open ground; is a rapid grower and flourishes on all soils. The best method is to sow the seed under glass, pot the seedlings off singly, and ultimately bed out. These round, shrublike plants (often called the Mock Cypress), are most useful for the center of any bed or when planted out in some decorative scheme. Height about 2 feet. . . . Price, per oz. .40; per pkt. .15

For Complete List of Garden Fertilizers see page 181

HIBISCUS (Mallow Tribe). — Showy annual and perennial. Sow *H. Africanus*, the annual species, in early spring under glass, and plant out when all fear of frost has gone. *H. Coccineus* should be sown in heat, and potted off and grown in warm house.

- No. 718. *Africanus* (African Rose), annual; creamy yellow, purple markings. 1½ feet10
 " 719. *Coccineus*; scarlet greenhouse shrub; used for decoration of walls. 6 feet10
 " 1493. *Syracus*, mixed; hardy perennial shrub10

HONESTY (Lunaria). — Hardy perennial. Singular seed vessels, useful when dried, for house decoration in winter. Sow in spring.
 No. 729. Purple10 and .25
 " 730. White. 1½ feet15 and .25

HONEYSUCKLE, JAPANESE. — Perennial.
 No. 731. *Variegata*. Evergreen; fine in window boxes and hanging baskets.15

HUMEA. — Biennial. For greenhouse, in pots. It also makes a graceful plant when used in beds during summer. Sow in summer in pots, in cool frame or greenhouse, and pot off.
 No. 732. *Elegans*25

ICE PLANT. — Annual.
 No. 736. *Mesembryanthemum Crystallinum*10 and .25

IMPATIENS (Balsam). — Annuals. Sow in spring in heat and pot off. Perpetual bloomers.
 No. 737. *Sultani*. Rosy scarlet25

IMPATIENS HOLSTI (Zanzibar Balsam). — A new annual plant from East Africa, resembling the Zanzibar Balsam in habit, leaf, and shape of blossom. Colour vermilion red. A beautiful plant for half-shady places and pots. Most striking. Awarded a first-class certificate, R. H. S.
 No. 73825

INCARVILLEA. — Perennial. Beautiful Gloxinia-like flowers. Sow in spring under glass, and pot off. Makes an effective plant in a warm border, as its flowers are produced on long stems.
 No. 739. *Delavayi*. Flowers lovely crimson purple, with yellow-veined throat25

Comparative Tests of Lobelia in our Trial Grounds

LOBELIA

Very popular garden plants. The compact-growing varieties are sown under glass, and transplanted into boxes for growing on to be ready by the bedding-out season. The spreading varieties are suitable for hanging baskets and window boxes, whilst the perennial species are grown as single specimens in beds for summer decoration.

MUSK (*Mimulus Moschatus*). — Half-hardy annual. May be grown in pots, or planted out in beds and borders. Sow in spring under glass.

No. 877. *Yellow*. Fragrant pot or garden variety . . .10 and .25

MYRTLE (*Myrtus*). — Evergreen Shrub. Sow seeds in spring under glass.

No. 878. *Communis*. White, fragrant . . .15 and .25

MYOSOTIS. — *See Forget-me-Not*, page 120.

MIMULUS (Monkey Flower)

Half-hardy annual. To those who know only the original kind, the present magnificent specimens will come as a delightful surprise, the blossoms being of grand size and richly coloured. Besides being of service in beds and borders, they make nice pot plants.

Sow in early spring, in pans under glass, and prick off into boxes, and plant out when hardened. For pot work the seedlings should be pricked out, and potted off in good light compost, and kept in warm frame.

No. 871. *Carters Queen's Prize*, Mixed. Magnificent. (*See Illustration*) . . . Per pkt. .25

This lovely large-flowered variety originated at our Nurseries, and we were awarded the First-Class Certificate of the R. H. S. for our efforts.

CARTERS FRENCH MARIGOLDS

No. 1. Carters Compact
Striped.

No. 2. Carters Gold
Edged.

No. 3. Silver King.

No. 4. Legion of Honour.

For Description and Price
of Seed, see page
facing

FRENCH MARIGOLD

(Tagetes)

This showy annual can be sown in spring and thinned out where expected to bloom; they may also be sown in March in boxes or pots under glass, then transplanted into other boxes, three inches apart, to make sturdy stuff for planting out in June or earlier. Marigolds are profuse bloomers, particularly so if all dead flowers are cut off.

Carters Compact Striped. No. 1. (*Photograph opposite.*) Beautiful large double blossom, dwarf variety, about 1 foot; continues blooming until the end of summer.

No. 845. Price, .15 and .50 per pkt.

Carters Gold Edged. No. 2. (*Photograph opposite.*) A beautiful annual of compact but vigorous habit; flowers a velvety maroon with gold edge; very constant, and owing to its deep root is able to withstand drought; makes a handsome edging plant. Height, 1 foot.

No. 842. Price, .15 and .65 per pkt.

DWARF SINGLE-FLOWERED VARIETIES

The following kinds are extremely beautiful in the mixed border, whether singly or in clumps; habit dwarf and bushy, and covered with continuous bloom. 1 foot. First-class annuals.

No. 843.	Silver King. No. 3. (<i>Photograph opposite.</i>) Colour lemon and chocolate	Per pkt.	
" 844.	Legion of Honour. No. 4. (<i>Photograph opposite.</i>) Dark gold and maroon15 and .40	
		.15 and .40	

DWARF DOUBLE-FLOWERED VARIETIES

No. 846.	Butterfly. A taller growing double variety, brilliantly marked and striped. 1½ feet15 and .25	
" 847.	Dwarf Golden. Fine dwarf bedding variety. 1 foot15 and .25	
" 848.	Dwarf Orange. Selected colour; excellent. 1 foot15 and .25	
" 849.	Dwarf Striped. Useful for bedding or edging. 1 foot15 and .25	
" 850.	Mixed, Carters Dwarf Varieties. All colours; for beds. 1 foot	Per oz., .60	.10 and .25

TALL DOUBLE-FLOWERED VARIETIES

No. 851.	Tall Orange. Nice variety for cutting. 1½ feet15 and .25	
" 852.	Tall, New Large-flowering. Double striped. 1½ feet15 and .25	
" 853.	Mixed, Carters Tall Varieties. An effective and welcome ornament to the mixed border, shrubberies, etc. 1½ feet	Per oz., .75	.10 and .25

LARGE-FLOWERED AFRICAN MARIGOLD

From their bold appearance and enormous globular flowers these showy annuals are specially effective in large mixed borders. Sow at the end of winter under glass, and transplant in April and May.

No. 854.	Carters Giant Show Lemon. Superior strains for exhibition. Enormous blossom. 1 foot15 and .40	
" 855.	Carters Giant Show Orange. Superior strains for exhibition. Fine habit; grand flower. 1 foot15 and .40	
" 856.	Lemon. The tall garden variety; select stock. 2 feet	Per oz., 1.25	.10 and .25
" 857.	Orange. Showiest of flowers; brilliant effect. 2 feet	Per oz., 1.25	.10 and .25
" 858.	Mixed, Carters Varieties. Carefully selected. 2 feet	Per oz., 1.25	.15 and .25

(Also see *Calendula*, page 95)

MATHIOLA (Night-Scented Stock)

Hardy annual, of easy culture. Sow in spring.

No. 833.	Bicornis. 1 foot. This should be in every garden, as it possesses a most delicious odour, especially toward evening, when it sends forth a delightful perfume, permeating the whole of the atmosphere, surrounding it with its beautiful fragrance	Per oz., .50	.10 and .25
----------	--	--------------	-------------

The following is taken from correspondence addressed to the Editor of *The Daily Mail*:

NIGHT-SCENTED STOCK (*Mathiola Bicornis*).
This latter plant, although but little known, should be in the garden of every lover of sweet things. During the day it is scentless and insignificant looking, but towards dusk it emits a delicious perfume that continues all night."—A LOVER OF SCENTED GARDENS.

CARTERS PERFECTION MIGNONETTE

A giant red-flowered variety, with a delicious scent

Carters Perfection Mignonette

No. 859. Price, .25 and
.65 per pkt.

This strain is a great improvement, and owing to its robust habit the seedlings require plenty of room; they make bushy plants resembling Intermediate Stocks. The spikes of bloom are larger than any other variety, and the habit much less straggling. If the seed pods are kept pinched off, the beauty of the plant will extend over a long period, and with care in this respect will continue until cut down by frost.

Per pkt.

No. 1494. **Mignonette, Carters White Queen.**—A distinct and beautiful variety, producing large spikes of white bloom, exquisitely scented. Height, 15 inches25 and .50

No. 860. **Carters Victoria.**—Produces a fine, shapely spike of bloom; excellent colour, highly scented. . . . Per oz. .75 .15 and .40

No. 861. **Crimson Giant.**—Fine hardy variety of the greatest use for general purposes. 1 foot Per oz. .40 .15 and .25

No. 862. **Machet.**—An excellent variety for pot work; strong, dense blooms, glossy green foliage. Per oz. 1.00 .15 and .25

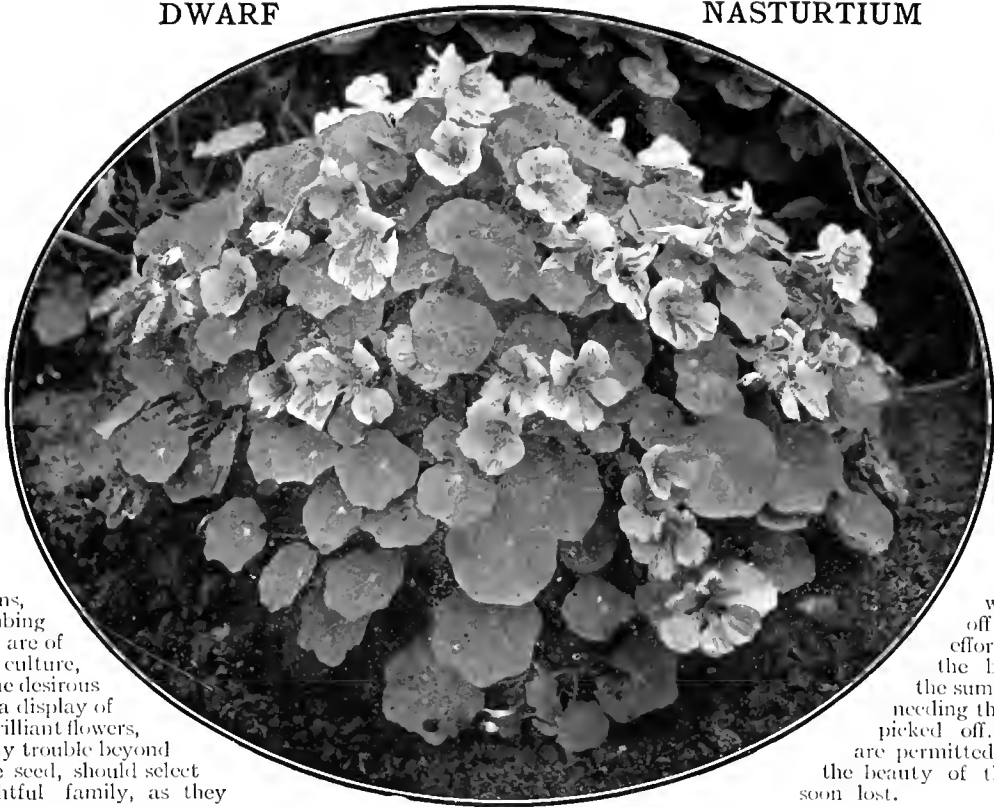

No. 863. **Carters Garden Sweet.** This is a selected stock of the original Mignonette of gardens; delicious odour. . . . Per oz. .35 .10 and .25

No. 1495. **Mignonette, Carters Red King.**—The finest and richest red, a great improvement on the crimson *Victoria* variety, deliciously scented. Height, 15 inches . . .25 and .50

- No. 864. **Carters Spiral.**—First-class free-blooming variety, with long, slender spikes; makes a good exhibit. 1 foot Per oz. .50 .15 and .25
- " 865. **Goliath.**—Magnificent blossoms; richly scented Per oz. 3.00 .15 and .25
- " 866. **Golden Gem.**—The finest dwarf golden varieties. 6 inches Per oz. 1.25 .15 and .25
- " 867. **Golden Queen.**—For a long time the leading yellow variety; more branching in habit than *Golden Gem* Per oz. 1.00 .15 and .25

DWARF

NASTURTIIUM

Nasturtiums, both climbing and dwarf, are of the easiest culture, and any one desirous of having a display of the most brilliant flowers, without any trouble beyond sowing the seed, should select this delightful family, as they

will give off their best efforts through the brightest of the summer, merely needing the seed-balls picked off. If these are permitted to mature the beauty of the plant is soon lost.

Carters Lilliput Nasturtium Photographed in our Trial Grounds at Raynes Park

This beautiful annual originated at our Essex Seed Farms

These make the most beautiful bedding and border plants, and if sown at intervals from March to June the display of bloom will last until cut down by frost.

GOLDEN FOLIAGE

		Per pkt.	Per oz
No. 879.	Carters Golden Queen. — Rich golden-hued foliage; very compact; flowers bright yellow; a very effective variety	.15	.40

" 900.	Terra-Cotta. A rich salmon-brown flower; nice habit; bright green foliage	.10	.40

Climbing Nasturtiums Photographed in our
Trial Grounds, Raynes Park

CLIMBING NASTURTIUMS and Tropæolums

The Climbing Nasturtium has long been a popular annual flowering plant, as when once the seed is sown it requires no further attention. It is invaluable for covering unsightly spots, as when the position does not admit of its climbing, it is equally at home as a creeper. The seeds must not be sown until all chances of frost are over.

		Per pkt.	Per oz.

"The Pentstemons from your mixture of seed have been greatly admired at my place here, the borders have been simply grand with them; the colours are truly magnificent, and the blooms giants in size." — J. B. HACKETT, Esq.

Pentstemon, Carters Annual

PHLOX DRUMMONDI

Carters Large Flowering Phlox

The great advance recently made in the size and colourings of this popular annual should ensure its becoming a favourite for growth in beds and borders. It makes a most effective edging. Another point of importance in the culture of this pretty flower is the fact that it does not like being watered with cold pipe water, especially overhead; it spoils the foliage and ruins the truss. This section may be expected to reach the height of 1 foot.

No.		Per pkt.

PANSY

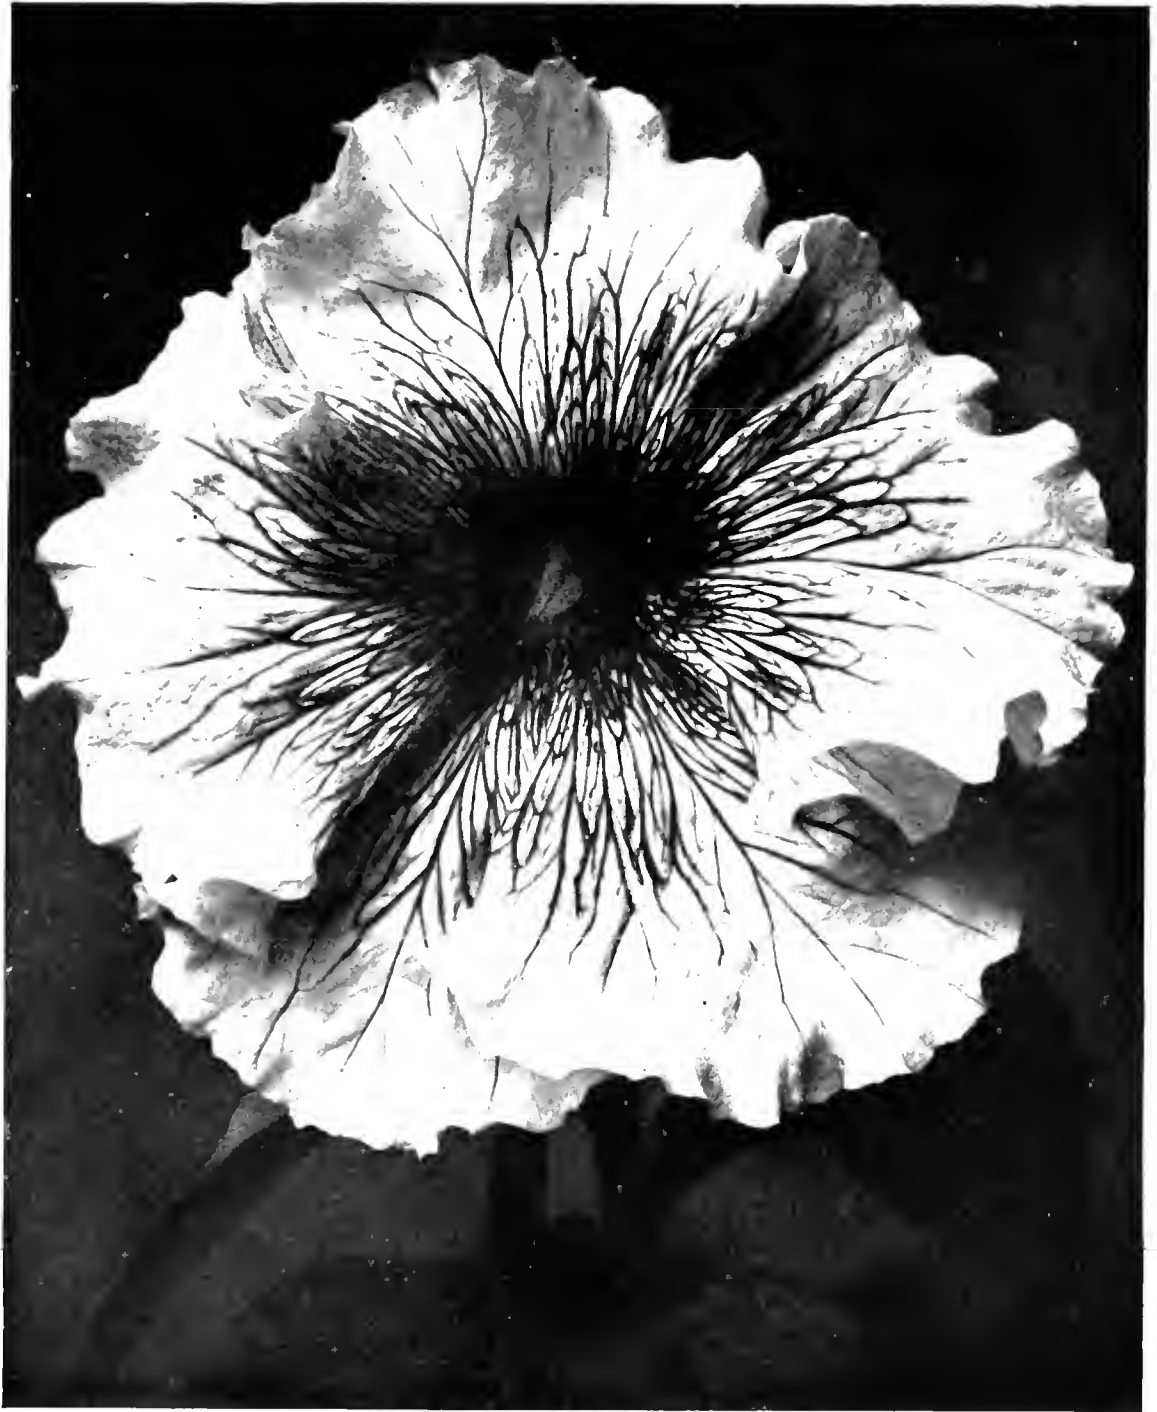

Testing Pansies in Carters Trial Grounds, Raynes Park

It is now more than half a century since the late Mr. James Carter took this plant in hand with a view to its improvement in size and range of colourings, and one of our earliest successes was *Jet Black Pansy* (see No. 957). We also introduced the *Peacock Pansy* (see No. 951). Both are still amongst the best in cultivation.

(See Photograph on preceding page for Reference Numbers.)

		Per pkt.
No. 947.	Carters International Prize (see Nos. 1 and 3). — A superb mixture of the largest and best types in every class. Will produce enormous blooms in all the richest colourings and markings. As the name suggests, it is the best of all English and Continental strains, grown under our personal supervision, and acclimatized in this country Per oz. 12.00 ; ¼ oz. 3.50	.25 and 1.25
" 948.	Carters Giant Curled (see No. 8). — Large flowers of striking form and immense fulness, giving them the appearance of being somewhat double. They are variously coloured in all the richest shades, markings, and lacings, and prettily fimbriated. Quite a new class of the greatest beauty. Per oz. 8.00	.25 and 1.25
" 949.	Carters Prize Show (see No. 6). — The largest blotched and richly belted types. Very fine for exhibition or cultivation in pots Per oz. 8.00	.25 and 1.25
" 950.	Carters Fancy Striped (see No. 5). — Elegantly striped, splashed, and mottled, a very curious combination of colours that cannot fail to elicit astonishment. The flowers are large and freely produced, and the habit of the plant dwarf and compact Per oz. 4.00	.25 and .65
" 951.	Carters Peacock (see No. 7). — The only variety possessing the true Peacock blue colours. Introduced by our house Per oz. 6.00	.15 and .40
" 952.	Lord Beaconsfield (see No. 4). — A lovely Pansy, the lower petals being a rich dark velvet blue and the upper ones a silvery blue Per oz. 2.00	.15 and .40
" 953.	President Carnot (see No. 2). — One of the prettiest grown. All blue flower, with a wide belt of white on the outer edges. Very effective Per oz. 4.00	.15 and .40
" 954.	Fairy Queen . — Rich lavender blue, edged with white; very profuse bloomer, but not so large in size as <i>Carters International Prize</i> Per oz. 2.00	.15 and .25
" 955.	Silver Edged . — Deep maroon, with pure white margin; very effective and profuse bloomer, almost as large as <i>International Prize</i> Per oz. 2.00	.15 and .25
The following selection includes all the largest of the self-coloured varieties:		
" 956.	Carters Blue . — True blue; distinct shade; very large Per oz. 2.00	.15 and .25
" 957.	Jet Black . — The very best; of velvety texture; extra fine. " " 2.00	.15 and .25
" 958.	Pure White . — A lovely flower, without eye; very pure. " " 1.75	.15 and .25
" 959.	Rich Yellow . — A rich, pure yellow; very effective " " 2.00	.15 and .25
" 960.	Rich Maroon Red . — Beautiful and showy; quite distinct. " " 2.00	.15 and .25
" 961.	Rich Purple . — Bold, massive flowers; very fine " " 2.00	.15 and .25
" 962.	Royal Standard . — Golden Yellow " " 3.00	.15 and .25
" 967.	Mixed Pansy . — Ordinary " " 2.00	.10 and .25

Cultivation. — The Pansy will succeed in any soil that is not too hot and dry, and if a special compost is made for them it should consist of one third rich loam, one third leaf mould, and one third well-decayed dung. In early spring the seed should be sown in frames or in boxes for summer and autumn blooming, and later on sowings may be made about July out of doors in a partially shaded place, transplanting in October or November into where they are intended to flower the following season. The final position should be an open one, and the plants not less than 6 inches apart. The plants winter best in a cold frame, but when they are left to winter in the open they must be well protected from the elements with a good covering of straw and boughs. It is also well to know that they should not be watered during the hottest months with very cold water as they are very sensitive to the contrast. We have classed each type so that Pansy lovers have an opportunity of securing a large and varied choice, all representing the very best strains in cultivation.

CARTERS EMPRESS PETUNIA

(For Conservatory or Bedding)

Carters Empress Petunia. — We have been many years perfecting this magnificent type, which now embraces many delicate shades of colour, the majority taking the lovely form as shown in the photograph above, which represents a natural bloom. The elegant pencilling in the throat is quite a feature of this fine introduction. It also possesses such a robust but compact habit that it is valuable as a bedding plant, where the fine flowers have a rich effect.

No. 968. — Price per pkt., .25 and 1.25

The Gold Medal Exhibit of Carters Petunias and other Flowers, Royal International Horticultural Exhibition

CARTERS GRAND STRAINS OF PETUNIA

No. 968. **Carters Empress Strain.** (*See preceding page for description.*) Price per pkt., .25 and 1.25

No. 977. **Carters Emperor Strain of Single Petunia.** (*All colours, mixed.*) A great improvement upon the old-fashioned Petunia; flowers twice as large, some self-coloured, others parti-coloured. A bed of these is an object of great beauty during summer, and equally effective as pot plants for conservatory Price per pkt., .25 and 1.25

	Per pkt.		Per pkt.

Description & Price See Page Facing

CARTERS "SHIRLEY" POPPY

(Silk or Ghost Poppy) (See Photograph No. 1)

This lovely annual Poppy has probably received its various names from its delicate texture and almost shadowy forms. The shades of colour are endless and of unusual beauty, rigidly selected from the stock of the original nominator, the Rev. W. Wilks, Secretary to the R.H.S. It makes a delightful border plant, and is fine for sowing at the sides of grassy walks or along paths where nature's growths give a wilderness-like effect to the surroundings.

No. 1031. Price, per pkt., .15 and .40

OTHER SINGLE ANNUAL POPPIES

	Per pkt.
No. 1047. Peacock (<i>pavonium or umbrosum</i>). — Producing charming miniature blossoms; a bright crimson with black spot. 1 foot.	Per oz. .75 .15
" 1048. Tulip (<i>Glaucum</i>). — A bijou variety	Per oz. .75 .15
" 1050. Victoria Cross (see Photograph No. 4). — A variety of remarkable beauty; flowers brilliant scarlet, with broad, white cross	Per oz. .30 .15

POPPY (Papaver), DOUBLE ANNUAL VARIETIES

These showy, hardy flowers continue to absorb the attention of the greatest number of amateur gardeners, and deserve the position from their varied and intrinsic beauty. Sow thinly in patches, rows, or beds in spring where the plants are intended to bloom during early summer. The show may be extended if the seed pods are kept cut off. When used as cut flowers should be picked early in the morning before opening out.

No. 1062.	Double varieties. Novel colours25
" 1063.	Single varieties. Mixed10 and .25

CARTERS GARDEN PRIMROSE

The Primrose is one of those plants that resents too much coddling, and sometimes when great care is taken over the seeds they refuse to grow. The simplest plan is to sow them in the open ground, in a partially shaded place, from May to July. Just scratch the seed in with a rake and firm the surface, when under the influence of genial showers they will soon come up. The Blue Primrose may be sown in borders at the same season.

- | | | | |
|-----------|--|--|--------------|
| No. 1028. | Primrose, Blue. | A great novelty in blue, of various shades | Per pkt. .25 |
| " 1029. | Primrose, Carters Choice Mixed. | A mixture of all obtainable colours, continually improved by cross-fertilization | .15 and .25 |
| " 1030. | Primrose, Yellow. | The lovely Old English Primrose of the Woods | .10 and .25 |

POLYANTHUS CLUSTER PRIMROSE

The superb strain we here offer of these lovely spring flowers improves in extent of colours each year. There is no other flower which produces such a chaste, brilliant, and enduring effect during the early spring months, either singly or in masses in beds, about the same time as the Hyacinths and Tulips. Sow in spring or summer, in prepared seed bed, and transplant when large enough.

- | | | | |

"Your Polyanthus of last year's seeds are lovely just now in a sheltered border; the Whites and Yellows are truly magnificent. The Candytuft, *Hyacinth*-flowered, was splendid with me last year." — Miss MILLER, Ardview.

This photograph illustrates our method of fertilizing and selecting Primulas at our Forest Hill Nurseries

CARTERS PRIZE SINGLE MIXED PRIMULA

A Grand Mixture of all the Best Colours. Price, .65 per pkt.

PRIMULA — Continued

- Per pkt.
1073. **CARTERS PRIZE SINGLE MIXED PRIMULA** (*see Photograph*). — This splendid mixture contains all the finest varieties and most beautiful forms of this popular greenhouse annual for which our house has long been famous. Several new seedling forms and art shades have now been introduced, in addition to the choicest standard varieties. When pricking out the seedlings, care should be taken not to discard the smaller plants, as these frequently produce some of the newest and most delicate shades **.65**
- No. 1065. **CARTERS PRIMULA PRINCESS MAY**. — A dainty pink colour, with enormous blooms of great substance, fine truss, and a robust grower. We consider *Princess May*, *Carters Coral*, and *King Edward* the three finest Primulas grown. Price, **.50** per pkt.
- NOVELTY**
1504. **Carters Holborn Crested**. — A very distinct and beautiful Primula of the Giant section, the result of a cross between *King Edward* and *Holborn Ruby*. The large pink flowers, beautifully fringed, carried on a fine truss thrown up well from the vigorous green crested foliage, **.65**
1464. **Carters Holborn Coral**. — This Giant Primula, the result of a cross between *Princess May* and *Holborn Salmon*, has trusses of immense substance and size, with a beautiful light-green eye; a strong habit and dark green foliage make it a valuable addition to our Giant type **.65**
1068. **Carters King Edward**. — The finest White Primula we have yet seen. The flowers possess immense substance, and are well thrown up **.50**
1064. **Carters Vermilion**. — High class, rich colour **.50**
1067. **Carters Salmon**. — Immense size and lovely colour **.40**
1069. **Carters Ruby**. — Brilliant crimson rose, fern leaved **.40**
1070. **Carters Crimson**. — Excellent habit and brilliant colour **.40**
1071. **Carters Blue**. — The First Class Certificate of the Royal Horticultural Society was granted to our House for this grand break in colour **.50**
1072. **Carters White Elaine**. — Grand truss, dark palm foliage; robust **.40**
1465. **The Duchess**. — White with zone of rosy carmine **.40**
1075. **Carters Carmine**. — A lovely rich colour **.40**
1076. **Carters White Queen**. — Pale green foliage **.40**
1077. **Carters Rose**. — A really pure rose colour of exceptional size **.40**
1080. **Single Mixed Colours** **.40**
1074. **Carters Bouquet Primula**. — This curious and beautiful type produces its flowers directly from the base or stool of the plant in the manner of the common Primrose, these flowers being surrounded with a leafy calyx, in which they remain fixed for a long time.
- Price, per pkt., **.50**

Carters Primula Stellata (Star Primula)

This is both delightful and graceful when in flower, and it makes a useful decorative plant on the conservatory stage in spring. Free flowering. Treatment for *Primula sinensis* will suit this species well.

- No. 1078. **The Duchess**. — A new Stellata variety, with rose carmine zone on pure white ground, making it specially attractive. Price per pkt. **.65**

		" 1088. Carters Prize "Double" Superb Mixture, .25 and 1.00	

Culture. — Sow in pans of finely sifted soil in spring, and pot off singly into thumb pots when large enough to handle. They require to be raised in heat and kept growing in cool house or frame through the summer. A cool bottom for pots to stand on is essential. Use a compost of leaf mould and rich, fibrous loam when shifting into larger pots.

PRIMULA—Continued

PRIMULA, Hardy Varieties.—Perennial. Sow in pans in cool frame, and prick off into boxes, then transplant. *Primula obconica* should be sown in heat, potted off, and grown in warm frames for conservatory decoration and cut flowers.

	Per pkt.
No. 1094. <i>Cortusoides</i> . Bright, for pots or rockeries. 6 inches15
" 1095. <i>Japonica</i> . A valuable subject for damp situations. With tiers of bloom. 1 foot25
" 1596. <i>Japonica hybrids</i> . This unique strain contains numerous new shades25

	Per pkt.
No. 1096. <i>Obconica</i> . Perennial; for use in greenhouse, etc.; continuous bloomer. 1 foot25
" 1507. <i>Obconica Gigantea</i> . A great improvement on the original50
<i>Obconica Grandiflora Hybrida</i> . Choice mixed50

PRINCE'S FEATHER (*Amaranthus Cruentus*).—Sow in open. Hardy annual for borders.

	Per pkt.
No. 1097. <i>Purple foliage</i> , with spikes of crimson blossom. Very pretty when well grown. 2 feet10 and .25

PYRETHRUM (Golden Leaved).—Hardy perennial. Ornamental foliaged plants; universal in carpet and other bedding; indispensable. Sow seeds in pans or boxes of sandy soil, prick off into boxes, and plant out in June.

No. 1101. <i>Carters Golden Ball or Moss</i> . Very distinct; forms a Ball of Golden Moss. This variety does not require pinching back like others, and is very late to flower. 4 inches25
" 1098. <i>White-flowered Feverfew</i> . Unlike the ordinary Feverfew. It serves as Golden Feather during the usual period, and then throws up a few inches higher a great profusion of pure white perfectly globular flowers producing an attractive after-effect15
" 1099. <i>Golden Feather</i> . Very popular for edgings. 1 foot10 and .25
" 1100. <i>Selaginoides</i> . Neatest of varieties; fine golden colour. 6 inches10 and .25
" 1102. <i>Laciniatum</i> . Foliage deeply cut, pale gold. 6 inches10 and .25

PYRETHRUM (Flowering Varieties).—Hardy perennials, bearing single and double Aster-like flowers on long stalks; excellent for cutting. 1½ feet. Sow in spring and transplant.

No. 1104. <i>Single</i> . Saved from the best colours, excellent cut flower for all purposes15 and .25
" 1105. <i>French</i> . Double or semidouble, carefully selected15 and .25

RANUNCULUS (Crowfoot).—Hardy perennial. Sow in spring or autumn, in pans in a cold frame, and plant out in spring when large enough.

No. 1106. <i>Asiaticus</i> . Saved from all the best colours. 6 inches15
--	-----

RHODODENDRON.—Evergreen flowering shrubs.

No. 1107. <i>Hybrids</i> . Saved from the finest known varieties25
--	-----

RHODANTHE.—(See Everlastings, page 119.)

RICINUS.—(See Castor Oil Plant, page 101.)

ROCK CISTUS (*Helianthemum*).—Hardy perennial. Seed should be sown in pans or boxes in cold frame, in spring, and seedlings planted out when large enough.

	Per pkt.
No. 1108. <i>Carters Mixed</i> . Excellent for low banks and rockeries. 6 inches15

ROCKET (*Hesperis Matronalis*).—Hardy perennial. Sweet-scented flowers. Sow out of doors in sunny position, in spring, and transplant.

No. 1109. <i>Purple</i> . Light pale purple; free bloomer. 1½ feet	Per oz., .40 .10
" 1110. <i>White</i> . Sweet scented, chiefly towards evening	Per oz., .40 .10
" 1111. <i>Carters Mixed</i> . Shades of purple and white. 1½ feet. Per oz., .40 .10	.10

ROMNEYA (*Matilija Poppy*).—Half-hardy perennial. When well grown is a handsome plant. Seed should be sown under glass in early spring, and seedlings potted off and hardened before planting out.

No. 1112. <i>Coulteri</i> . Pure white flowers. 3 feet25
--	-----

ROSE CAMPION (*Lychnis Coronaria*).—Perennial. Sow in spring in open border.

No. 1113. <i>Red or crimson</i> . Foliage woolly and silvery15 and .25
--	-------------

RUDBECKIA (Cone Flower).—Hardy annuals and perennials. Plants presenting the characteristics of the Single Sunflower with flower petals narrower and raised central discs. Sow in spring in a seedbed with a warm aspect, and transplant when large enough.

No. 1117. <i>Carters Cactus-flowered</i> . Annual. Golden yellow with maroon flakes; excellent novelty for cut flowers25
" 1114. <i>Amplexicaulis</i> . Free blooming annual, bushy habit; yellow. 2 feet.15 and .25
" 1115. <i>Bicolor superba</i> . Fine annual; golden yellow, with maroon spots; large blossoms10 and .25
" 1116. <i>Californica</i> . Grand perennial; golden bloom with long brown cone. 2 to 3 feet10 and .25
" 1118. <i>Purpurea</i> . Height, 3 to 4 feet. A handsome perennial.10 and .25

CARTERS ANNUAL ROSE

A real gem. If the seed is sown in a pan in a slight heat, well watered and kept from getting dry, the seedlings will appear in a few weeks. Pot off when fit to handle, and expect some fairy blooms within three months.

No. 1119. Price, .15 and .65 per pkt.

ROSE.			Per pkt.

" 1142. **Ocymoides.** Perennial rock plant, pale pink; trailer. **.15** and **.25**

Carters Large-Flowered Emperor Salpiglossis

CARTERS SCABIOSA (Mourning Bride)

This bright flowering plant is usually treated as an annual in our gardens. During recent years it has been greatly improved both in habit and range of colours, and is fast becoming one of the most popular of border flowers. When given plenty of room and the seed vessels are kept regularly picked off, it will last through the whole of the summer. Owing to its sweetness the bees are very fond of it and its floral flavours also attract all the most beautiful types of butterflies to the neighbourhood.

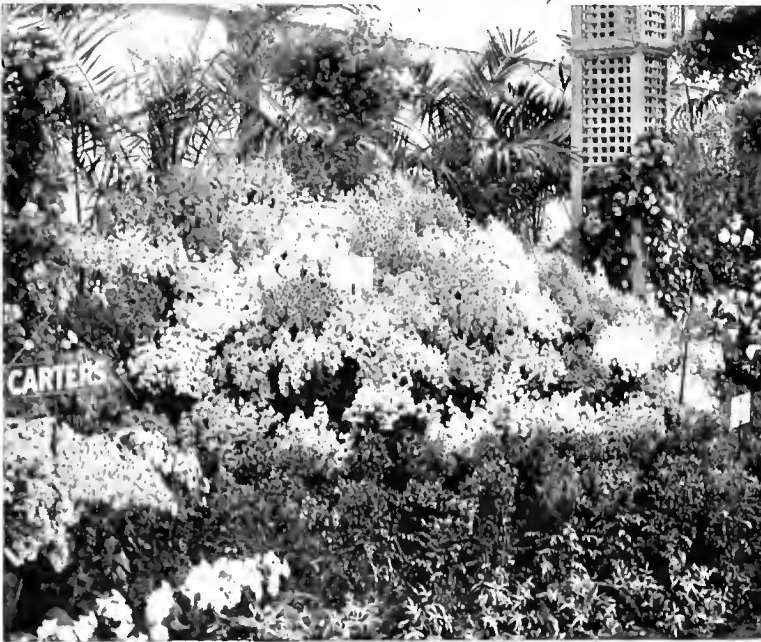

Sow the seed in heat in February and March in a pan or small box, and transplant the seedlings three inches apart in larger boxes; harden off as spring advances, and set out in the border towards end of May. They may also be sown where intended to grow.

CARTERS LARGE-FLOWERED SCHIZANTHUS

(Butterfly or Fringe Flower)

The Lovely Bank of Carters Large-flowered Schizanthus, awarded the gold medal at R. I. H. Exhibition, 1912

Culture of Schizanthus

Seed should be sown in June, July, August, or September, in well-drained boxes or pans, in a light compost of loam, silver sand, and leaf soil, thoroughly sifted. Fill the boxes with this mixture to within one half inch of the top and give a good watering in preparation for the seed, which should be sown evenly and covered only with sufficient soil to bury the seed. Then place the boxes in a cold frame or greenhouse, covering them with paper to keep the light from them until the seedlings appear, when the shading may be removed. Bright sunlight must be avoided at this stage. When the seedlings are ready to pot, they should be placed singly in thumb pots, well drained, and returned to the frame or greenhouse close to the glass; water should not be given for a day or two if the soil is in a moist condition, but a light syringing is beneficial on bright days. When the plants are two inches high, take out the points to encourage lateral growth, and as this advances place near little stakes to the plants. When the pots are full of roots they should be transferred into larger pots, and returned to the greenhouse for the winter. Plenty of air must be given at all times, and the temperature should be 50 degrees by day and 45 degrees at night. About the end of February the plants will be ready for another potting. If you desire to fill hanging baskets with schizanthus follow these instructions. First the baskets should be well lined with moss and filled with a compost of three parts fibrous loam, one part well-rotted manure and silver sand, with a little dusting of bone meal. When planted they should be suspended below a greenhouse roof and allowed to grow freely, fastening the growth to the baskets until they are covered; the tips can be pinched for a little time to make them uniform. At this stage a little artificial manure will be beneficial until the plants show flower, when it can be discontinued and only clear water applied.

No. 1617. **Carters Large Butterfly-flowered.** This surpasses any other strain for its size of flowers, gorgeous colourings, and diversity of shades. The habit is bold and branching, forming plants 20 to 30 inches high and of equal diameter. For all the year round display sow in succession. Pkt. .50

NOVELTY

Per pkt.

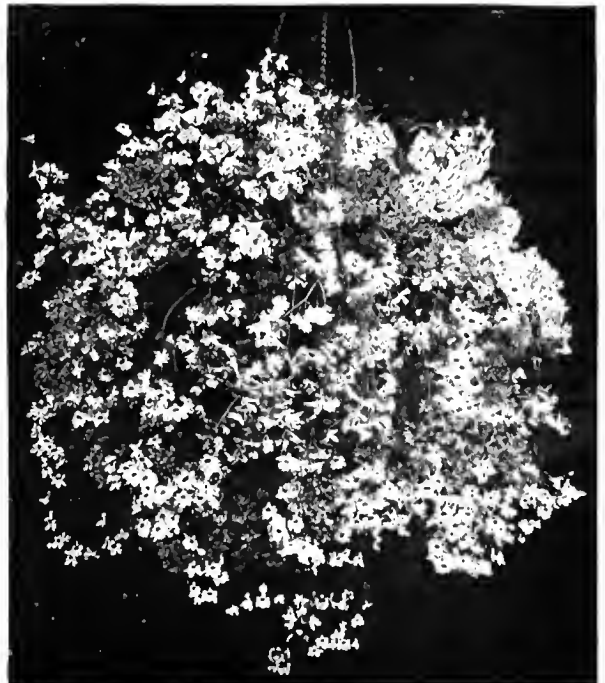

- No. 1162. **Pinnatus.** Original species from Chili. 2 feet .10 and .25
- " 1163. **Papilionaceus.** Free bloomer; bright coloured .15 and .25

CARTERS LENOX STRAIN OF BEAUTY STOCK

This dwarf strain of Beauty of Nice stock produces a very large percentage of doubles. The raiser states that 90 per cent of double flowers is a fair average. It has a very free-flowering habit and pyramidal form which is very uniform and neat, and is a splendid strain for spring forcing purposes, doing equally well in pots or benches. Height, 18 inches.

Carters	Per pkt.
Lenox Beauty Stock, White	.25 and .50
" " " Pink	.25 and .50
" " " Mixed	.25 and .50

Sow in spring either in boxes or in open ground, and when transplanting to prepared beds care should be taken not to discard the smaller seedlings, which usually produce the best flowers, the large plants being often all single.

Carters Dwarf Large-Flowered Ten-Week Stocks

Like the preceding, this is a very highly selected type of Summer Flowering Stock, likely to produce a large percentage of double flowers. It reaches a height of about 12 inches, and is useful for pots, beds, or borders.

Early Large-Flowered Winter Varieties

We very highly recommend this class of Stocks to all who have not grown them. They were first brought into prominence by the advent of that charming pink variety *Beauty of Nice*.

The following varieties all resemble this variety in habit and profusion of bloom. We know of few Stocks which produce such a high percentage of double flowers. Although usually treated as winter varieties, they are admirably suited for summer bedding if treated as ten-week varieties.

Sow in July and August for winter flowering, and in March and April for summer displays.

			Per pkt.
No. 1223.	Beauty of Nice. — Plant of robust growth, 2 to 2½ feet. Very free flowering. Flowers very large, double, fragrant, and delicate fleshy-pink colour. Valuable for decorative work.	Per oz. 4.00	.15 and .25

Carters Miniature Flowered

SUNFLOWER

(*Helianthus*)

Sow all varieties in spring

Only transplant if necessary

CARTERS MINIATURE AND MANY FLOWERED VARIETIES

Sunflowers in our Trial Grounds last summer attracted special attention. Indeed, by the many admiring remarks bestowed on these old favourites it would seem that many more varieties of these flowers will be given space in our gardens than heretofore. Our comparative tests afforded a splendid idea of what a mass of many sorts can bestow on the garden or indoor decoration.

- | No. | | Per pkt |
|-------|---|-------------|
| 1235. | Carters Orion (<i>see Photograph</i>). Has very pretty quilled petals, free habit, most attractive when seen growing, and in decoration. 3 feet | .15 and .25 |
| 1237. | Carters Miniature Flowered (<i>see Photograph</i>). Single Nose-gay Sunflower; gold, dark centre. Very handsome when seen in borders; quite welcome flowers for cut purposes. 3 feet | .15 and .25 |
| 1238. | Miniature Flowered Double. Annual. About 2 feet | .15 and .25 |
| 1231. | PLEIADES. A grand mixture of small decorative Sunflowers, in various shades of gold and sulphur. 3 feet | .15 and .25 |
| 1233. | Perkeo. A miniature variety of exceptional interest. Of bushy habit. 12 to 18 inches. | .15 and .25 |
| 1234. | Stella. Favourite, select miniature variety; in great demand. 4 feet | .15 and .25 |

CARTERS SELECTED LARGE-FLOWERED SWEET PEAS

With a view to assisting those of our customers who are not quite conversant with Sweet Peas in their now extremely numerous varieties, we offer our selection of large-flowered varieties as under.

Although all good for exhibition, we chiefly have in mind their suitability for garden decoration and cutting purposes. With this end in view, the varieties we have selected will be found to be of giant-flowered types borne in threes and fours on very long stems. All are bright colours and pleasing shades, which do not scorch in the sun. The plants are of robust habit, and if the bloom is judiciously cut will produce large quantities of beautiful flowers until late autumn.

ZEA MAYS (Japanese Maize). — Annual. Sow in slight heat in May and plant out in June.

No. 1439. *Variegata*. Beautifully striped15

No. 1593. *Perfection*. Foliage striped rose, crimson, cream, and yellow15

WALLFLOWERS

The Wallflower is very popular in English gardens, but is not grown to a great extent in this country. Now that so many improved forms and bright colours are available, it should find a place in all collections of spring-flowering plants. For quite two months, May and June, it adds its best charms, and makes beds and borders quite cheery by its presence and fragrance. For real usefulness we recommend the selections shown on this page. Sow the seed of the annual varieties in February and March and keep growing until time for planting out in May. For indoor purposes sow the seed in September and pot off when ready, keep them well nourished, and as spring approaches they will grow rapidly and prove a valuable addition to the greenhouse or conservatory with their fragrance and presence.

CARTERS WINTER BLOOMING Per pkt.

- No. 1419. **DEEP RED.** A brilliant wallflower and should be greatly appreciated for its free-flowering qualities and rich colour**.25**
- " 1407. **ELLEN WILLMOT.** This is a recent introduction of which we have an extremely high opinion. Its large flowers are a rich shade of ruby, and clearly distinct from any other existing colour**.25**
- " 1417. **VESUVIUS.** The most brilliant-coloured wallflower in cultivation, the flowers being bright orange, tinged with old gold at the edge of the petal. With the sun shining on the flowers they have almost the appearance of being on fire**.25**

CARTERS MAMMOTH DOUBLE ZINNIA

The Zinnia is one of the many popular garden flowers introduced into general cultivation in this country by the late Mr. James Carter, and as far back as 1860 our House was awarded a First-Class Certificate by the Royal Horticultural Society for our strain of the double-flowered type. When well grown, the Zinnia is one of the showiest of the Half-Hardy Annuals, its treatment being similar to that of the Aster

ARUM

Mrs. Roosevelt (see Photograph). — This is an exceedingly hardy and beautiful variety, producing handsome, soft lemon-coloured flowers and foliage of dark green, marked with splendid transparent silver blotches, making it a most attractive plant for decorative purposes. This variety is of quite recent introduction, and attracted great attention at the International and Holland House Shows.

Price, 3.50 per doz.; .35 each

AMARYLLIS

The Amaryllis are a showy tribe of bulbous plants, and exceedingly effective for conservatory decoration. Pot up the dry bulbs when received in good loamy soil, and expect them to bloom the following summer. When potting, use a compost of turfy loam and leaf-mould, coarse sand, and well-rotted cowdung.

25.00 per 1,000; 2.75 per 100

.75 per bundle of 25.

Imported Clumps, for open ground. — Very fine, 3.00 per doz.; .35 each.

These roots are exempt from our free delivery list. (See page 191.)

By availing ourselves of the modern method of cold storage we are enabled to supply forcing roots of this pretty decorative plant through the winter months. One advantage these retarded roots have over those handled in the ordinary way is the quick time in which the flowers are produced. We have seen dormant crowns put into strong heat and brought into beautiful bloom within three weeks, but we recommend six weeks as the average time for a perfect flower spike.

Hyacinthus Candicans

Very effective white, bell-shaped flowers, they make a splendid background for Gladioli. Height about 4 feet. Price, 16.00 per 1,000; 2.00 per 100; .35 per doz.

These roots are exempt from our free delivery list. (See page 191.)

Lily of the Valley

A Curious Plant from Central Asia

MONARCH OF THE EAST. (As originally named and offered by us.)

These roots are exempt from our free delivery list. (See page 191.)

This remarkable plant exhibits one of those extraordinary traits in nature that few are able to understand, the magnificent flower actually comes out of the dry bulb without being placed in soil and water. The flower is of a red-brown colour, tipped with red and yellow, whilst the inner parts of the flower are equally as brilliant. Bulb needs only to be placed in some fancy receptacle, *without water*, in a warm room, or on the mantel shelf, when, without showing either leaves or roots the flower makes its appearance, thriving entirely upon the nourishment contained within the bulb.

.20 each; 2.00 per doz.

MONTBRETIAS

These charming autumn-flowering tuberous plants when more generally known will meet with universal cultivation. They are easily grown in the open border by planting during April or May. Set the bulbs about 4 inches deep and protect from frosts during the winter with a liberal mulching of litter and leaves.

Flowering Spike of Double Sweet-Scented Tuberose

DOUBLE SWEET-SCENTED TUBEROSES

Beautiful, Pure White Flowers

The Sweet-scented Double White Tuberose (*Polianthes Tuberosa*) has become exceedingly popular. It possesses both a character and a perfume distinct from any other flower, and can be induced to bloom at various seasons. At one time they were only obtainable from the south of Europe; now they are specially cultivated in different parts of the world, and can easily be forced into bloom for the Easter festivals. Those who do not cultivate these flowers for winter decoration can procure the bulbs in the spring, when they will come into flower during the summer. The double-flowered Tuberose may be had in succession by potting the tubers and standing them in a cold frame, covering them 4 inches deep with cocoanut fibre refuse; but they will start much more quickly and with greater certainty in a gentle bottom heat.

Carters Extra Large Bulbs

3.00 per 100; .50 per doz.

These roots are exempt from our free delivery list.

(See page 191.)

SPIRÆA. The dormant roots or clumps can be placed singly into 6 inch pots, or a size larger if necessary. If given plenty of water as soon as they commence to grow, and kept in heat, they will become effective very quickly.

These roots are exempt from our free delivery list. (See page 191.)

TIGRIDIA (Tiger or Shell Flower)

Some beautiful hybrids of this showy flower have appeared during recent years. The bulbs, which are supplied in a dry state, are usually planted in pots in April, or in groups in the garden in a rich, sunny border. They maintain a succession of bloom throughout the summer and early autumn, when they must be taken up and placed in dry sand to winter.

THE SWEET FRAGRANCE OF OLD-FASHIONED ENGLISH FLOWERS

Our natural Flower Seents are the concentrated essences of living flowers, extraeted with such skill and eare that the perfumes contain unimpaired the delicate and odoriferous constituents of the petals. They do not become stale or stain the fabries.

A lady writes:—"The Night-Seented Stock is the most delicious and lasting I have ever used, and I have been devotedly fond of fine, delieate odours during a long life."

The delicious perfume of the Night-Seented Stock has the unique and fragrant sweetness of this flower and the durability of the essence has ensured for it the position of a first favourite.

The little flower (*Mathiola bicornis*), see page 137 during the day is an almost inconspicuous object, but as night approaches it unfolds its petals and fills the evening air with a subtle fragrance.

Newlands Manor, Lymington, Hants.

"Messrs. CARTER. — Please send me a bottle of your 'Night-Seented Stock.' It is exactly like the flower, and I can imagine myself in my summer moonlit garden on the coldest winter day if I have some of the scent on my handkerchief.

Yours faithfully, MARY CORNWALLIS WEST."

"P.S. — Please send also a bottle to my daughter, the Duchess of Westminster, Eaton, Chester."

Farmogerm the Standard Inoculation

For Clovers, Peas, Beans, Vetch, and Sweet Peas

What Farmogerm is

Farmogerm is a pure culture, or growth of nitrogen-fixing bacteria that have been selected and bred up to transform large amounts of nitrogen from the air into soluble nitrates. These bacteria are grown in a jelly, or food, in which they remain active for long periods of time, and sent out in a bottle which admits the necessary supply of pure air, yet keeps out destructive contaminations. If alfalfa can be grown on hot, sandy land of South New Jersey why can't you grow it?

What Farmogerm Will Do

Unless the soil is very acid or wet, Farmogerm will:

1. Increase the yield and quality of legume crops, giving quicker growth and earlier maturity.
2. Increase the food value of legumes.
3. Make legumes grow in new localities where they cannot otherwise be grown successfully.
4. Supply nitrates to other crops growing with the inoculated legume crop.
5. Enrich the soil for future crops, thereby increasing the permanent value of the farm. Better crops — better soil — less fertilizer — less labor.

Increased Crops are a well-established certainty in all instances where inoculations are used together with proper culture methods. Not only is the crop increased in weight, but in its richness. The United States Department of Agriculture, Bulletin No. 71, substantiates these statements. Why not increase your farm yields without extra labor and at practically no extra cost?

Fertilizer Values of well-inoculated legumes have long been determined. It is shown in Bulletin No. 71, issued by the United States Department of Agriculture that tests covering a large part of the country prove that legumes will deposit 1,000 lbs. of nitrates per acre. This means that your most expensive commercial fertilizer is absolutely unnecessary when you plant legumes, perfectly inoculated, sown and planted in properly prepared land.

PEAS, BEANS, SWEET PEAS

Yield earlier, longer, and better when treated with Farmogerm. Farmogerm is endorsed by Farmers, Federal and State Agricultural Departments, and private estates. It is delivered to you in bottles, ready for use. You can inoculate the seed for ten acres in ten minutes.

PRICES

5 acre bottles, 9.00. 1 acre bottles, 2.00. Garden bottles, .50.

"I have been recommended to you by the Massachusetts Agricultural Experiment Station, Amherst, Mass., the use of your culture to inoculate the soil for alfalfa, instead of soil that has grown alfalfa."—R. GILLESPIE, Hopkinton, Mass.

"The Farmogerm we bought of you for our alfalfa did fine. I got the best stand we have had for years."—B. ROBINS, Magruder, York Co., Va.

To whom it may concern :

It may please you to know that we are continually in touch with gardeners, estate superintendents, green keepers, and golf professionals of splendid character and ability who, through our office, prefer to make a change of situation.

Any services which we may render in this connection are at your disposal without charge to any concerned.

THE HIGHEST HONOURS TO CARTERS EXHIBITS

Royal International Horticultural Exhibition, London, May, 1912

TWO LARGE GOLD MEDALS to Carters Flowers and Japanese Garden.

LARGE SILVER CUP to Carters Vegetables.

THE HORTICULTURAL CLUB CUP to Carters Japanese Garden

LARGE SILVER MEDAL to Carters Method of Seed Testing.

The above Awards constituted a record for any Seed House at this most successful Exhibition, our displays being greatly admired.

TERMS OF BUSINESS

CONDITIONS OF GUARANTEE OF QUALITY

We guarantee our Seeds according to the quality purchased to be of the highest average standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee, or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the goods, and while we exercise the greatest care to have all seeds, bulbs, plants, etc., true to name, we can give no warranty, express or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, and plants, and will not be held responsible for the crop. If the purchaser does not accept the goods on these terms and conditions, they must be returned at once and the money that has been paid for same will be refunded.

CUSTOMS DUTIES These and all other matters in connection with the import of goods are entirely taken care of by us.

PRICES AND TERMS The prices quoted in this catalogue are those prevailing at this date and are subject to change without notice. All terms of payment are net cash.

FREE DELIVERY OF GOODS We deliver free in the United States or Canada, to any Post Office, Railroad, Express Office, or Freight Station at our expense, all Vegetable and Flower Seed orders at the packet, ounce, quarter pound, half pound, and pound prices, also bulbs at the single and dozen rates, except where otherwise noted. Purchaser must pay transit on pints, quarts, pecks, and bushel lots (also plants and bulbs where noted), tools, fertilizers, and insecticides, etc. When ordering pints or quarts of Peas, Beans, or Corn, charges prepaid, please remit postage on the basis of one pint weighing one pound. For postal table see bottom of this page.

PLACING ORDERS Purchasers should order early to ensure a prompt, seasonable shipment of their goods. Do not wait until spring; send your order in now for future shipment. Write all orders separately from general letters or letters of inquiry. When goods are to be sent by mail, please write the name and address in full, also give street number, or Post Office Box, and when ordering goods forwarded by express or freight state clearly the express or freight station.

HOW TO ORDER Fill in the order sheet and mail the same to Carters Tested Seeds, Inc., at Boston, for American orders, and to Toronto for Canadian orders, and if this is done the best tested seed in the world can be obtained at no more trouble or expense than if local seeds were bought.

NEW CUSTOMERS In opening an account with us it is necessary for us to receive cash with the order, or be furnished with satisfactory references, those pertaining to Boston or Toronto preferred, thus saving time.

REMITTANCES Post Office Money Orders, Bank Drafts, Registered Letters, or Express Money Orders are acceptable, and we must disclaim all responsibility when remittances are made in any other way. All cheques, etc., should be drawn in favour of "Carters Tested Seeds, Inc."

NOTICE TO PURCHASERS All letters are opened under directions of one of our principals, and the orders are given out under personal supervision. Bulb and plant orders are sometimes delayed by severe or hot weather and at all times take longer to execute than seed orders in consequence of the care in lifting and packing. Customers should always retain a true copy of the order sent to us.

It is our earnest desire that all the requirements and directions of customers be scrupulously attended to by our assistants, *and we practise the utmost personal supervision to see that they are carried out.* We would therefore respectfully request that we be informed if at any time there is cause for dissatisfaction, that we may have it rectified at the earliest possible moment.

ACCIDENTS IN TRANSIT Glass and other goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. All goods damaged in transit should be signed for "as received in a damaged condition," the express or freight company duly notified of same and compensation claimed.

AS TO CORRESPONDENCE Any proper letter of inquiry will receive our careful and prompt attention and our friends would favour us by stating all questions clearly and briefly. Please do not use the order sheets for correspondence.

CHANGE OF ADDRESS Please notify us of any change of permanent address, to enable us to keep our mailing list correct, and thus ensure your receiving our various publications promptly and regularly. The favour of your kind recommendation of our goods to those of your friends requiring seeds, bulbs, plants, or tools, for use in the garden, farm, or conservatory, will be very much appreciated, and we shall be pleased to forward our catalogue to the address of any prospective customer you may favour us with.
